

BROWN

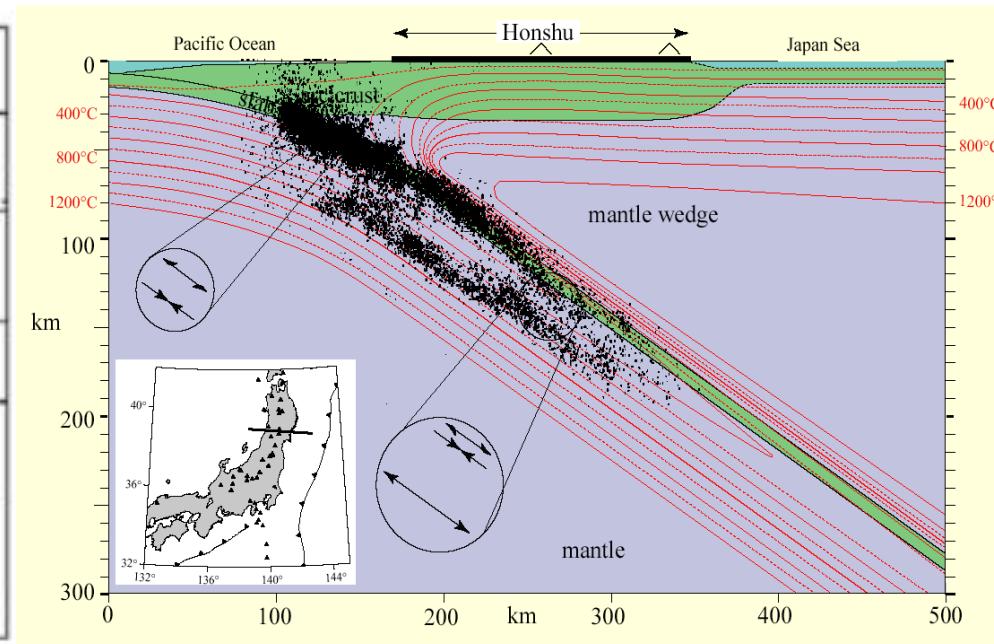

Antigorite Rheology: Implications for Spectrum of Slip Behavior

Greg Hirth, Brown University

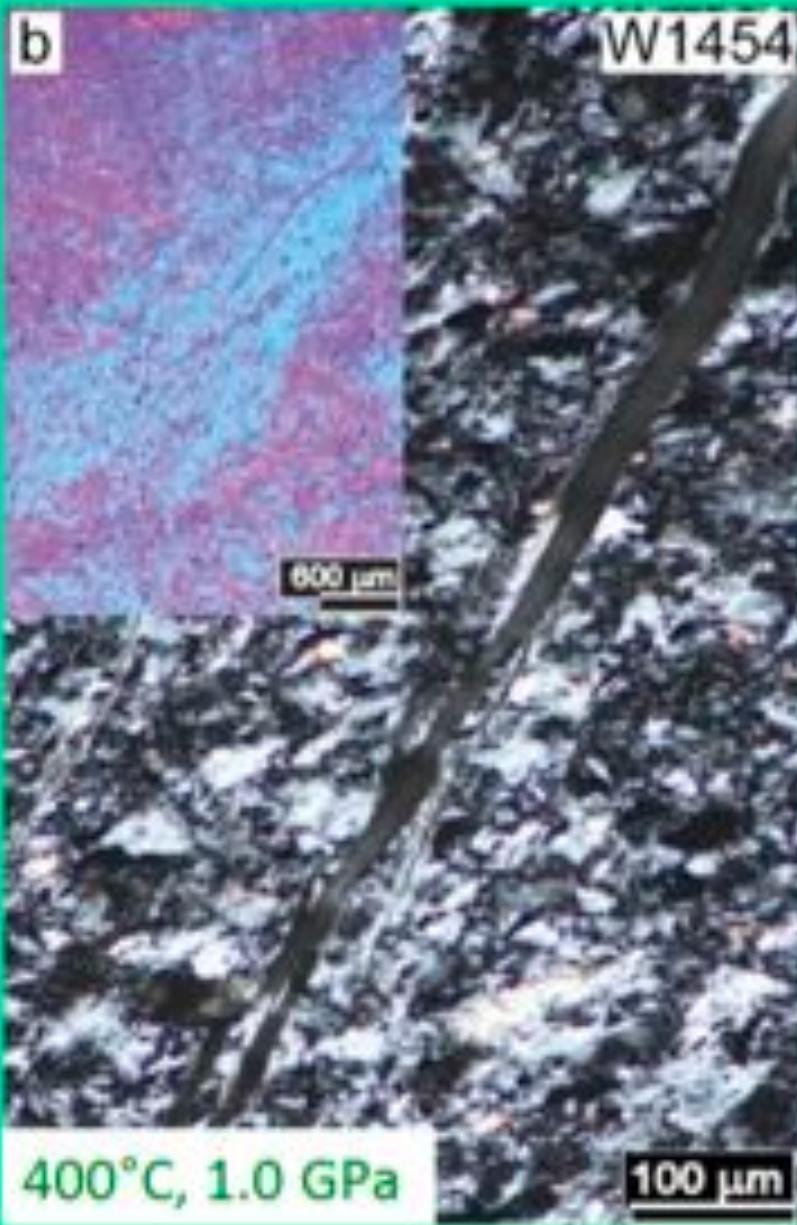

Wada et al. 2008

Hacker

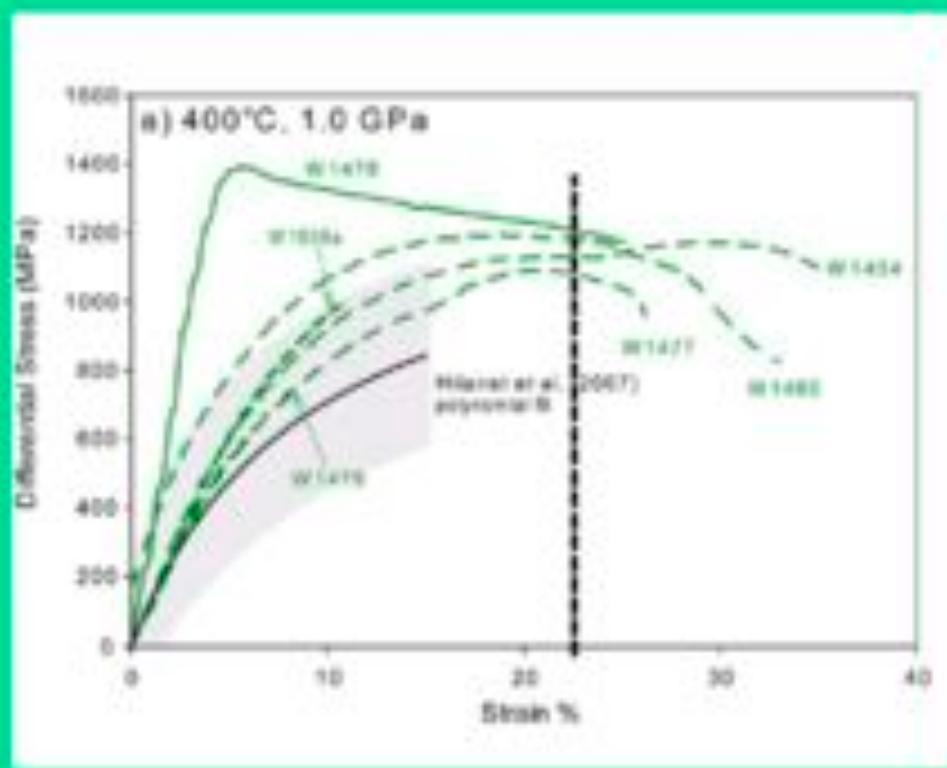

Linda Chernak & Arjun Kohli,
David Goldsby & Terry Tullis

Localization Within Stability Field

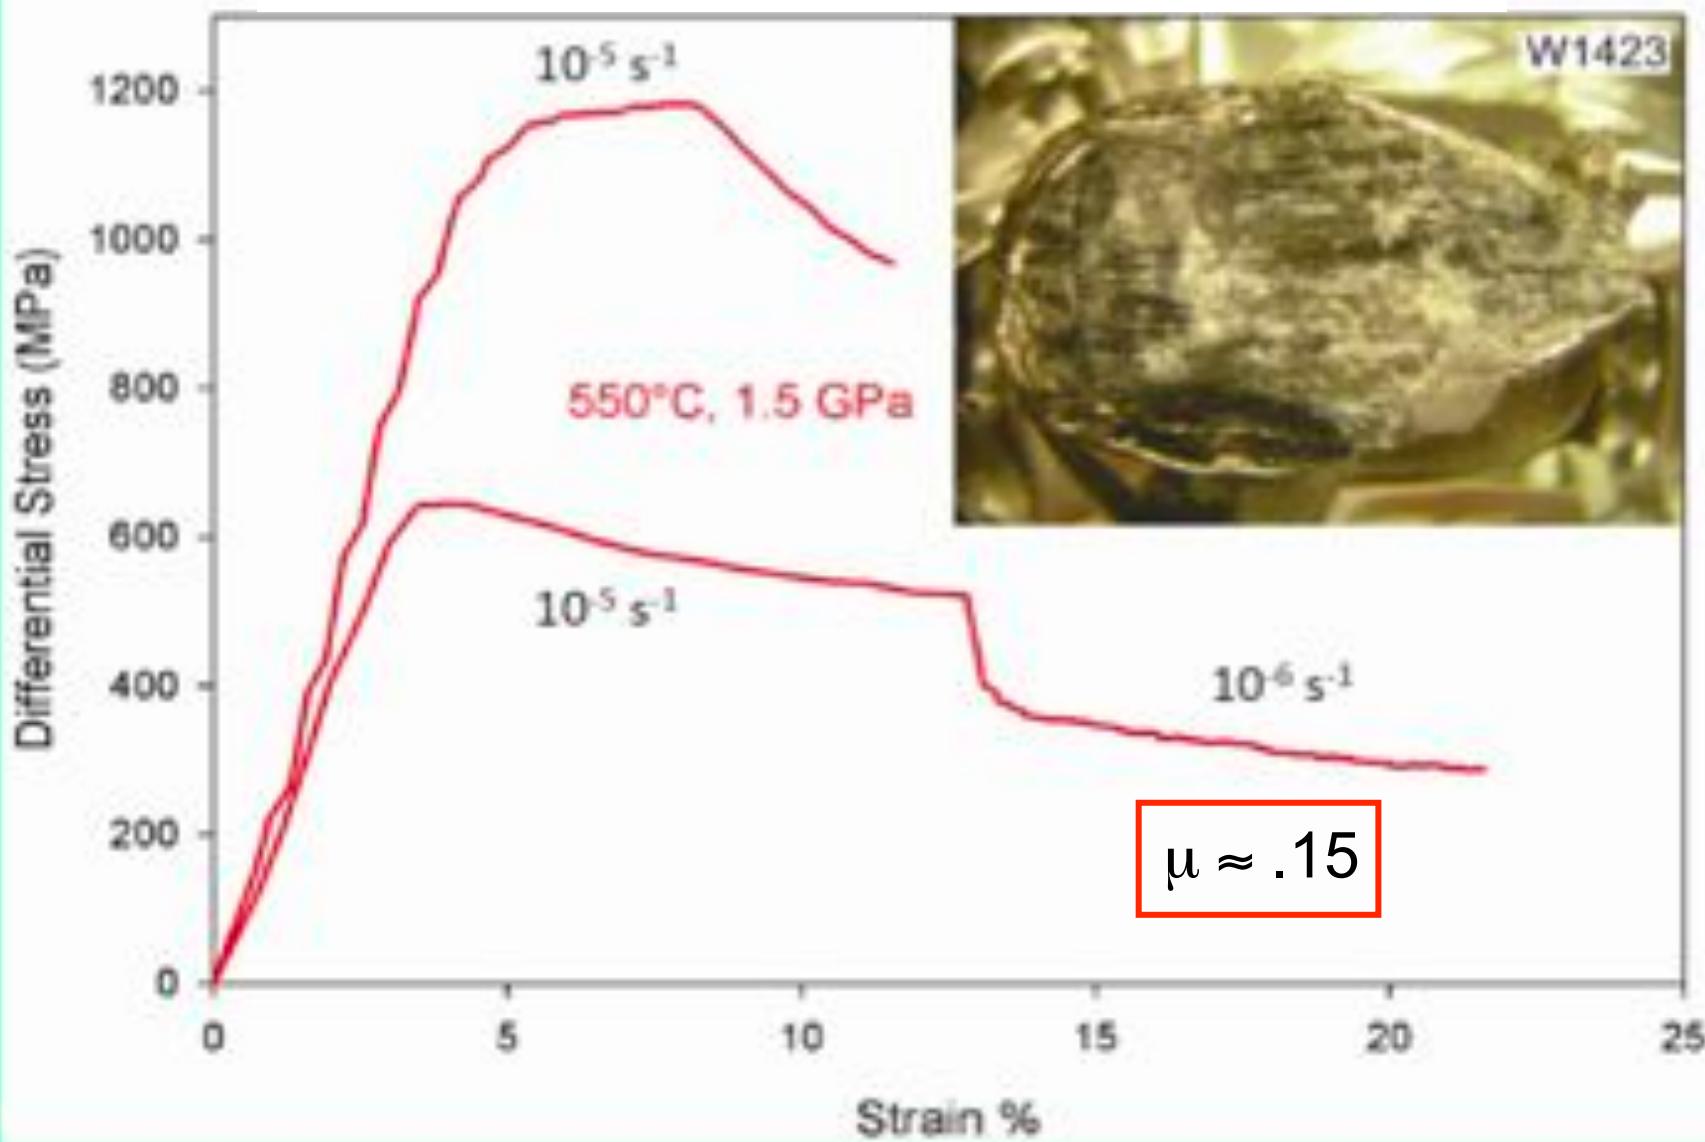

Semi-brittle, localizes
at strain of 20-25%,
von-Mises criterion not satisfied

Chernak & Hirth, 2010

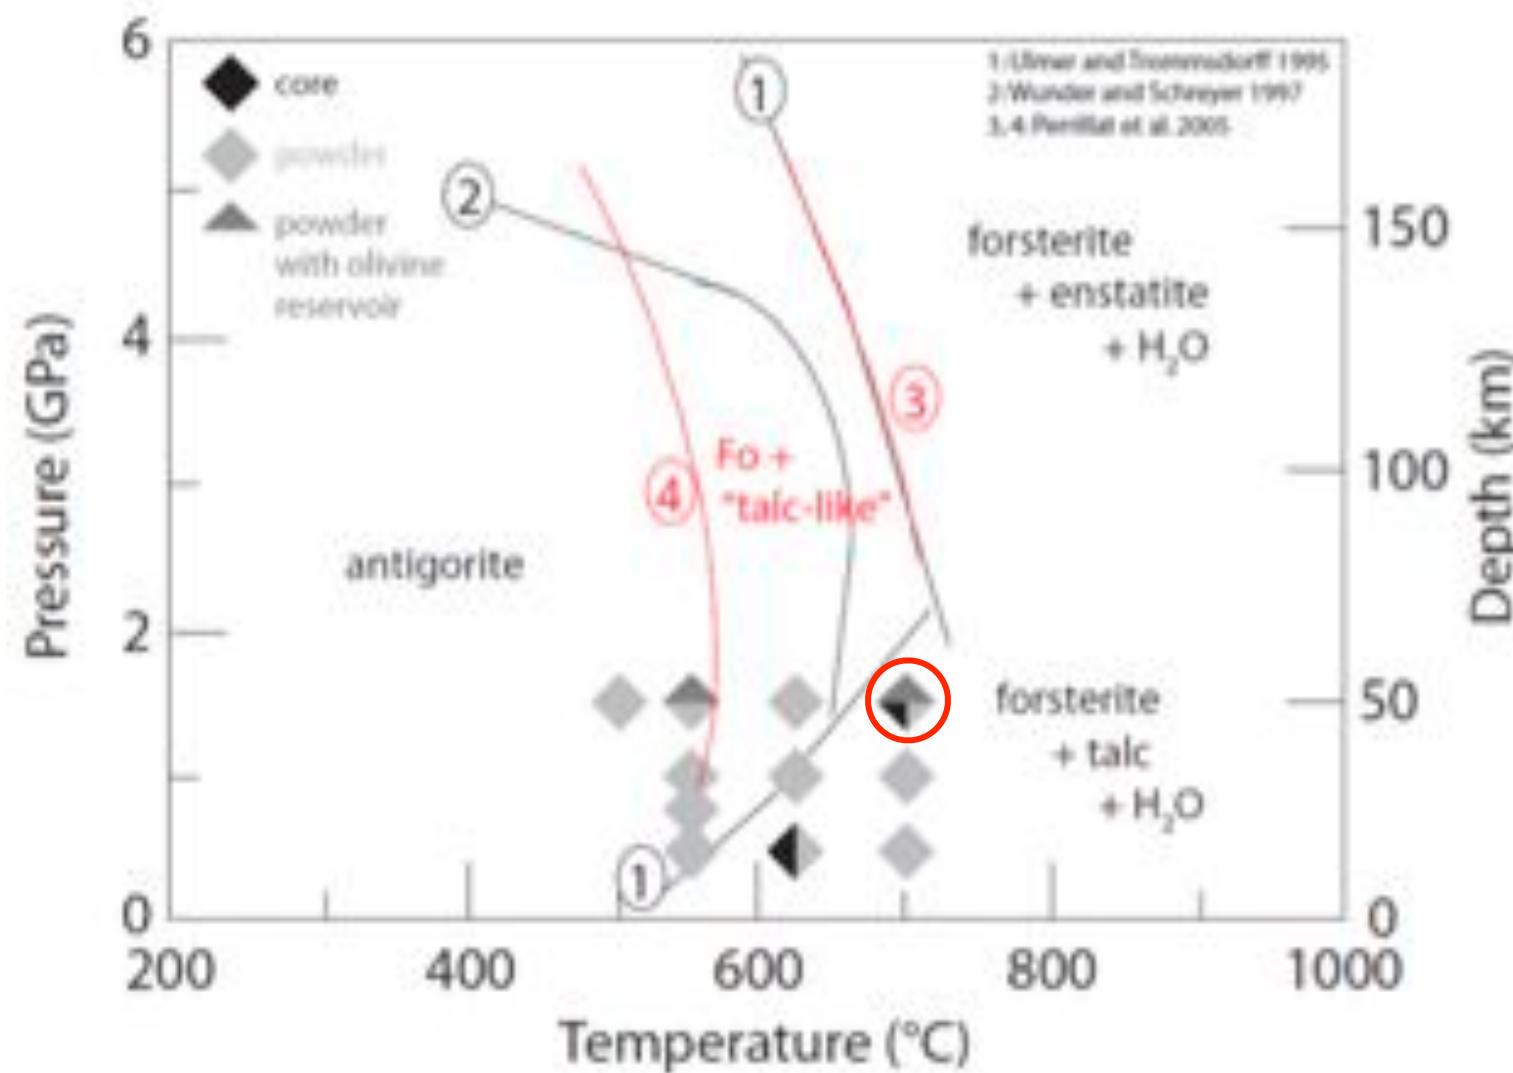

Velocity Strengthening and localized

Chernak & Hirth, 2010

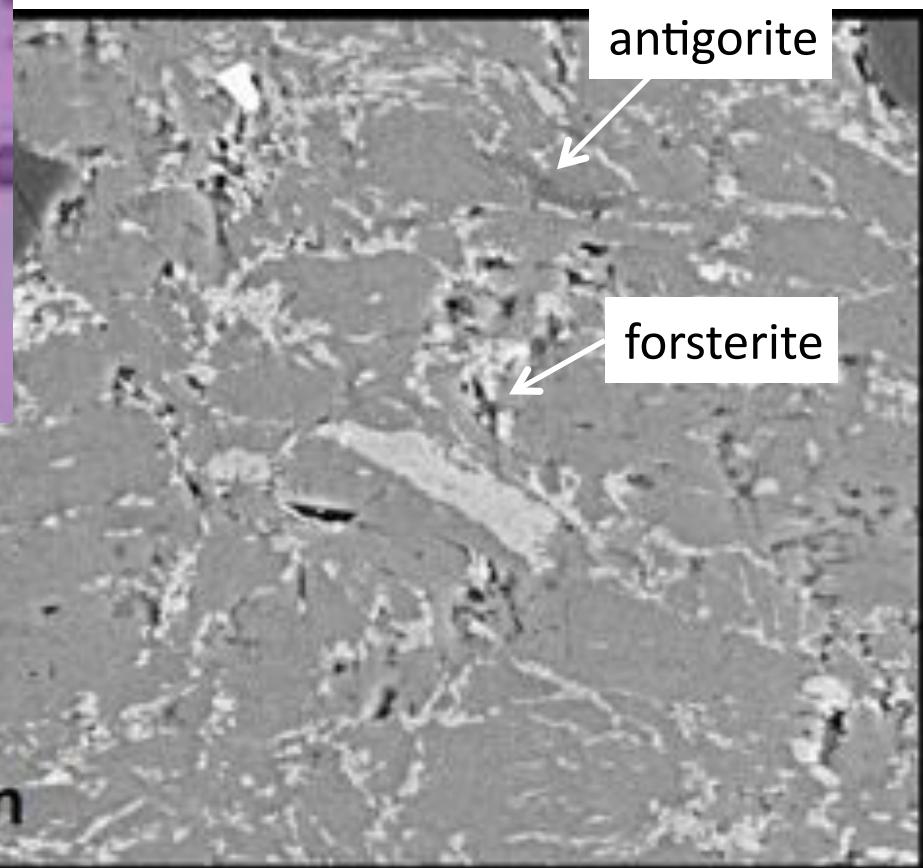

W1423

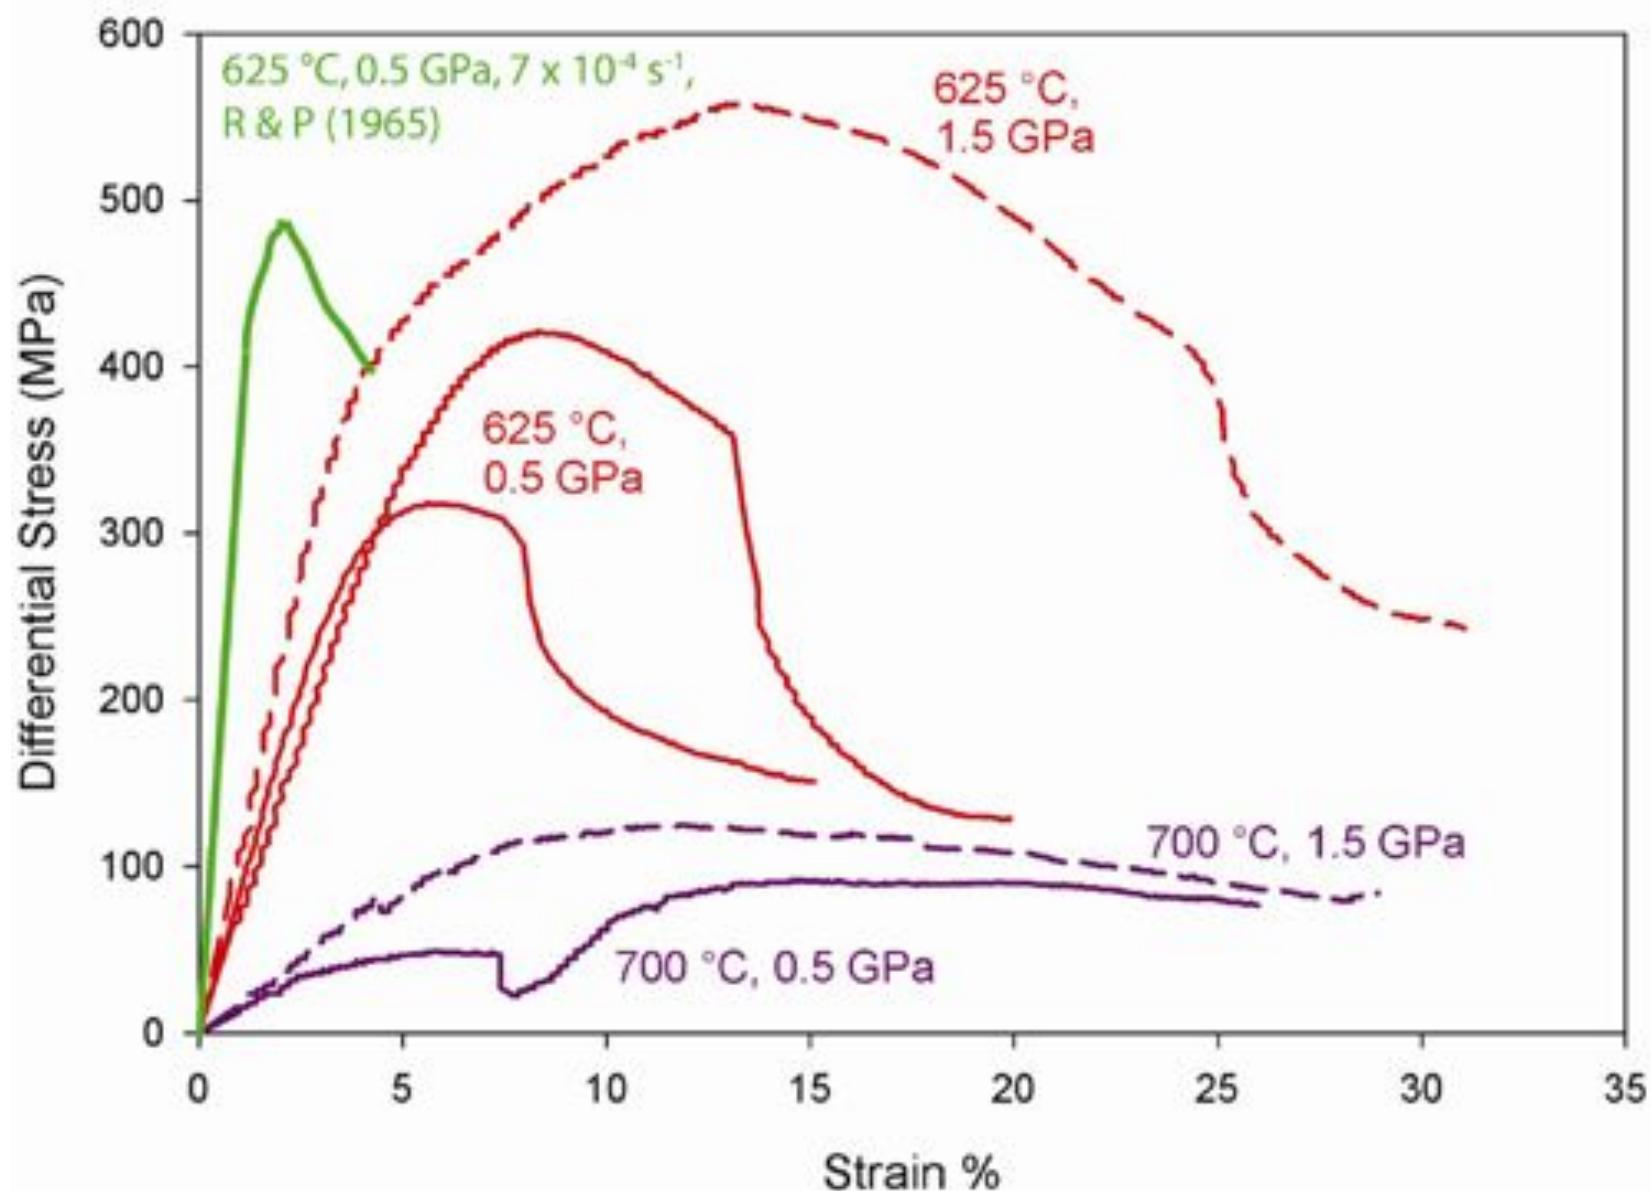

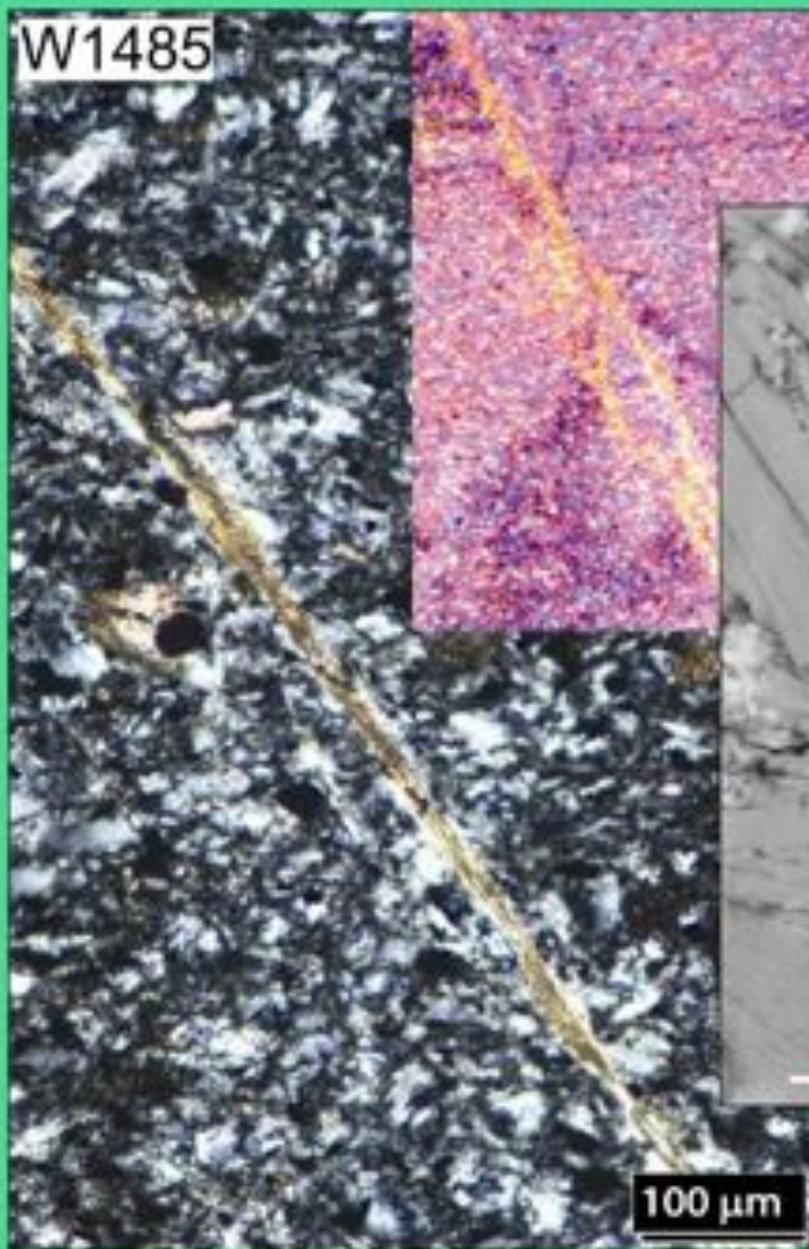

700°C, 1.5 GPa

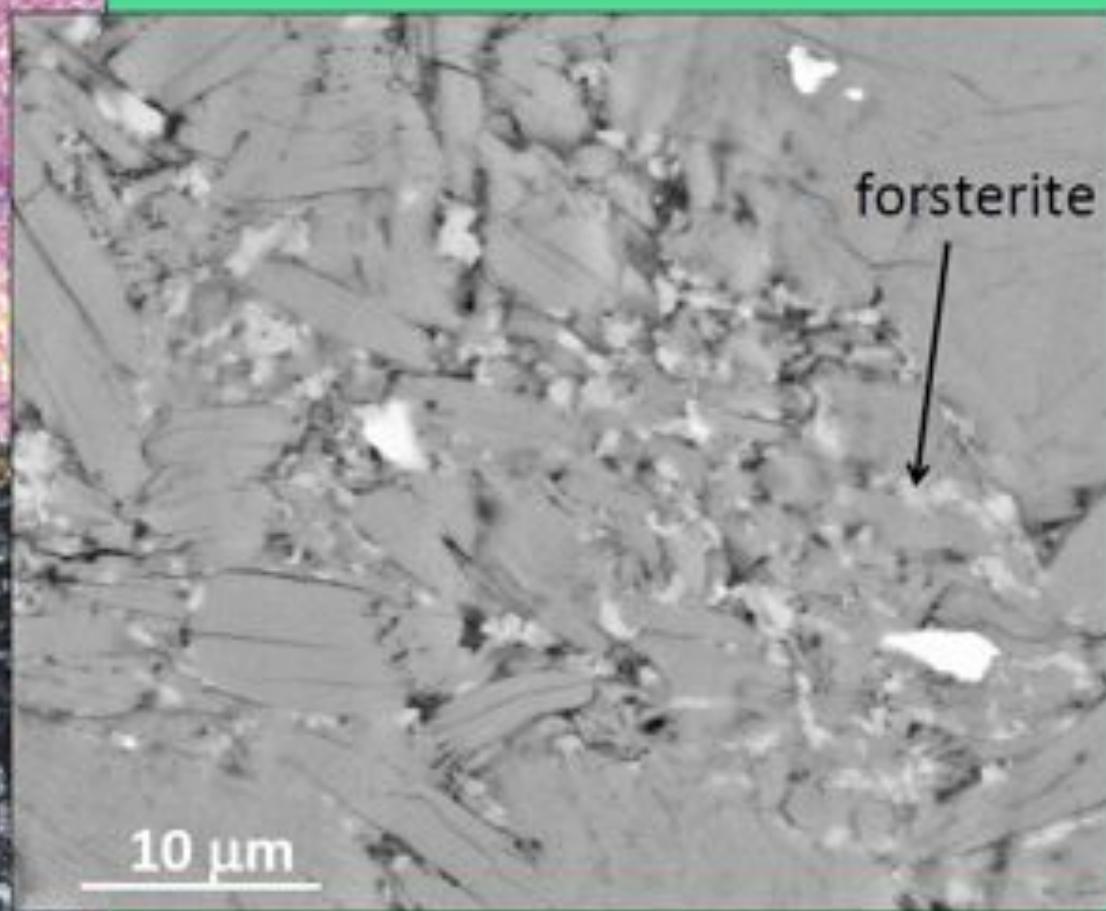

Chernak & Hirth, 2010

Where Dehydration is Expected: Low P

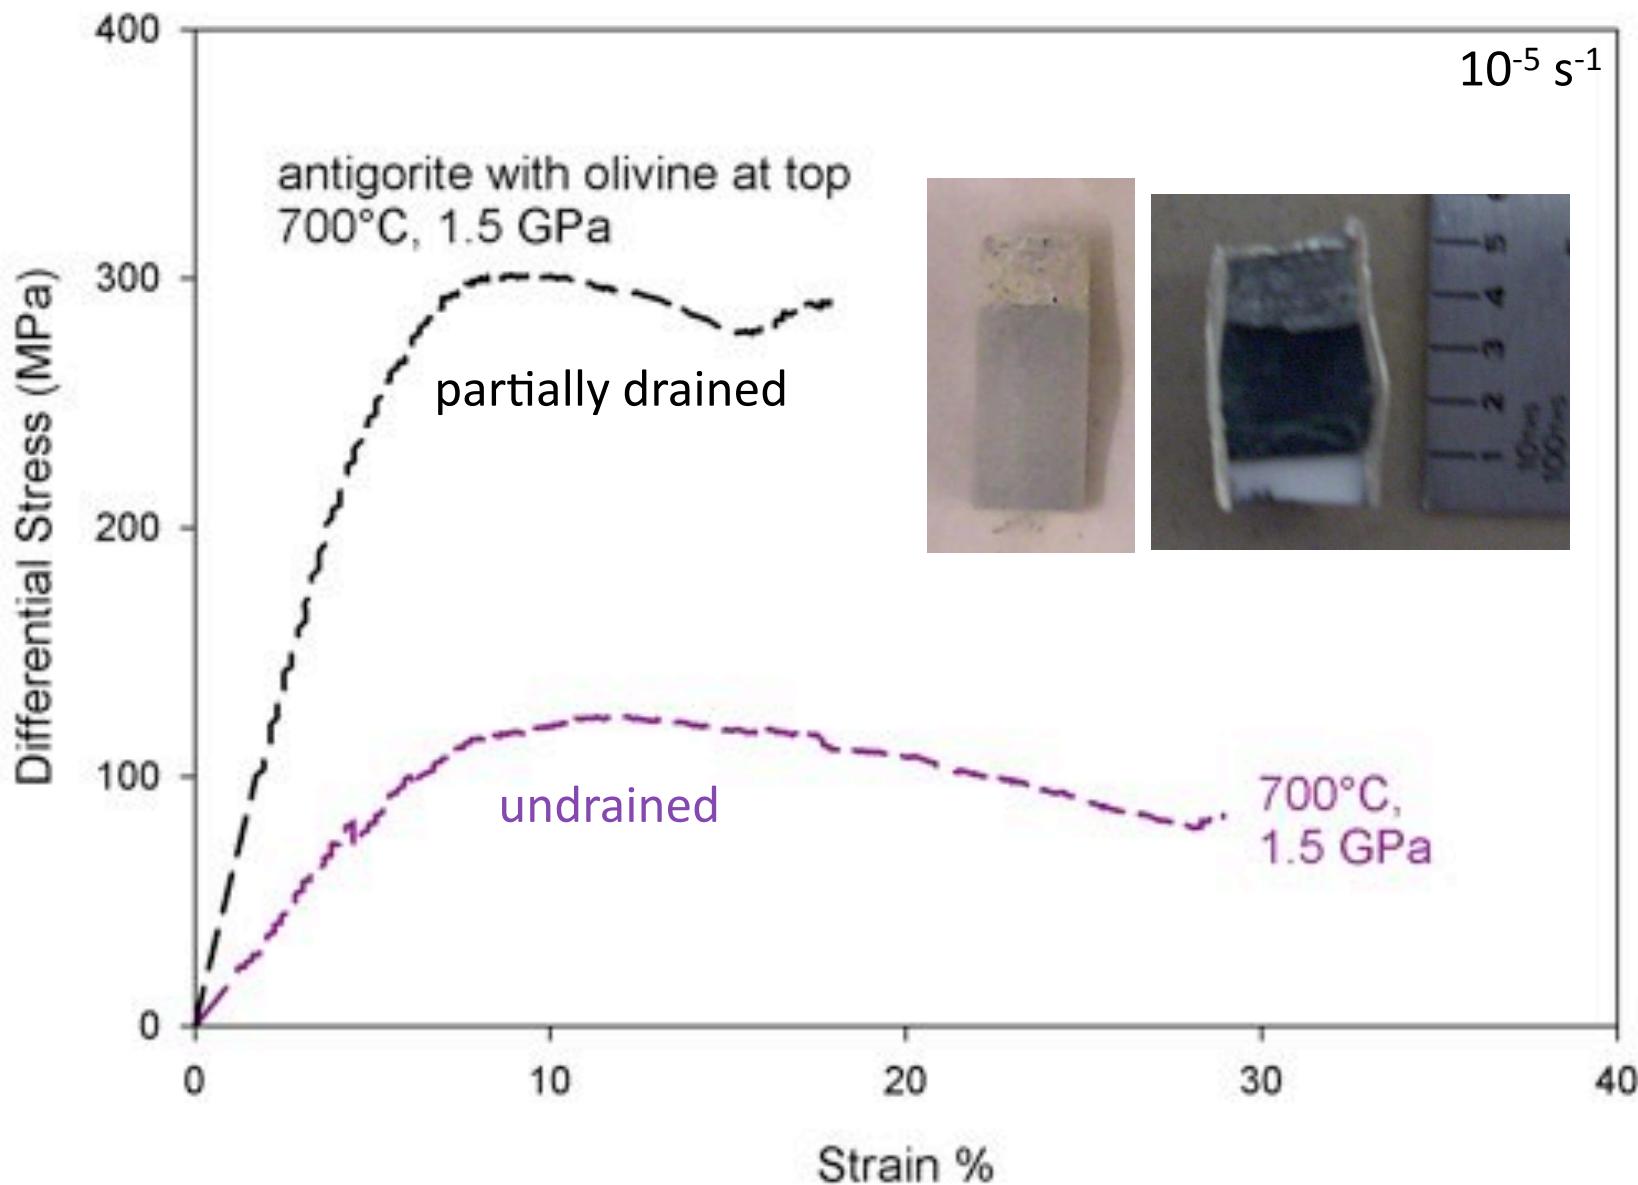

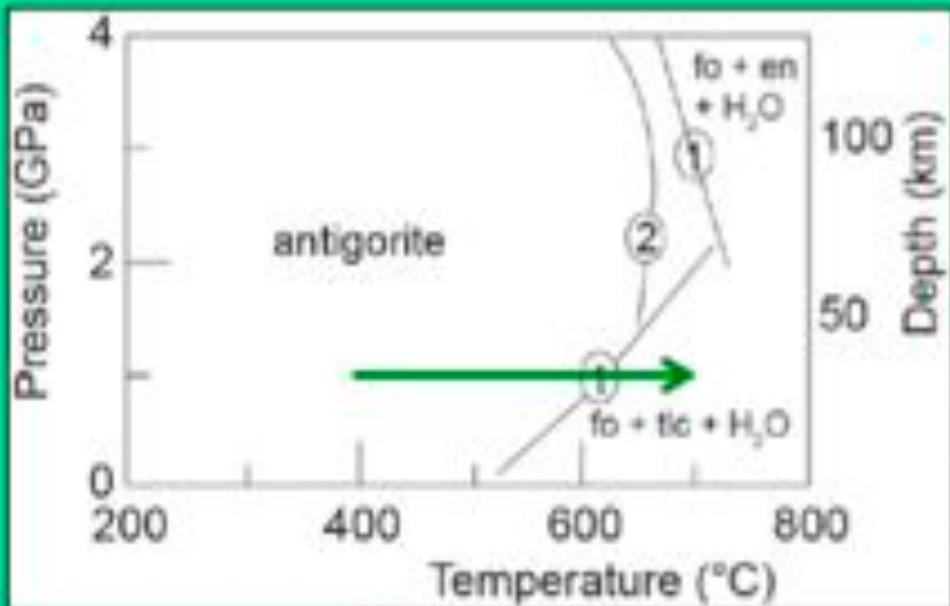

625°C, 0.5 GPa

localized deformation

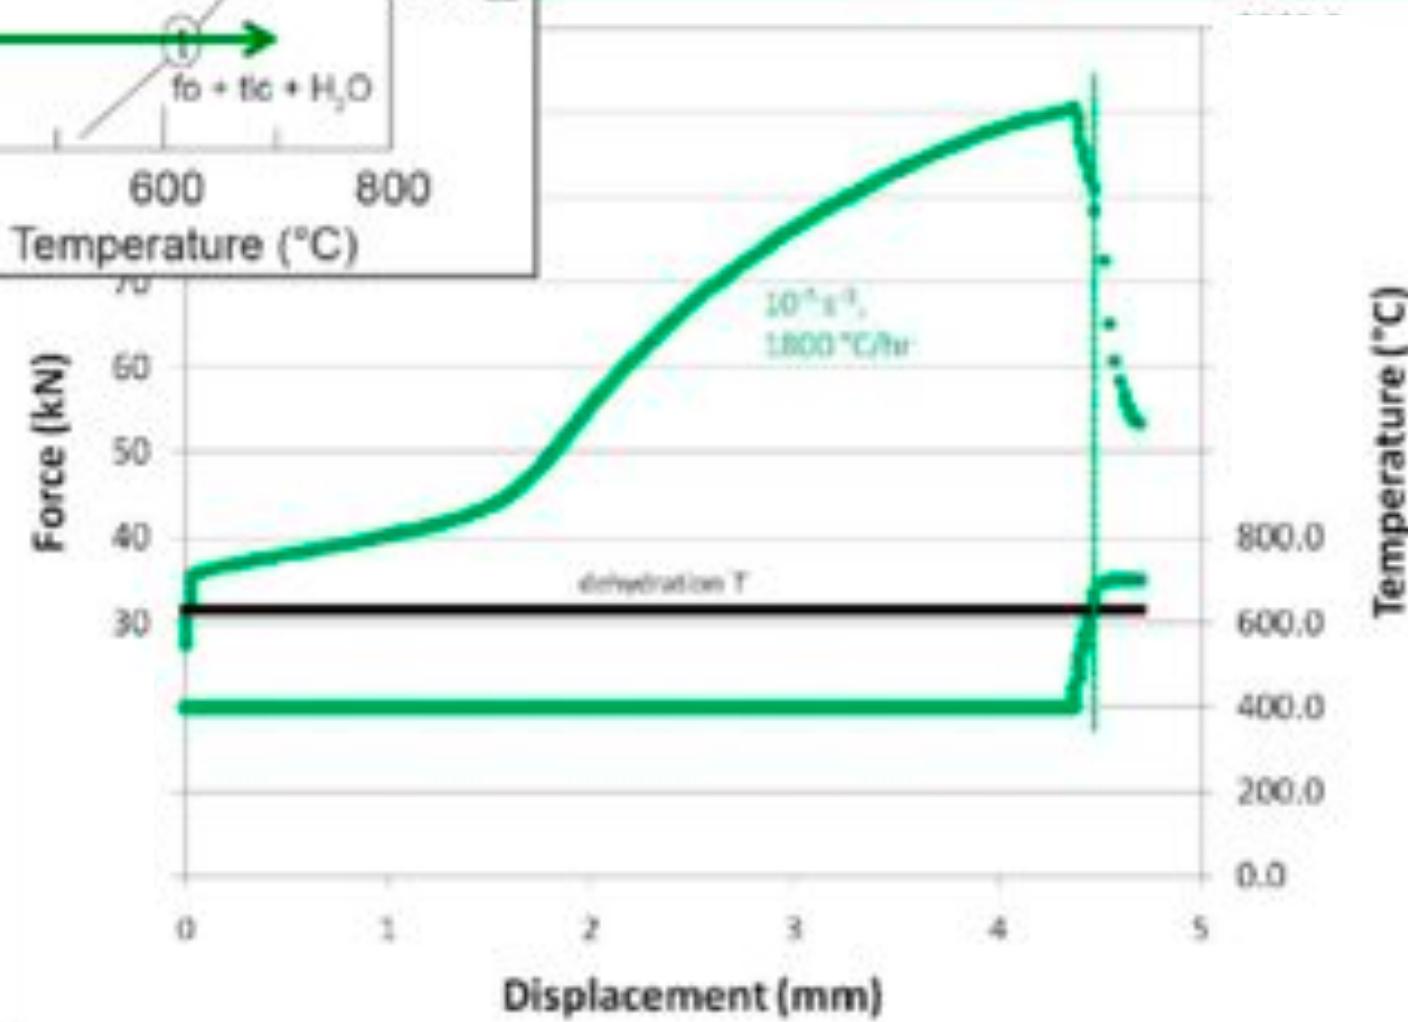

Role of Effective Pressure

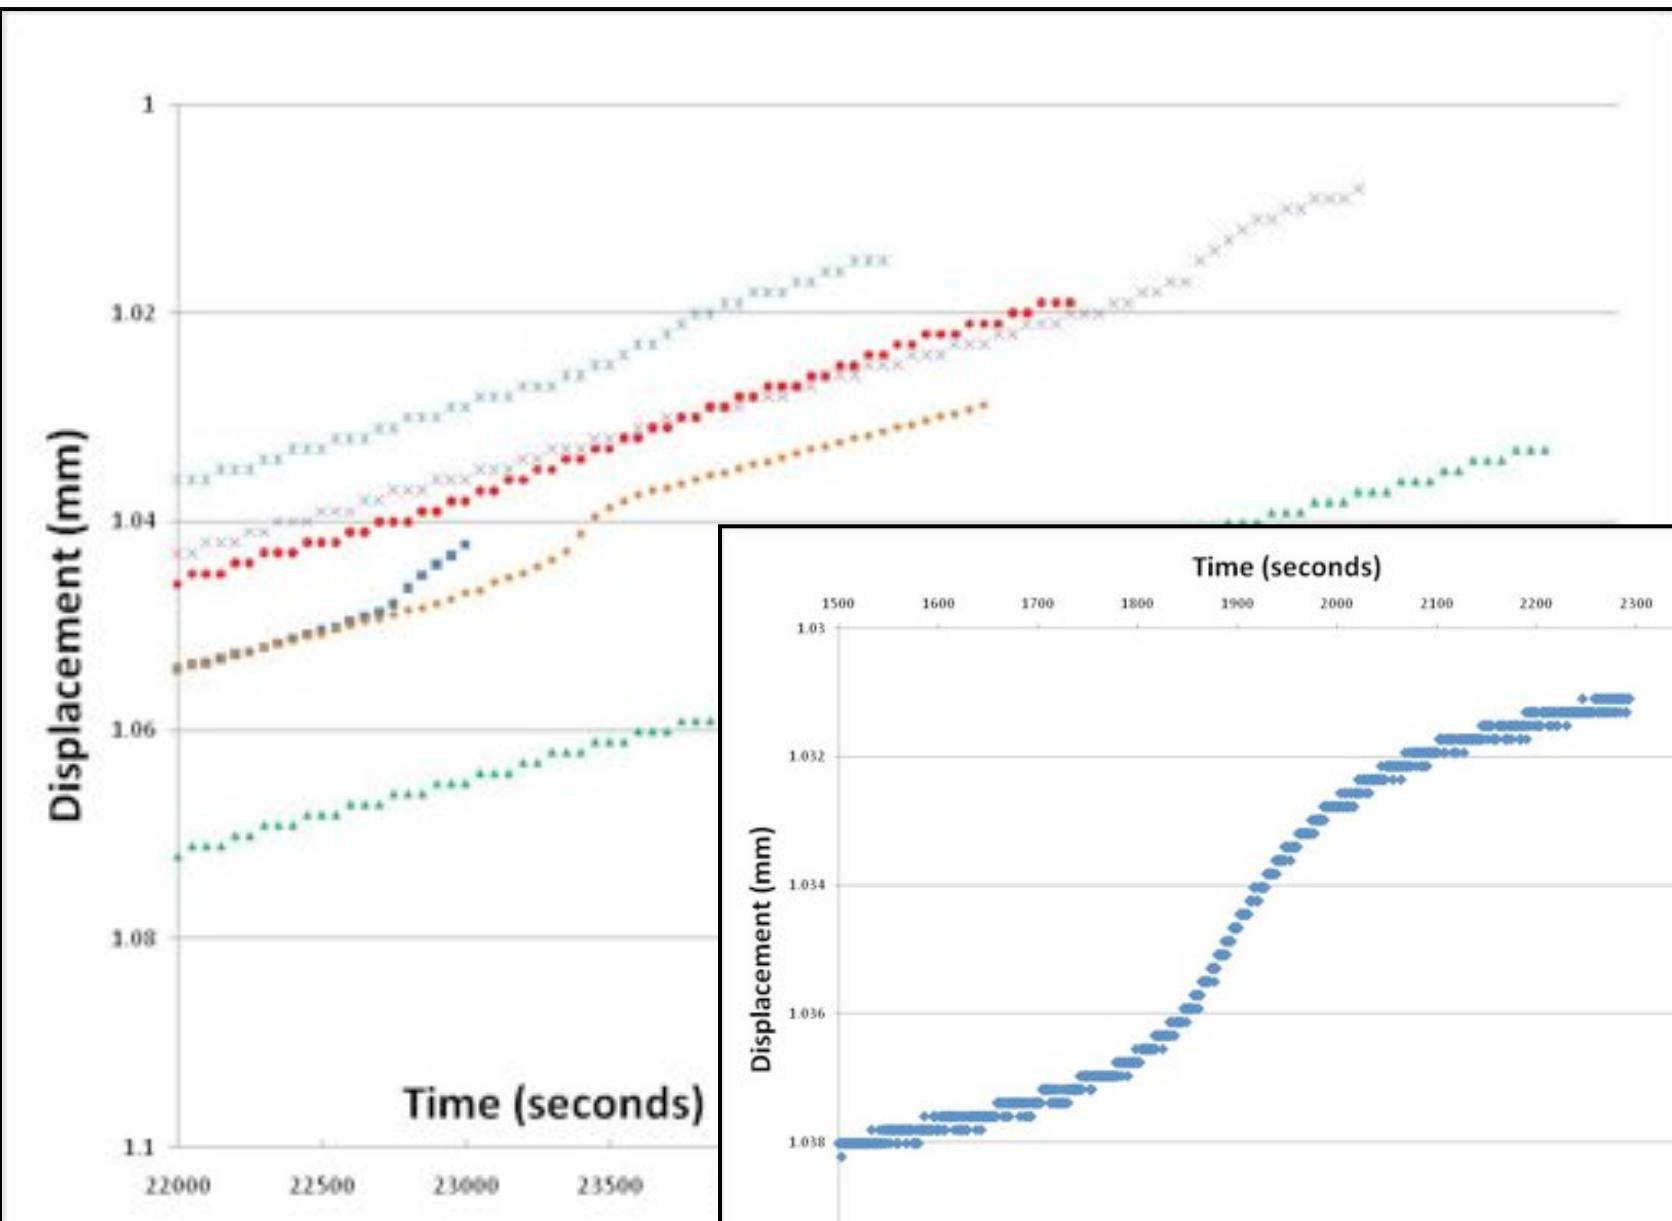

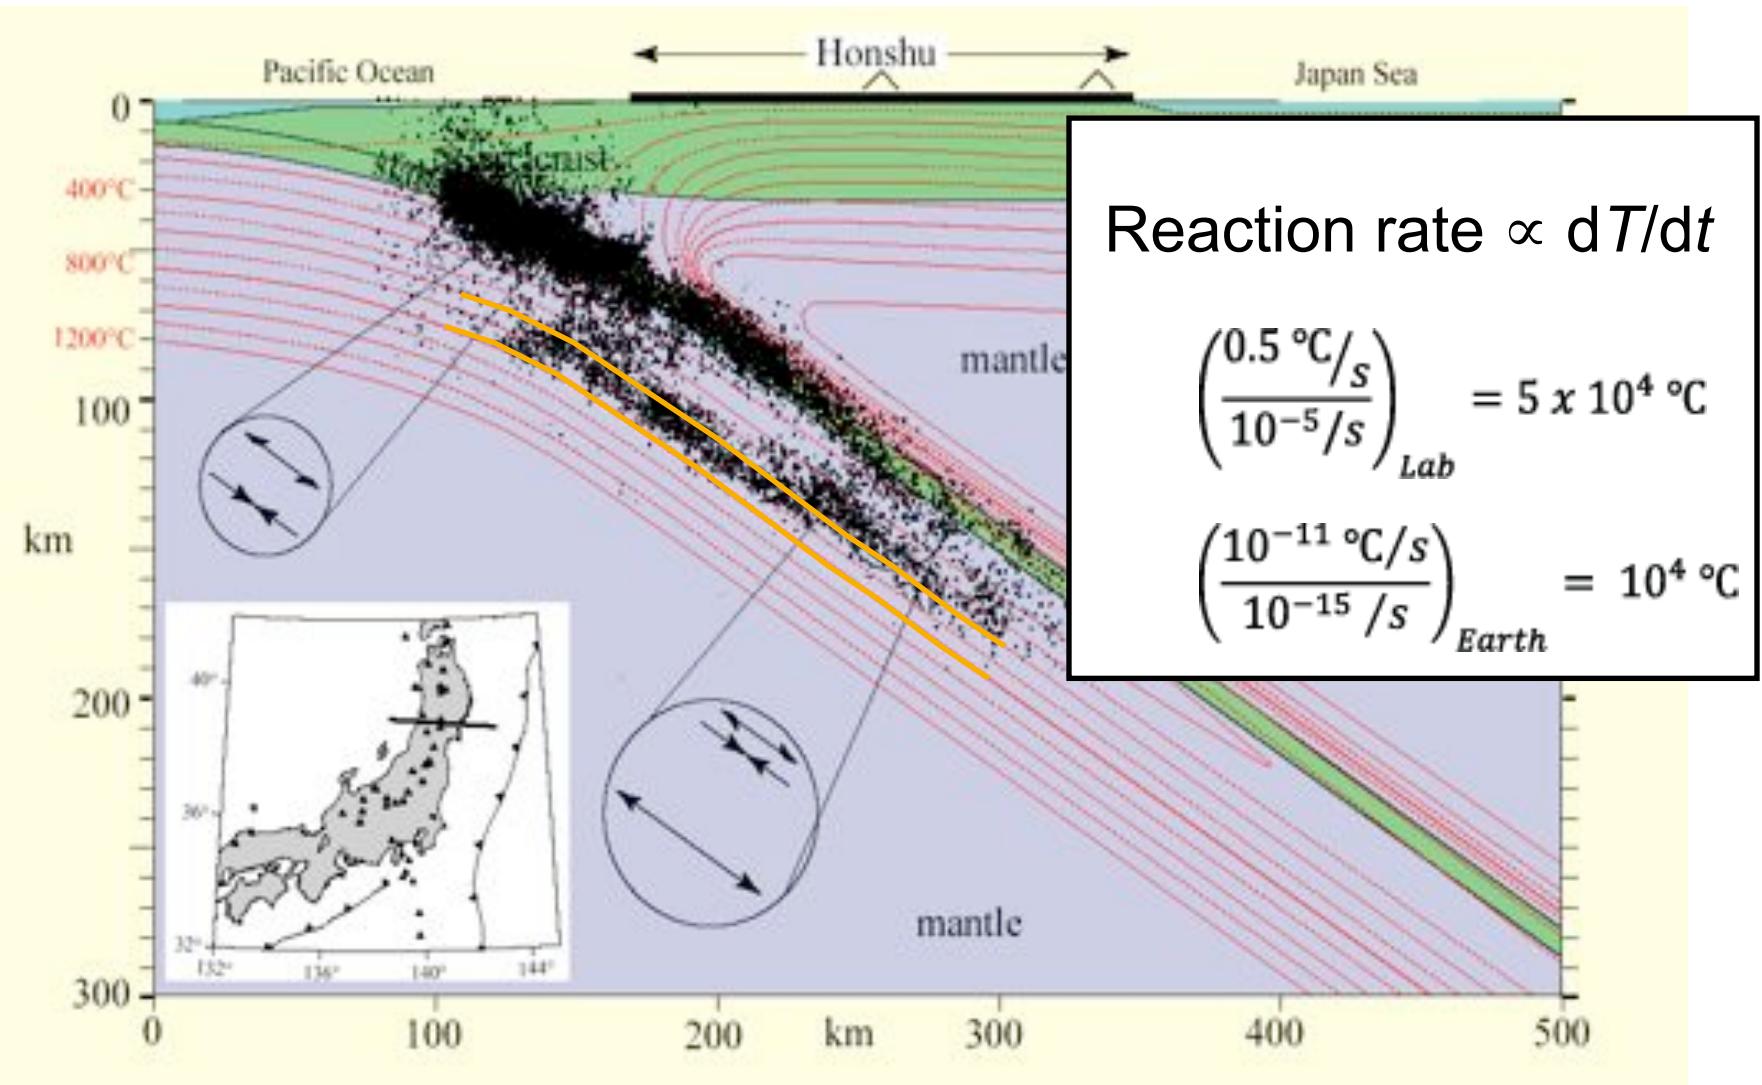

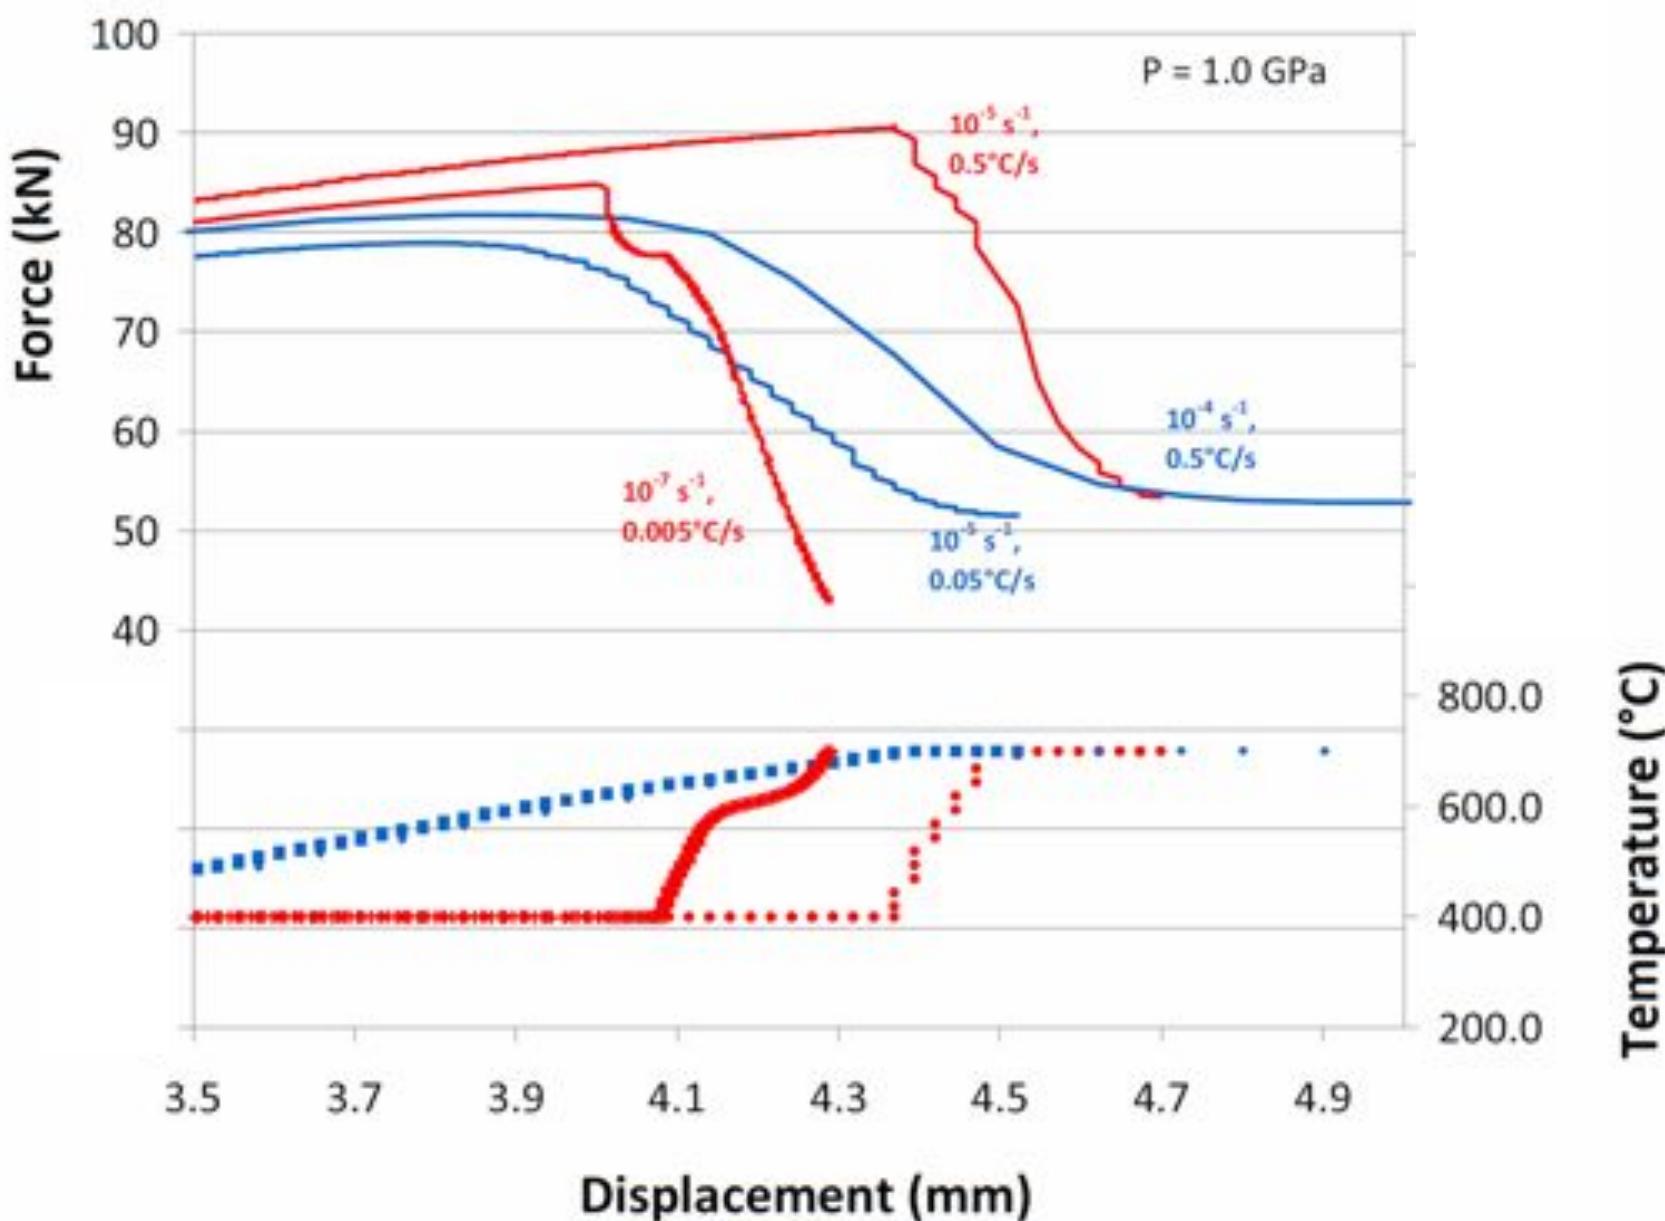

Undrained pore fluid
Localized before reaction
Large “elastic strain”

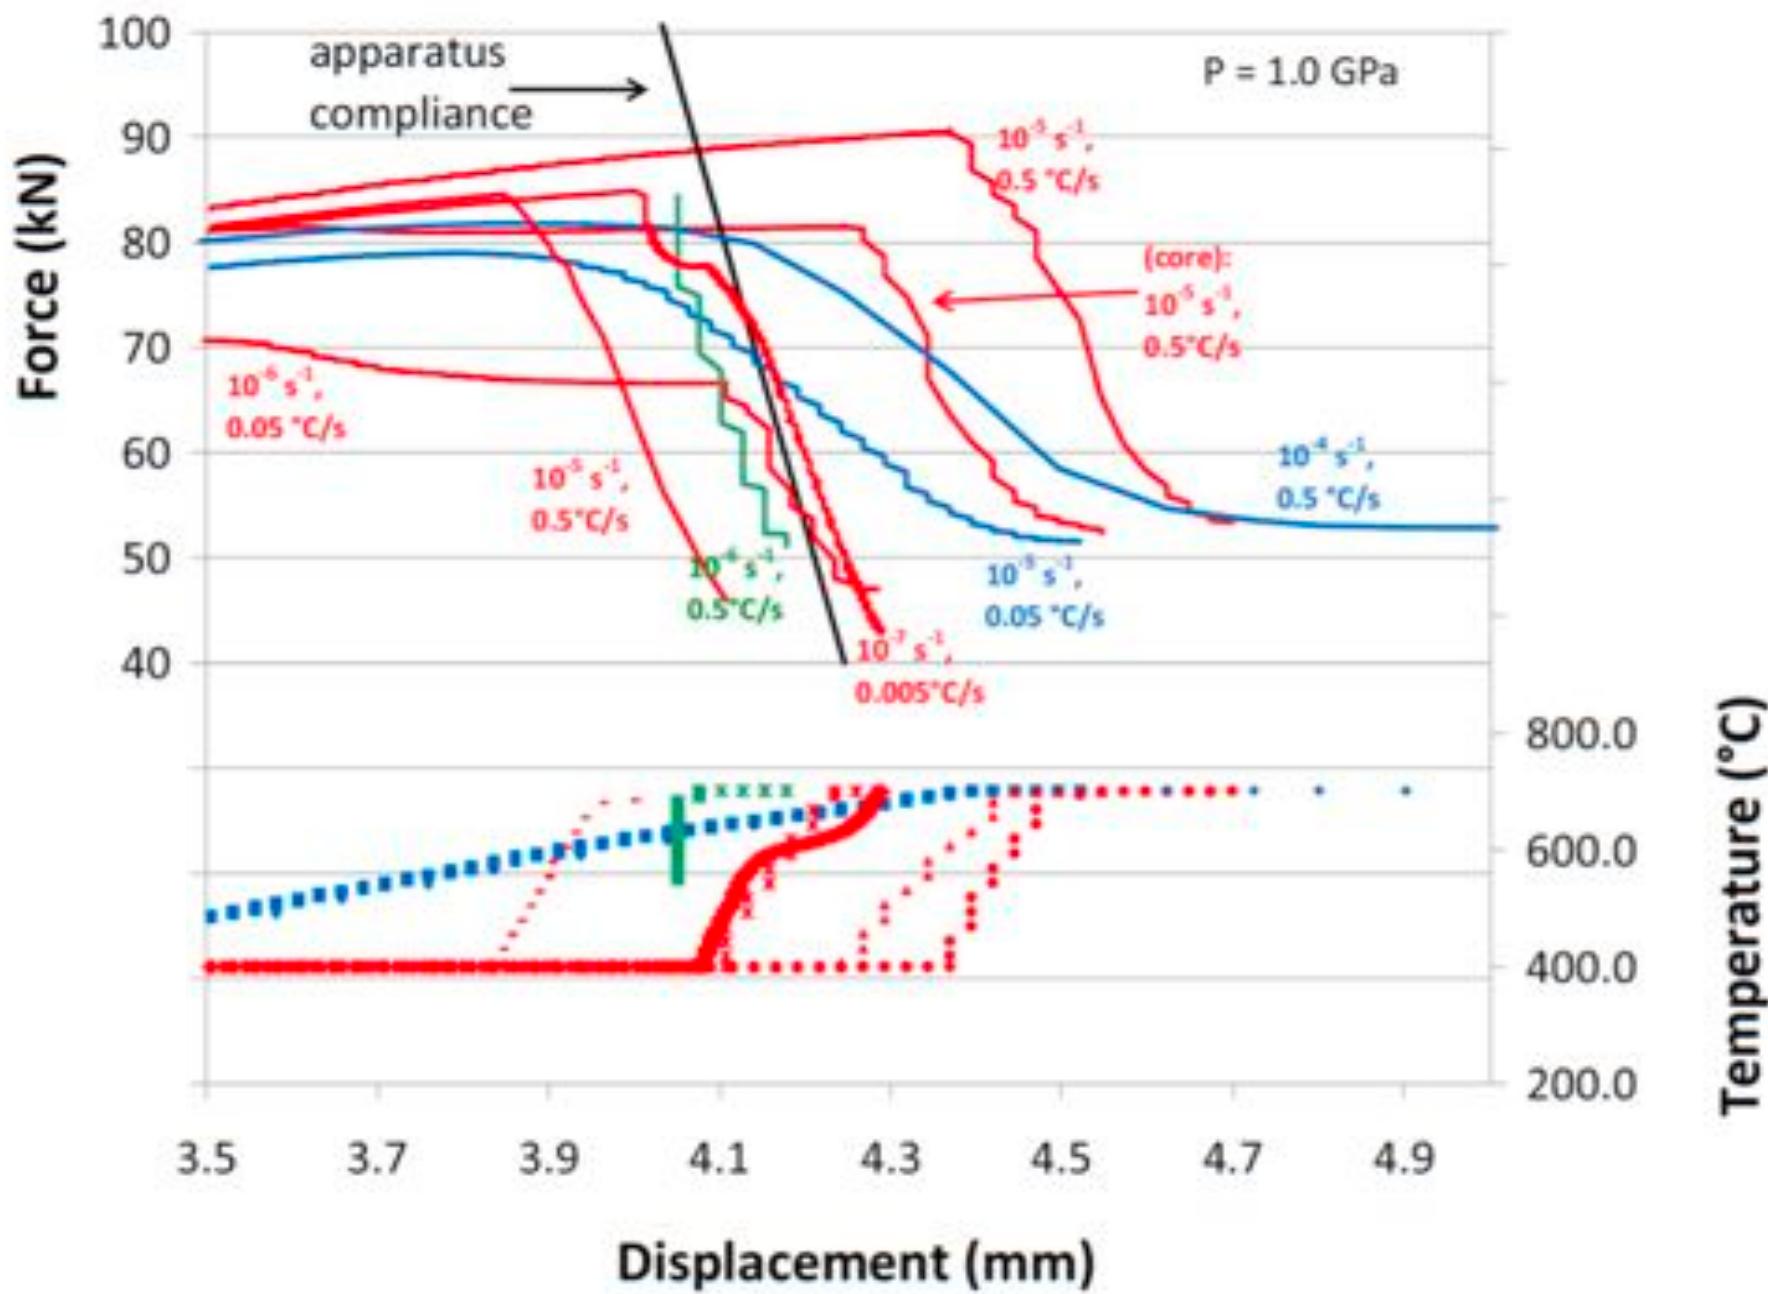

strain rate:
 10^{-5} s^{-1}
ramp rate:
 $1800 \text{ }^{\circ}\text{C/hr}$

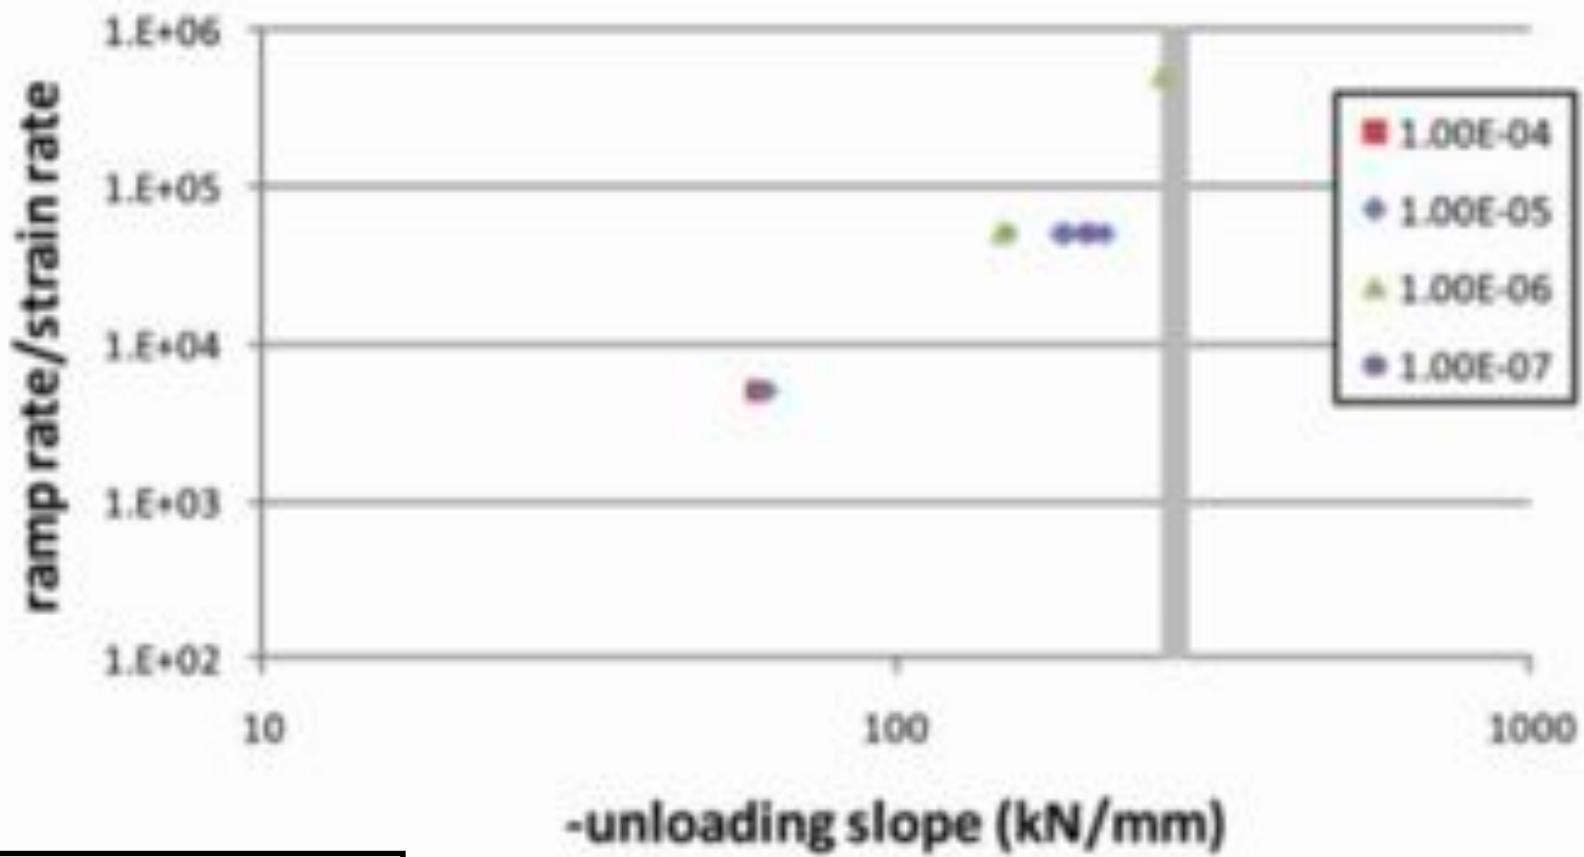

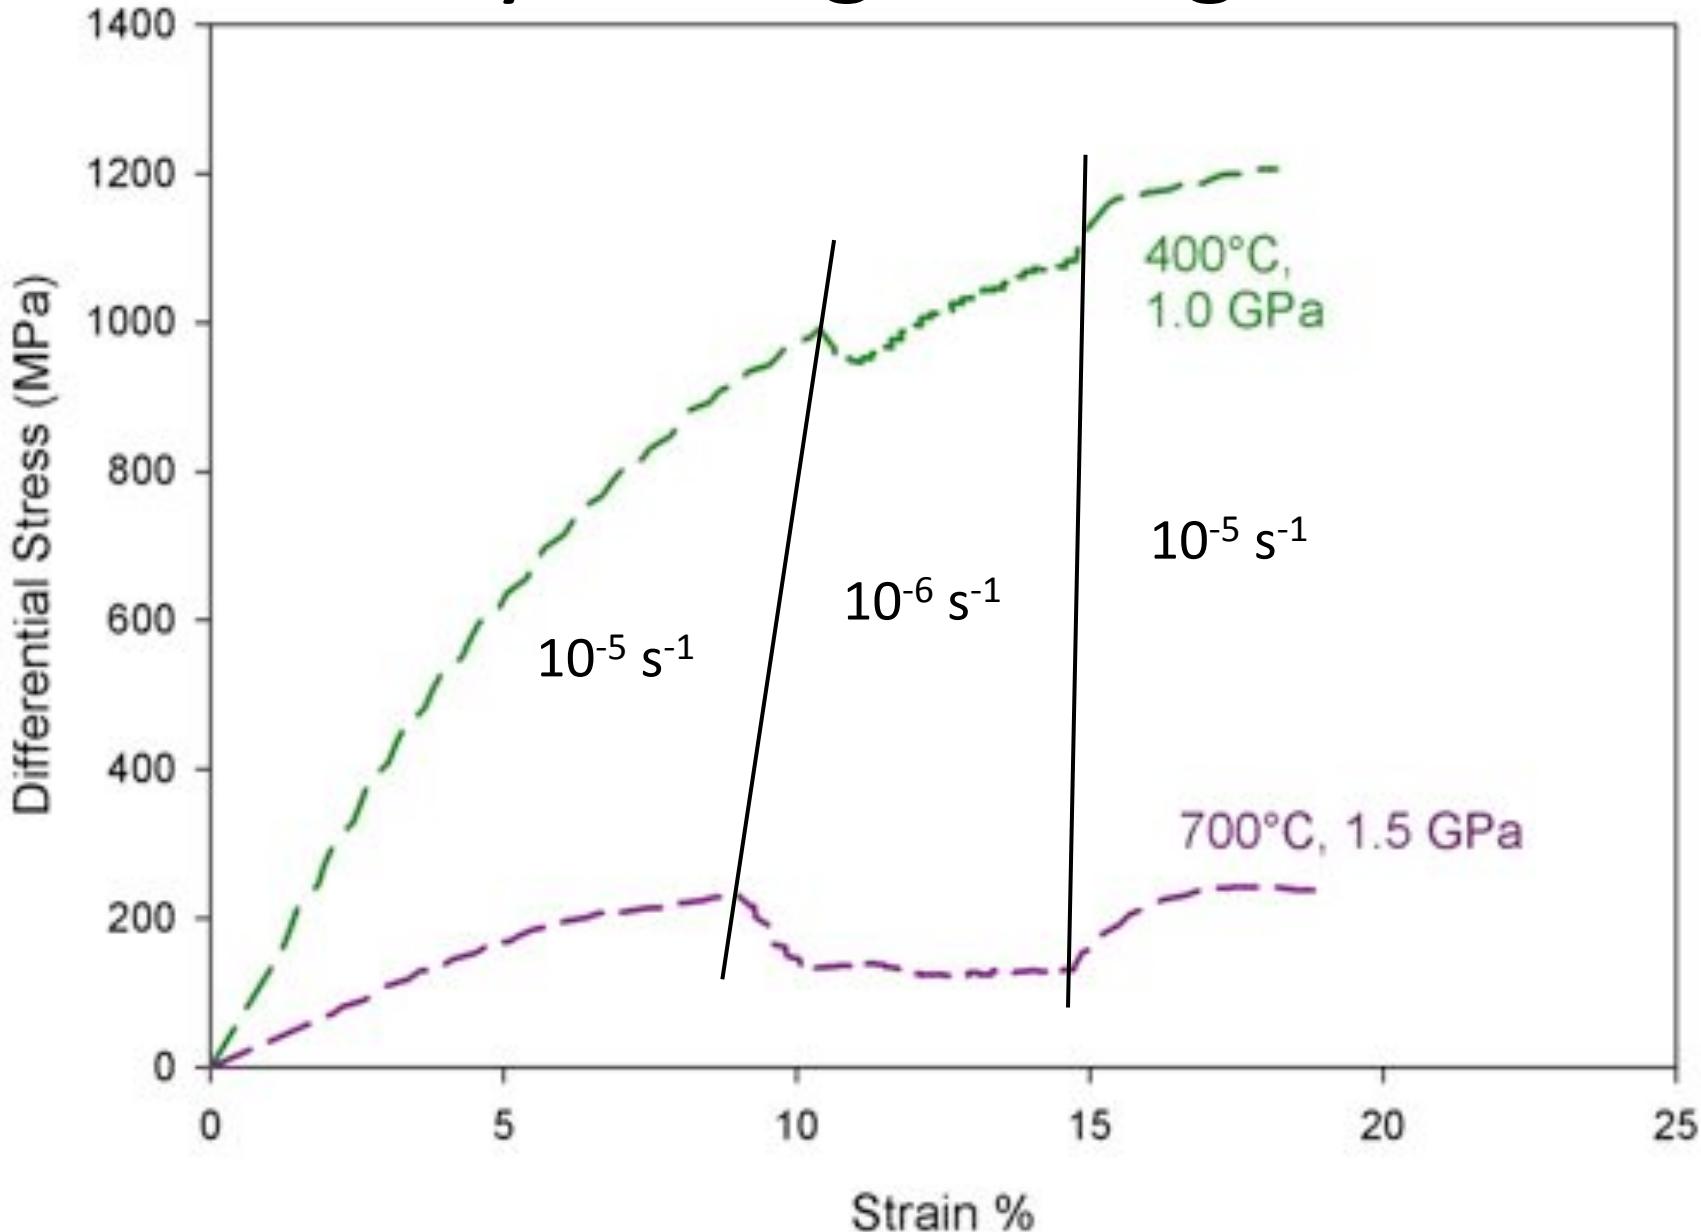

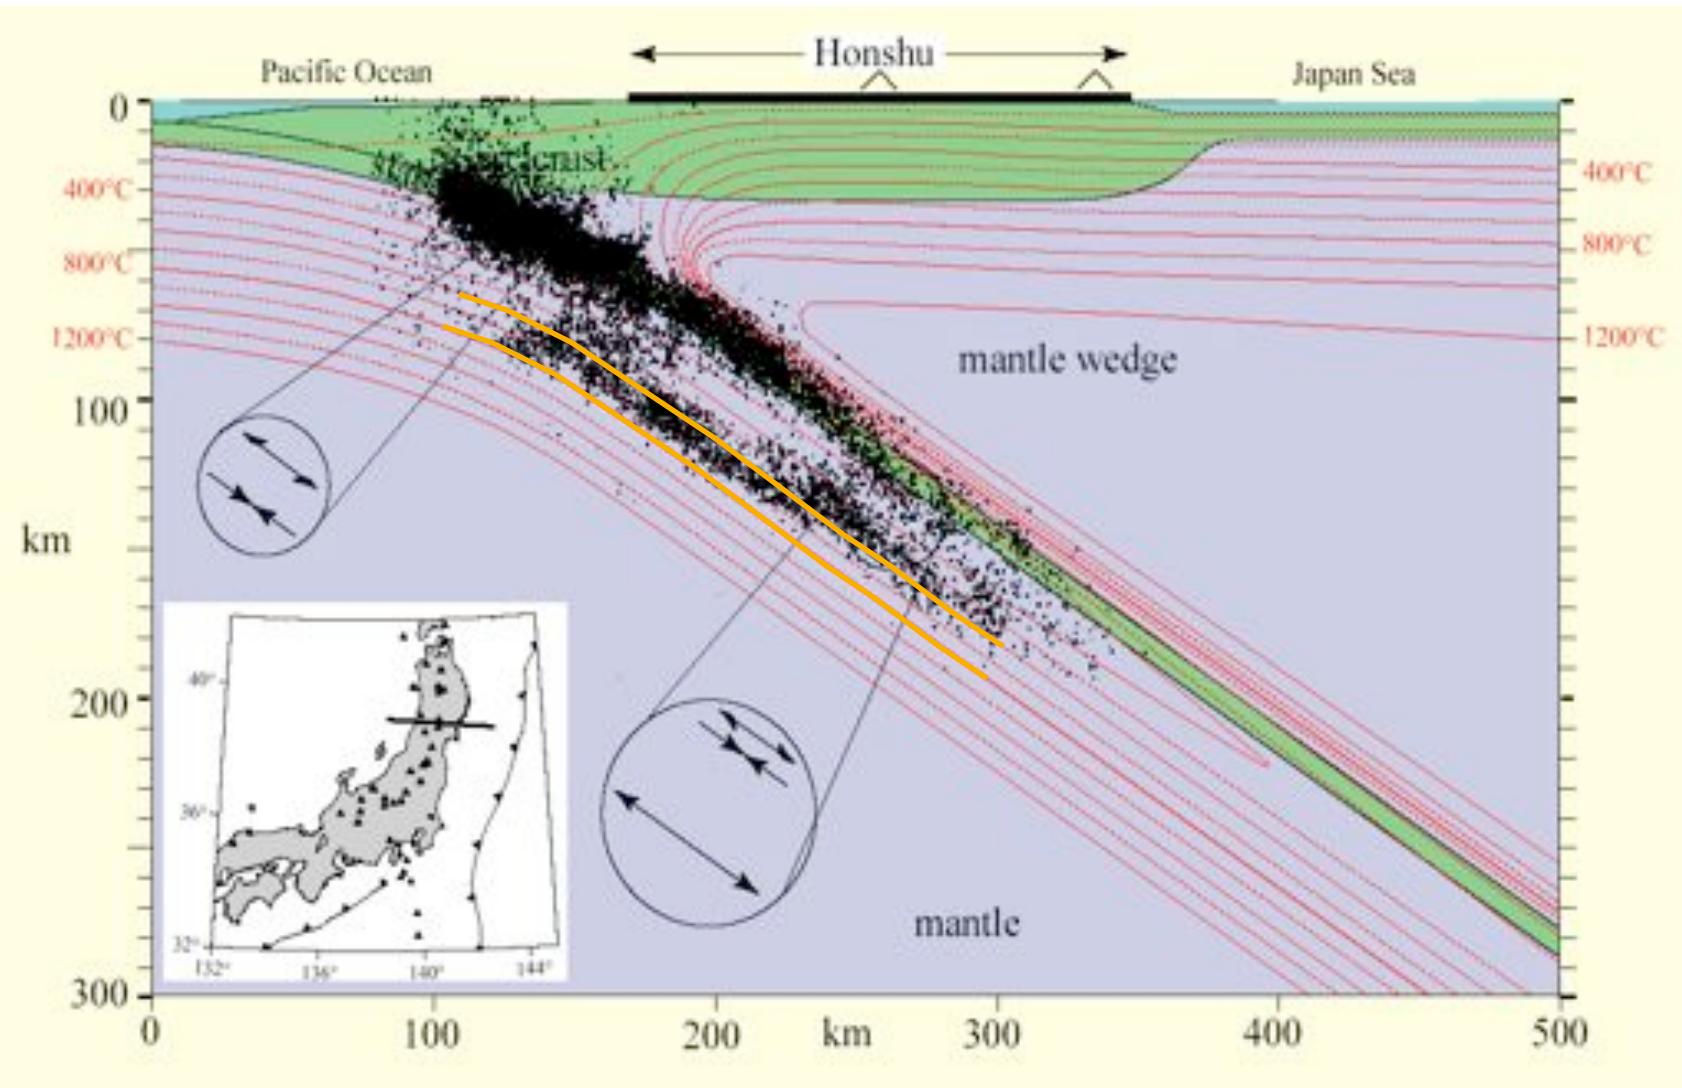

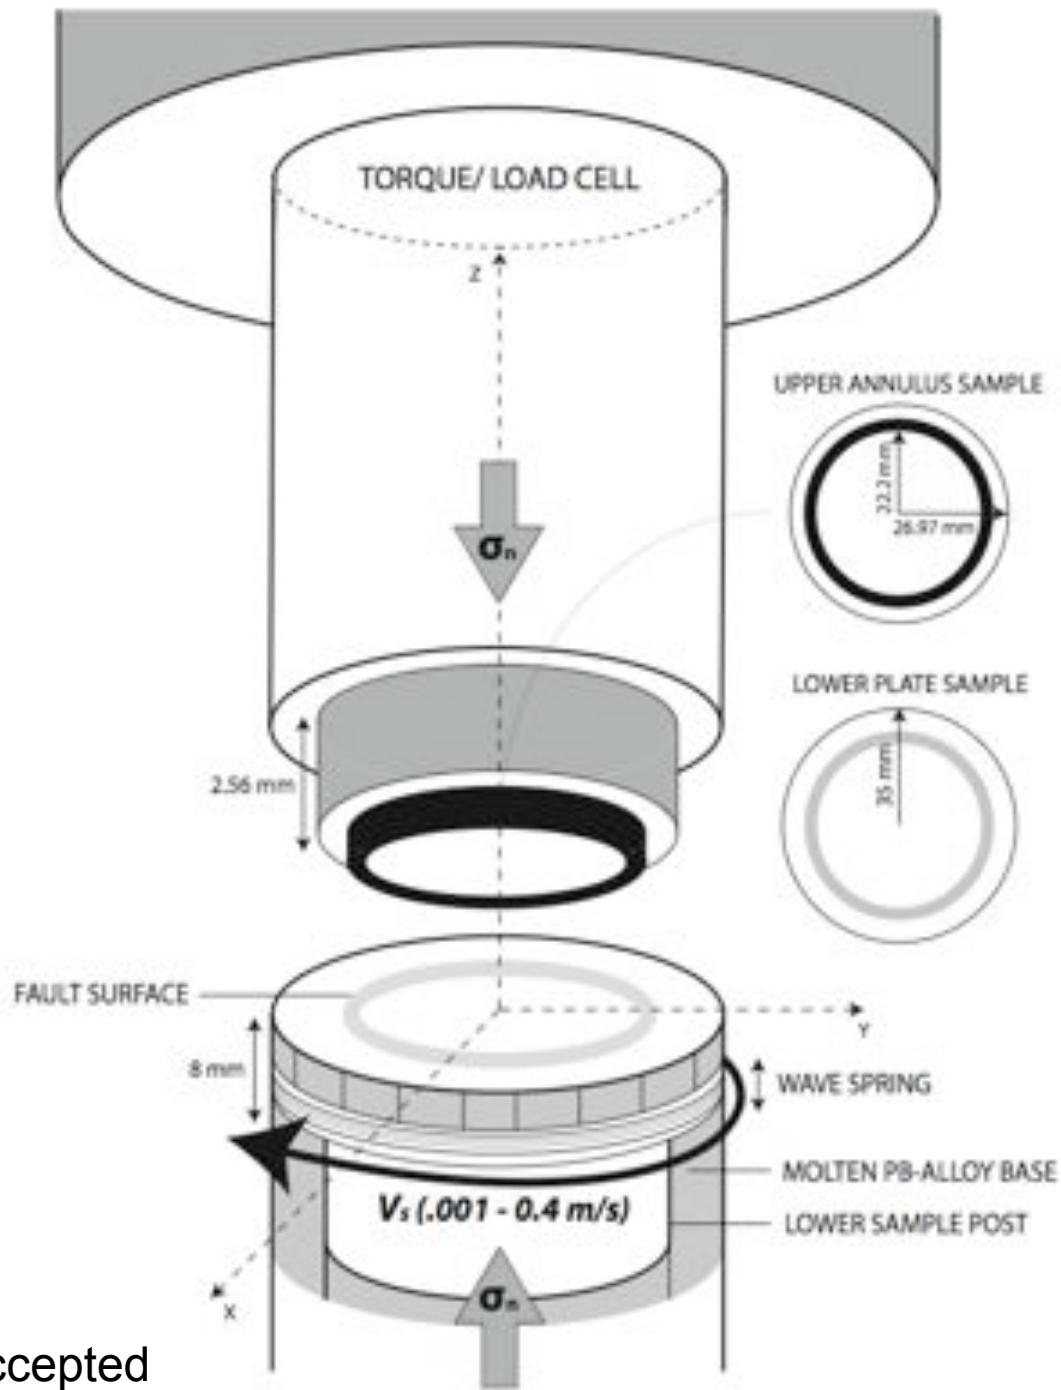

$$\left(\frac{0.5 \text{ } ^\circ\text{C}/\text{s}}{10^{-5}/\text{s}} \right)_{Lab} = 5 \times 10^4 \text{ } ^\circ\text{C}$$

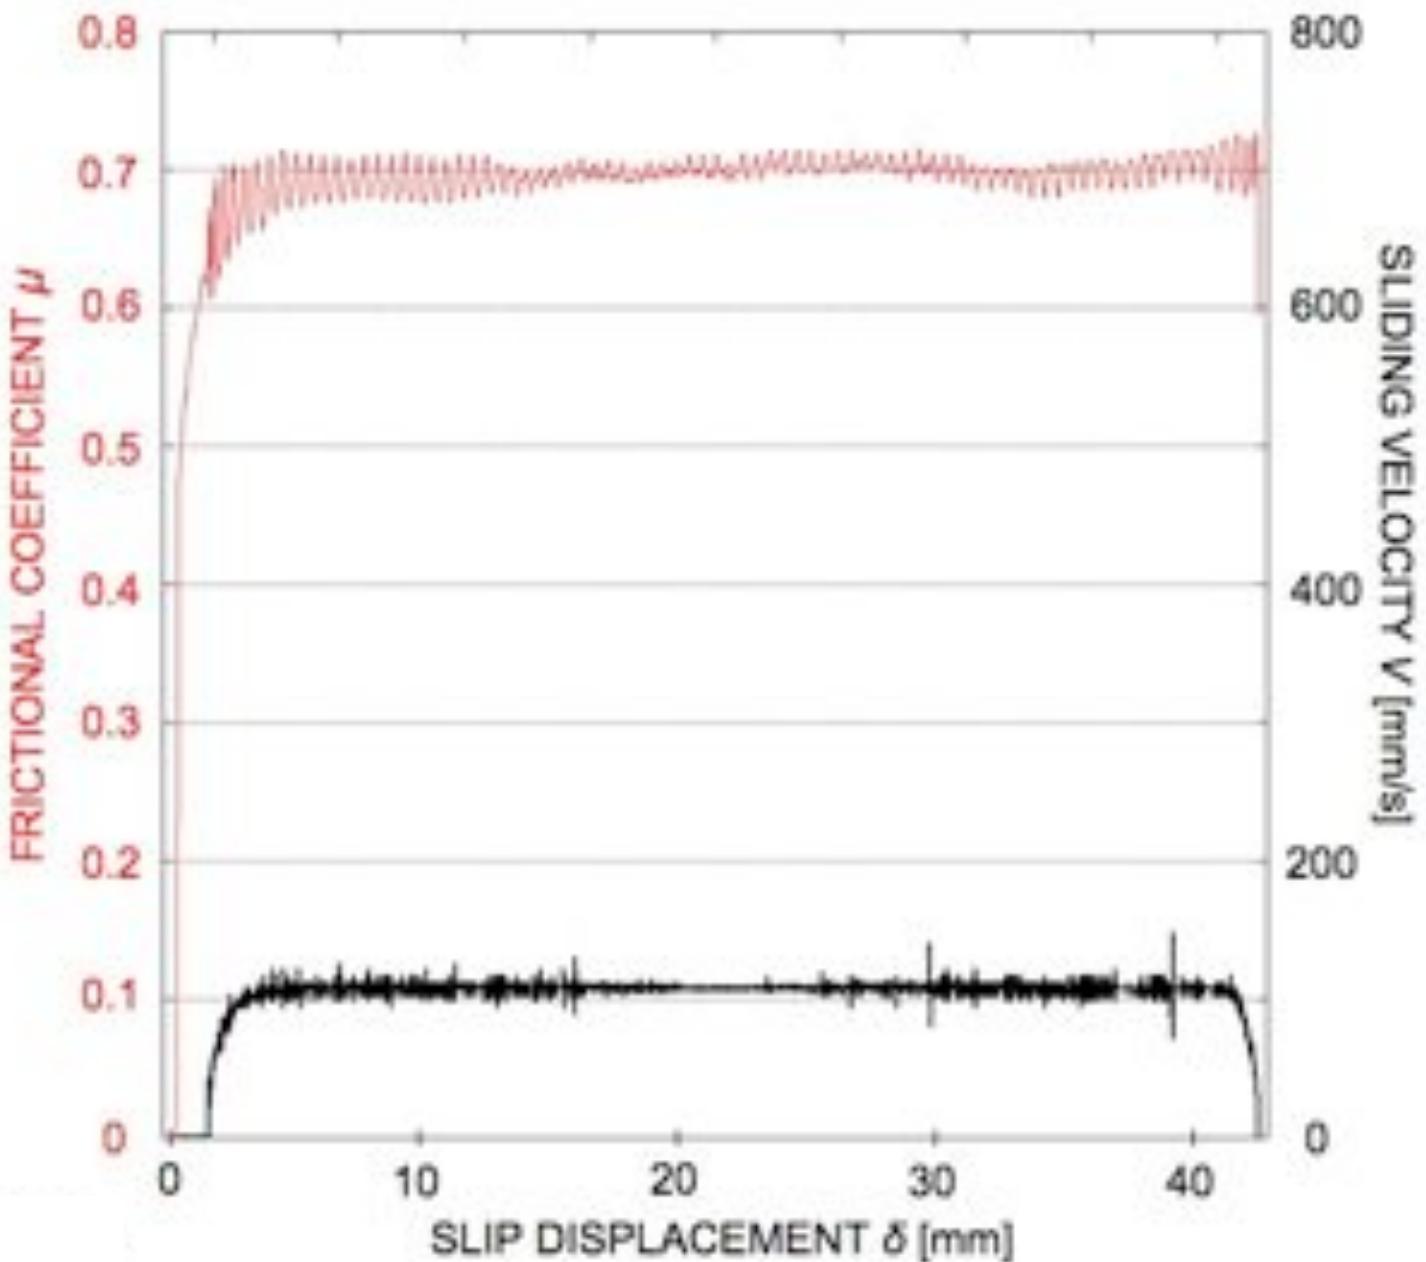

$$\left(\frac{10^{-11} \text{ } ^\circ\text{C}/\text{s}}{10^{-15}/\text{s}} \right)_{Earth} = 10^4 \text{ } ^\circ\text{C}$$

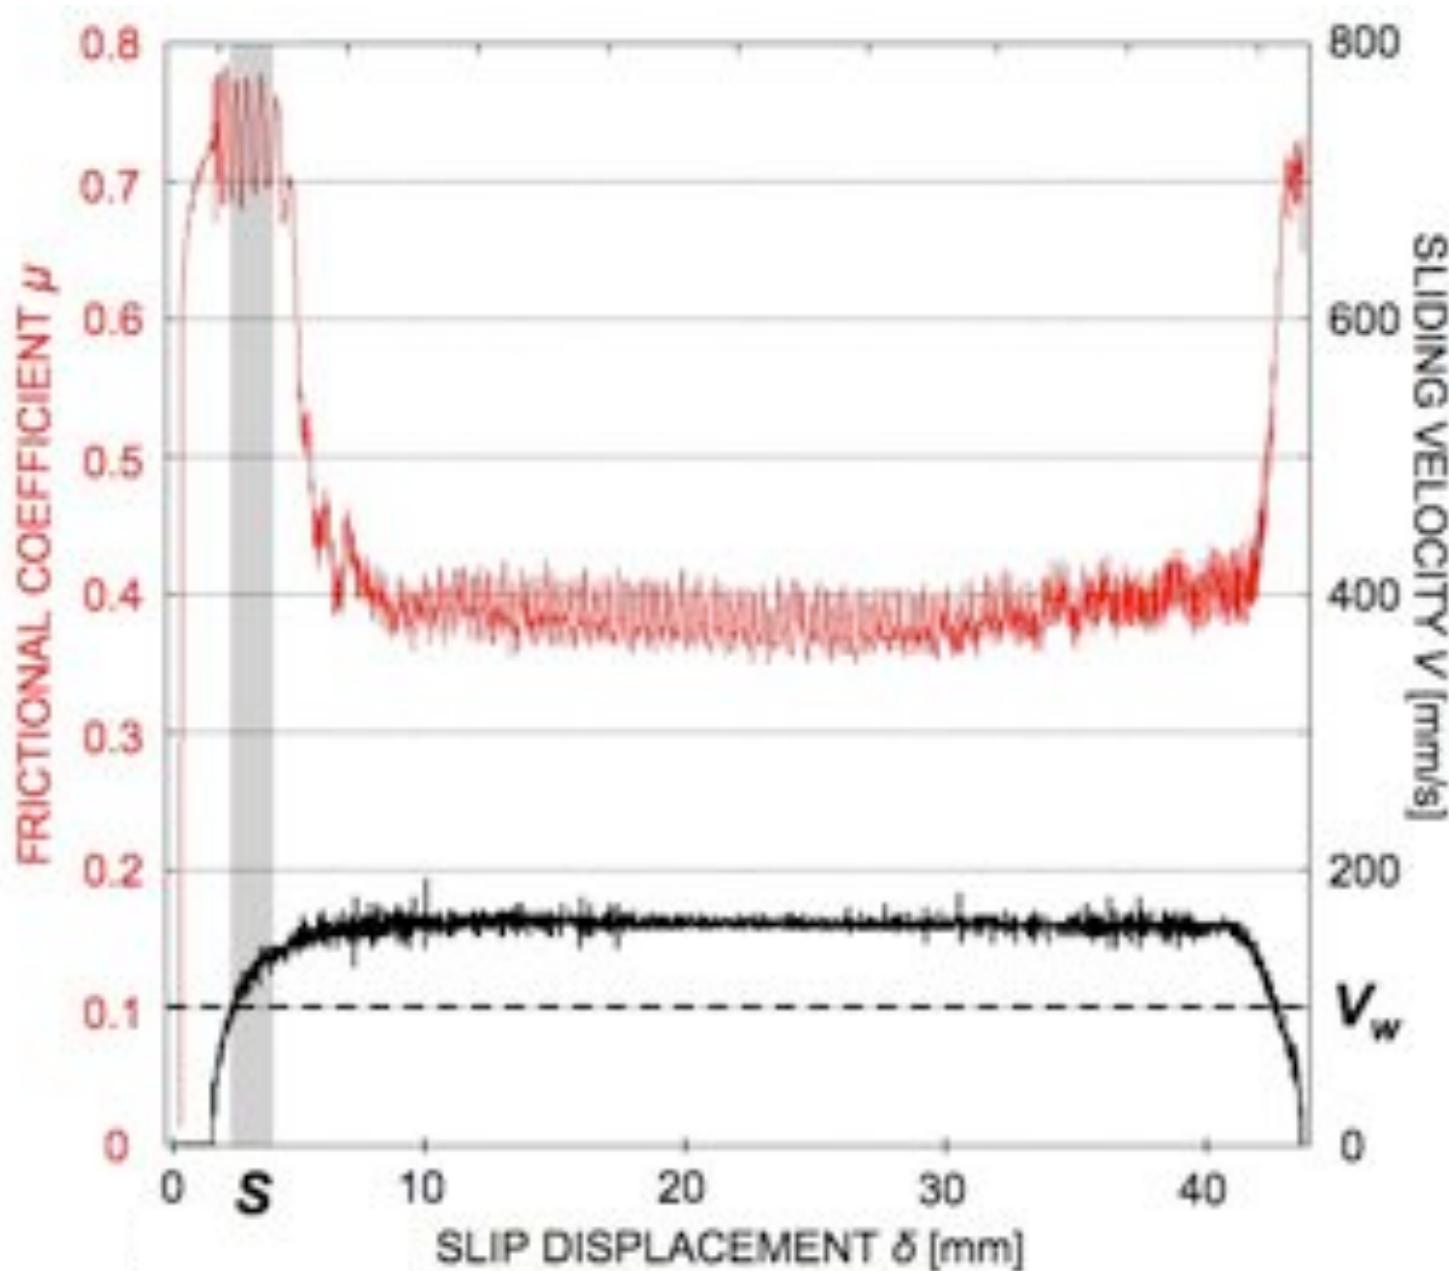

Velocity Strengthening Behavior

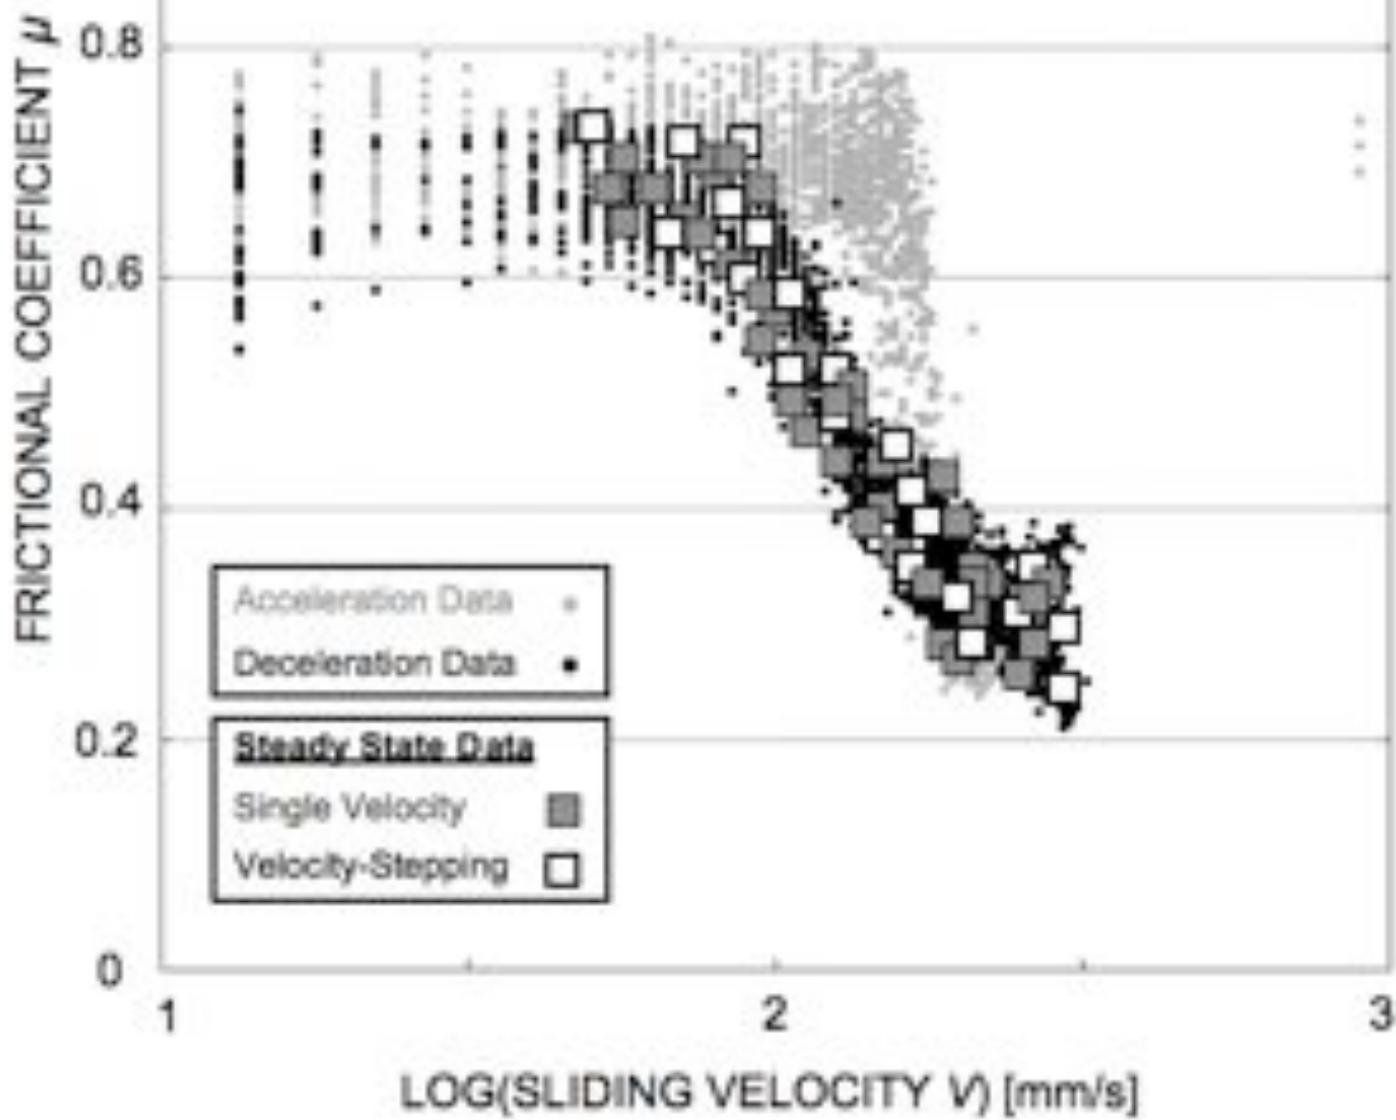

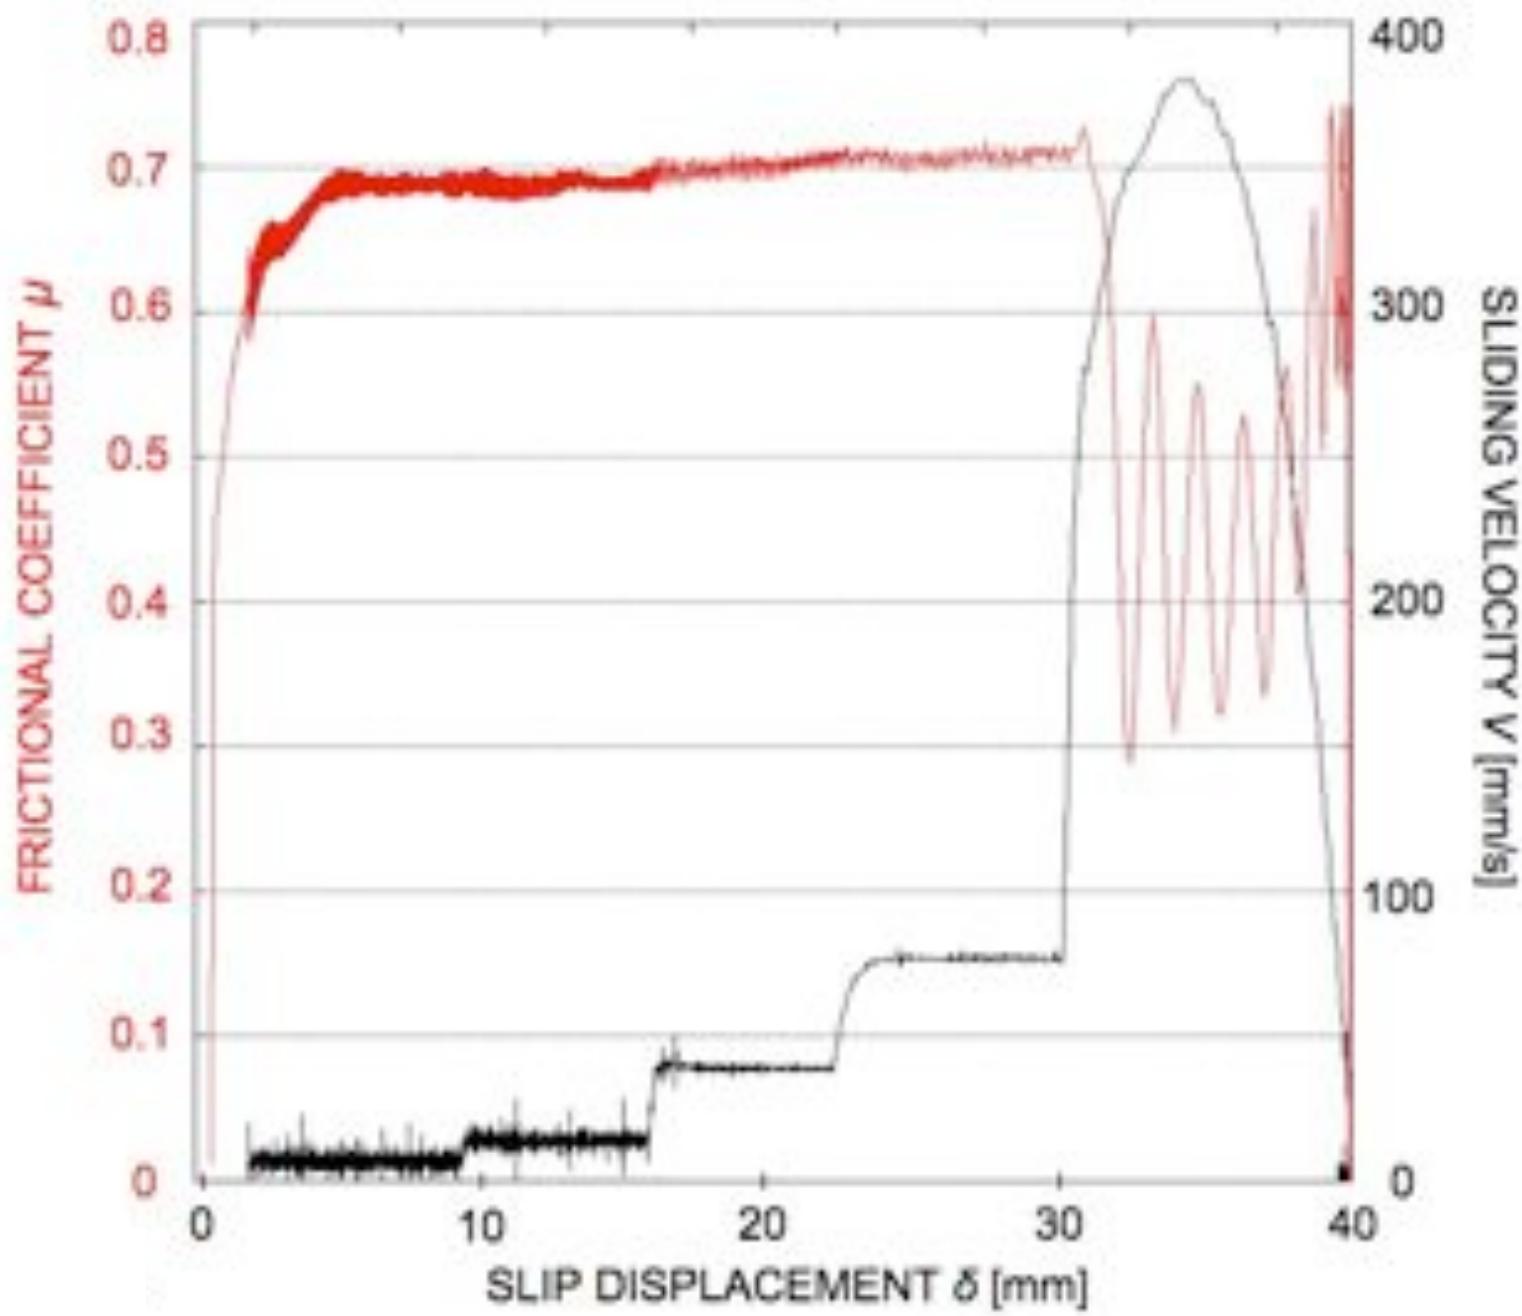

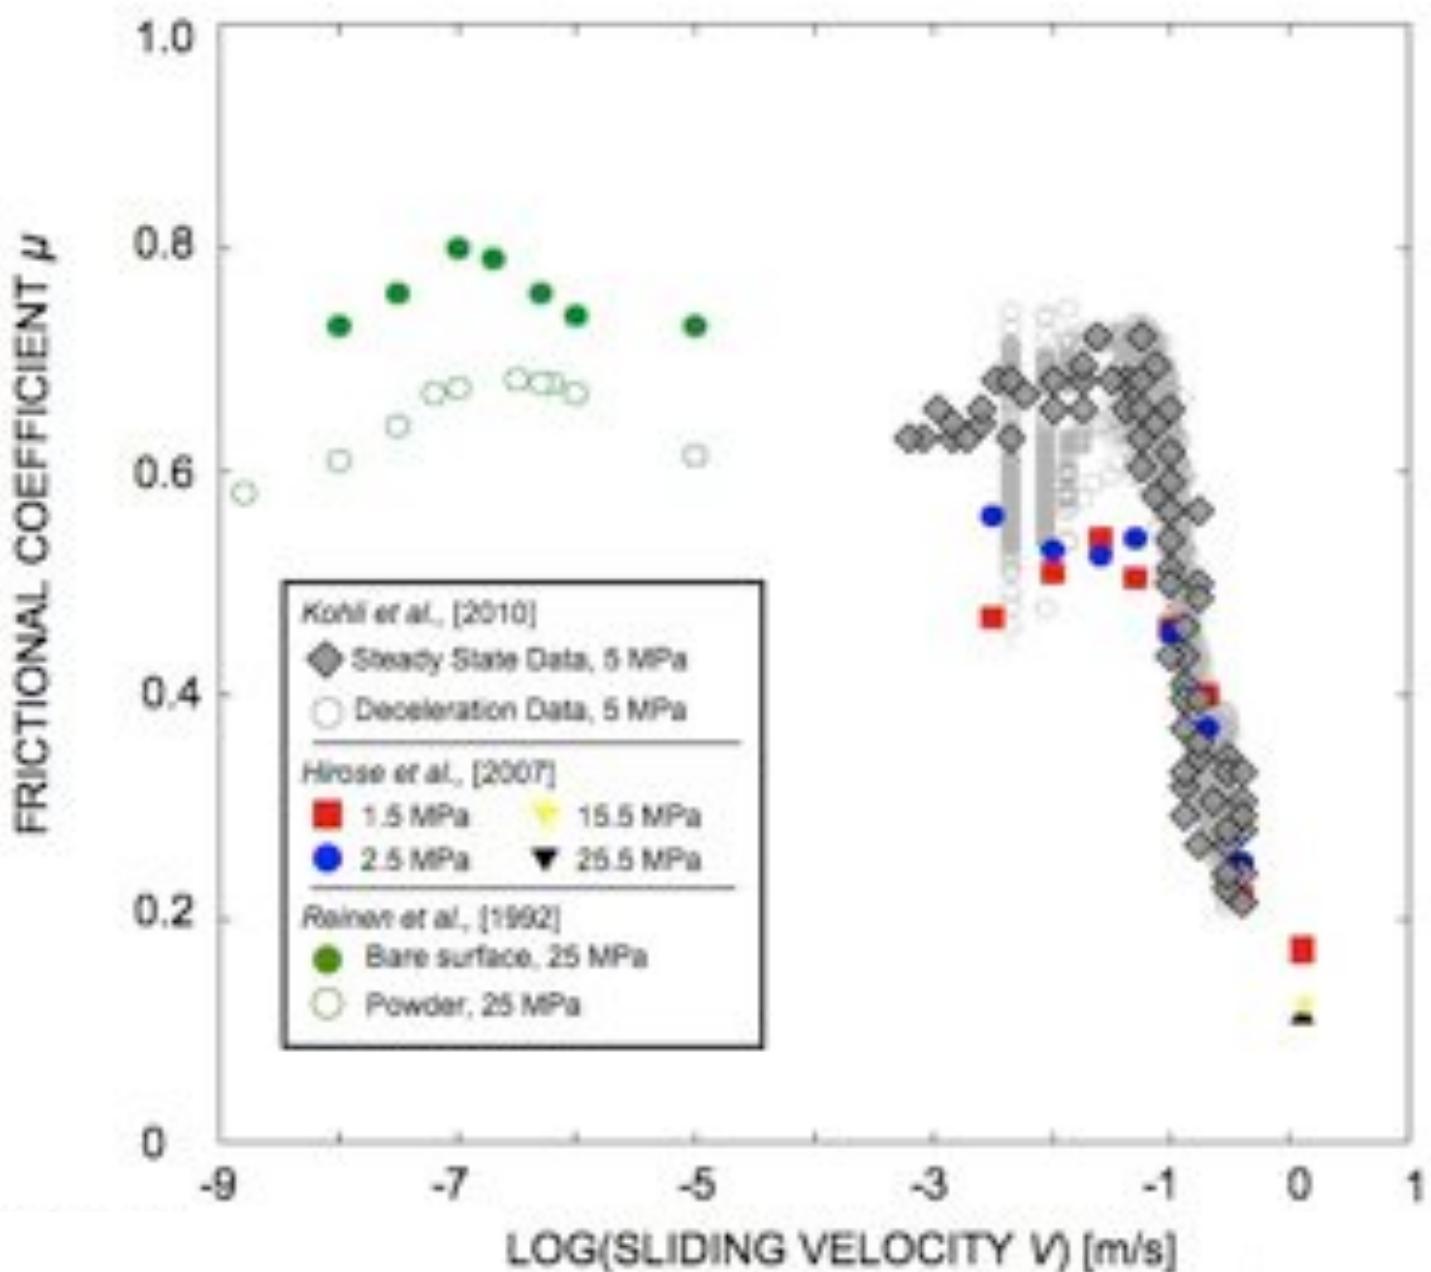

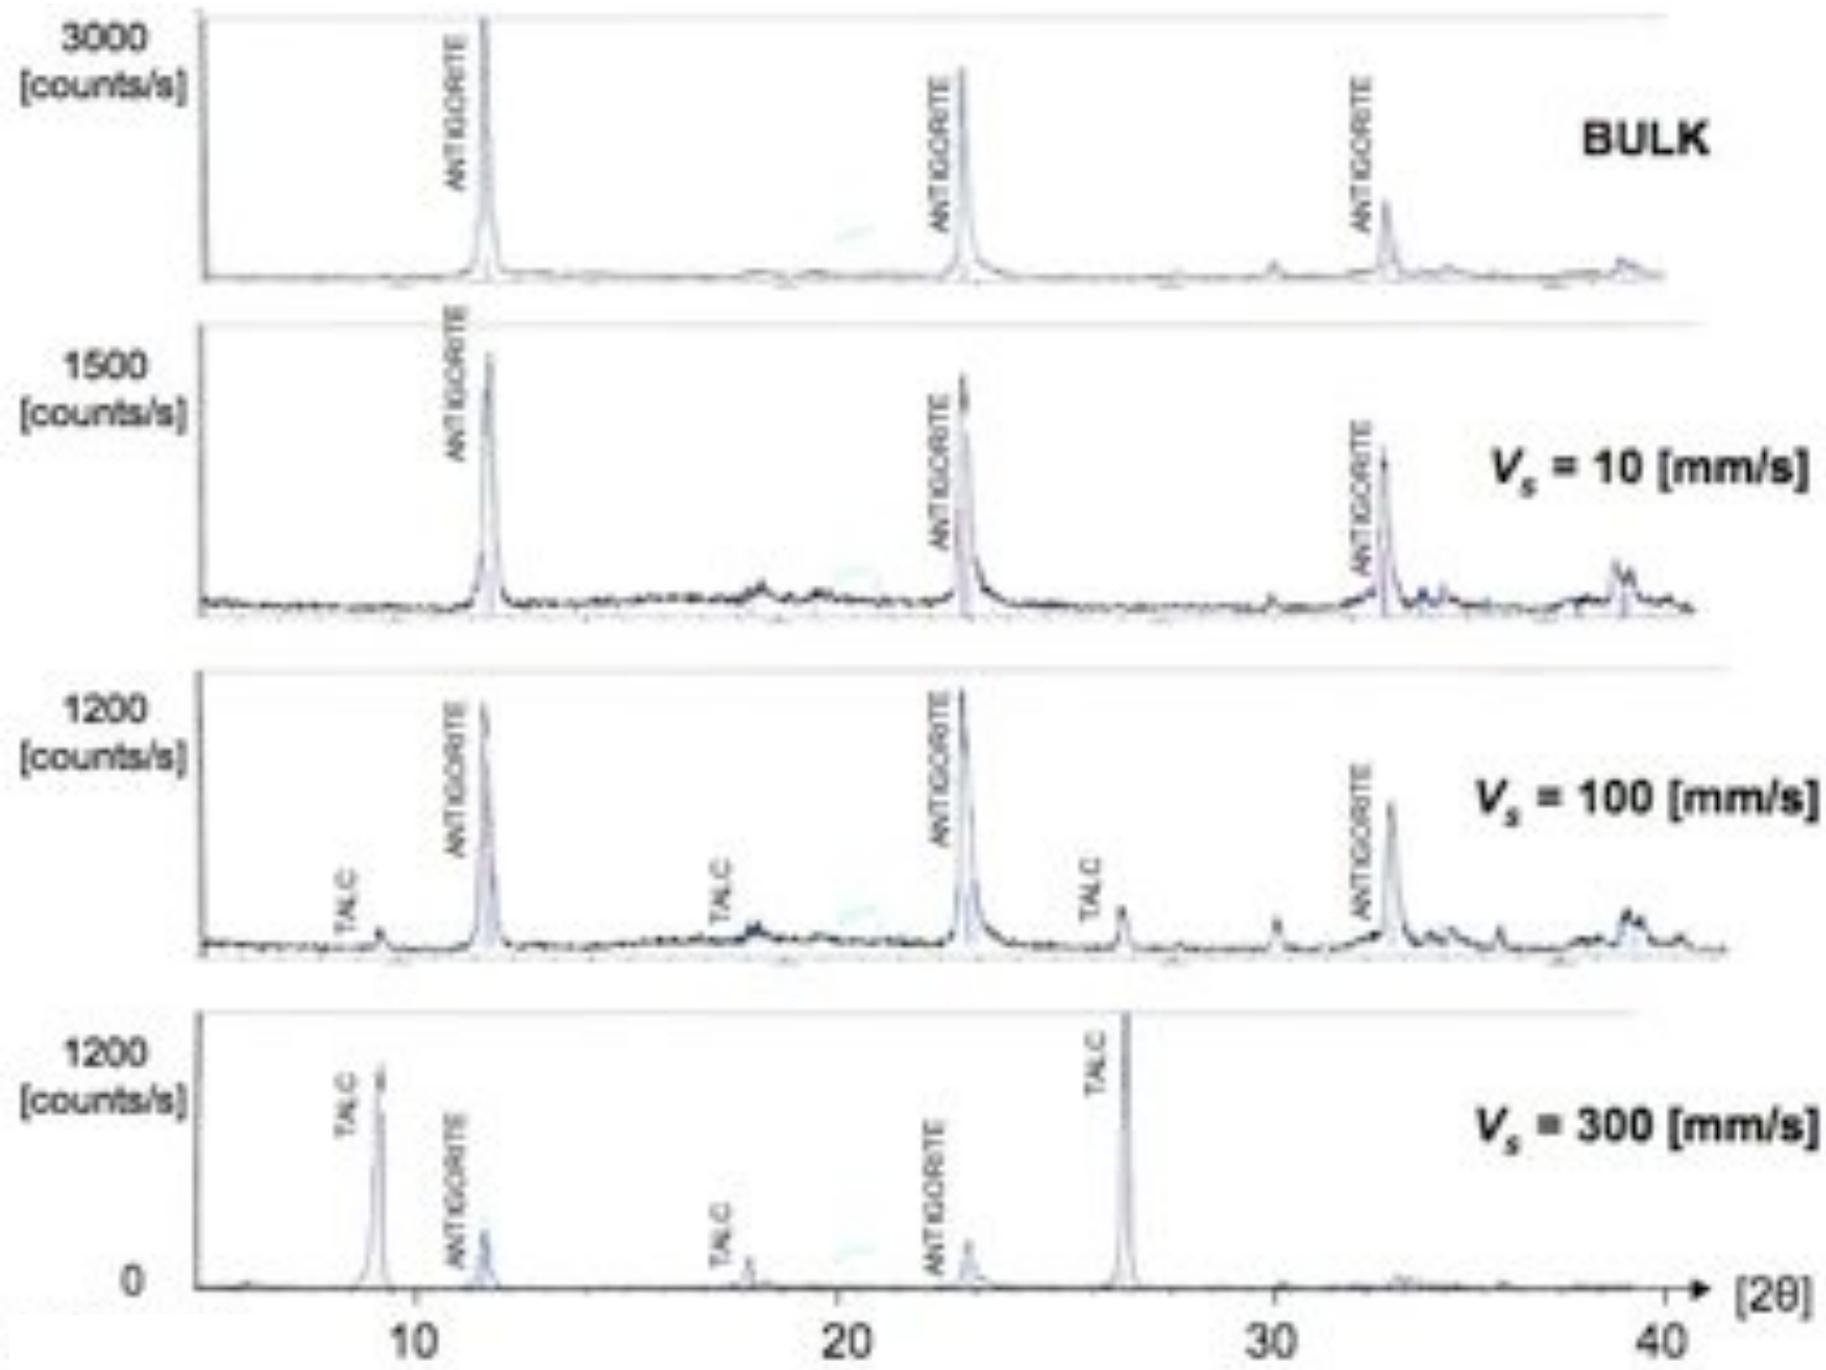

$$\mu(V) = \mu_w + (V_w/V)(\mu_0 - \mu_w) \text{ for } V > V_w$$

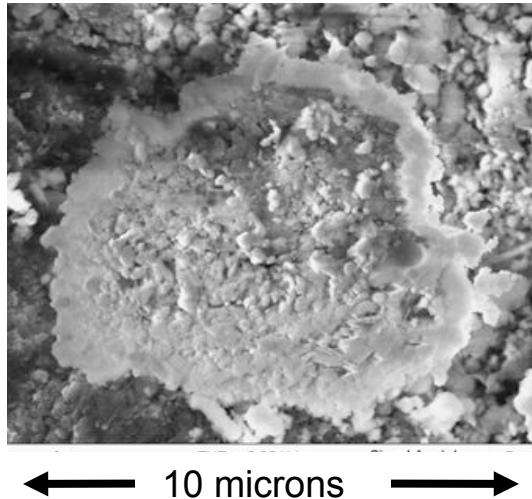

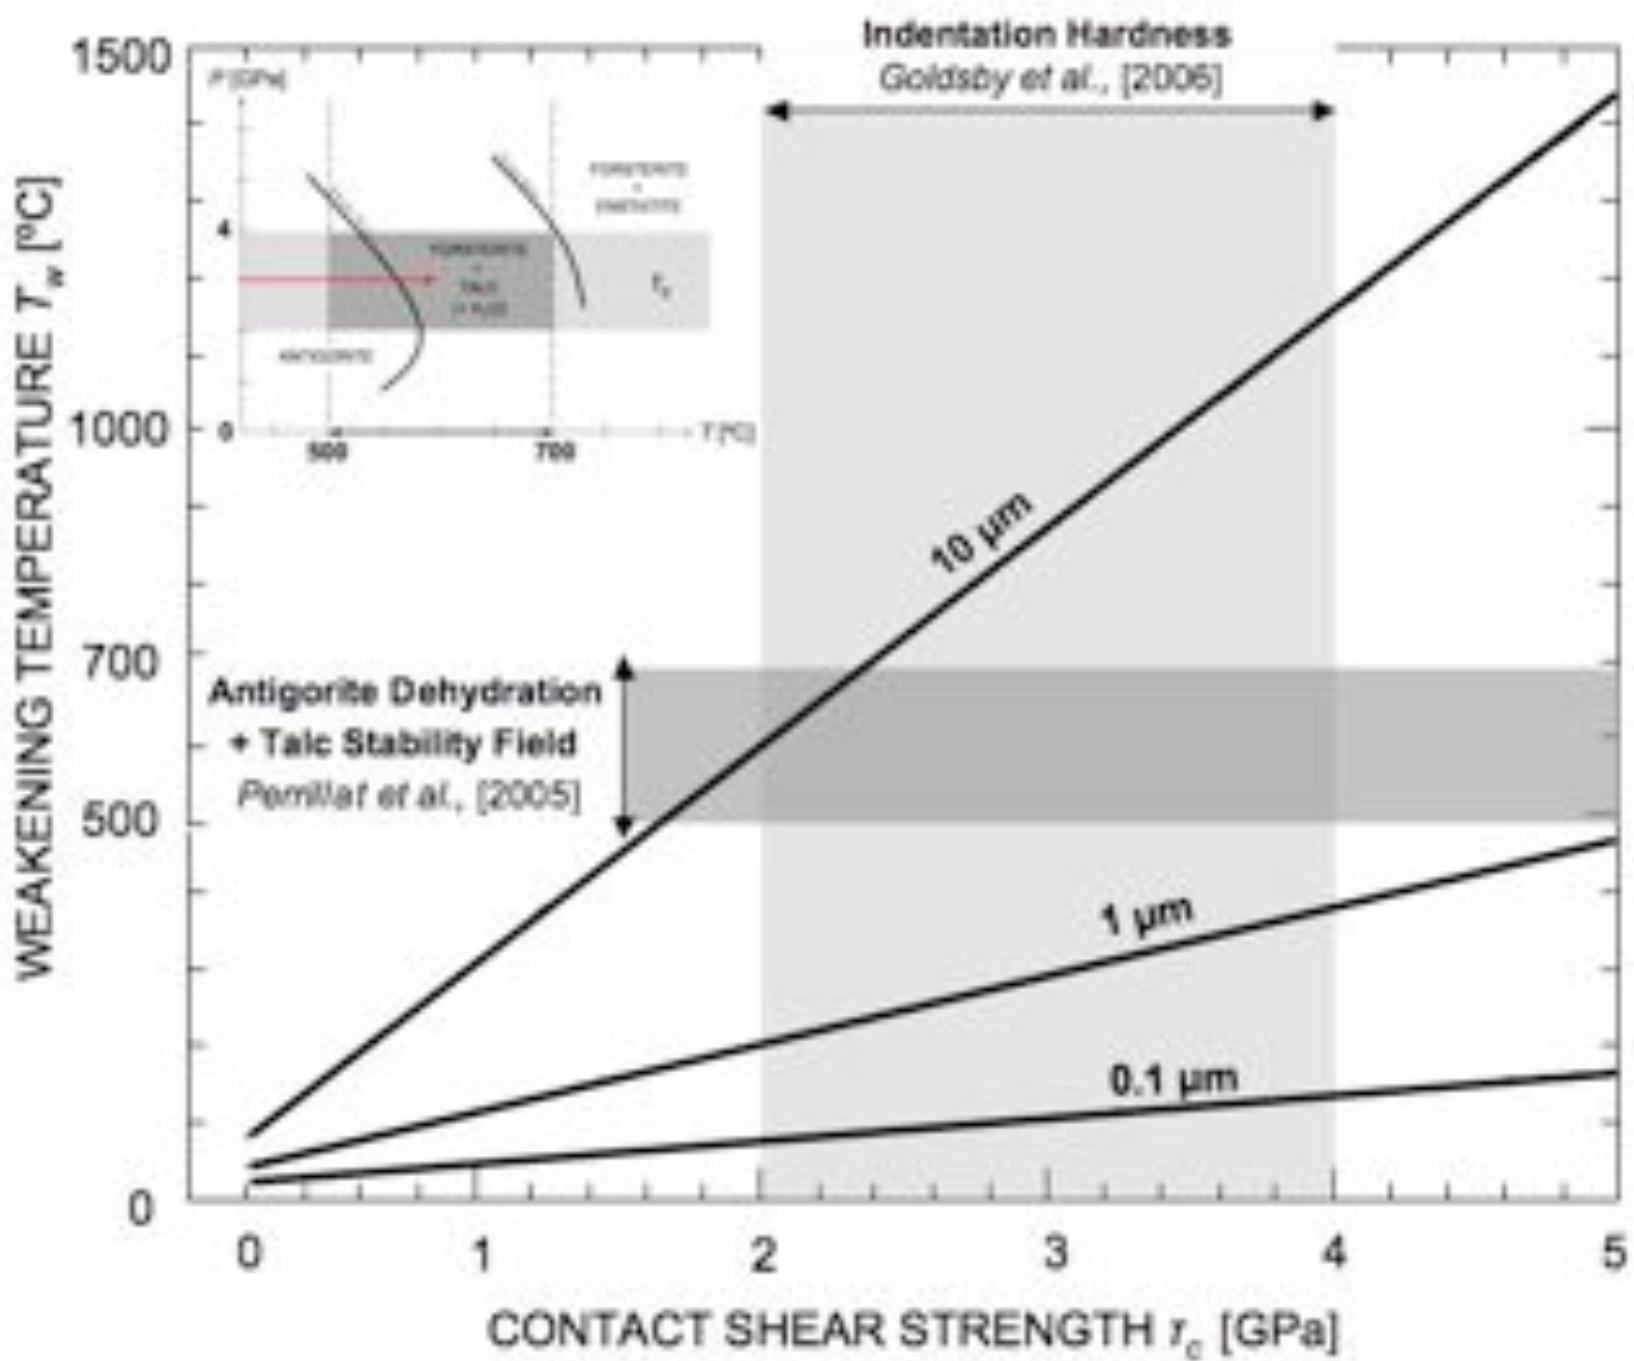

Flash Weakening at Asperities

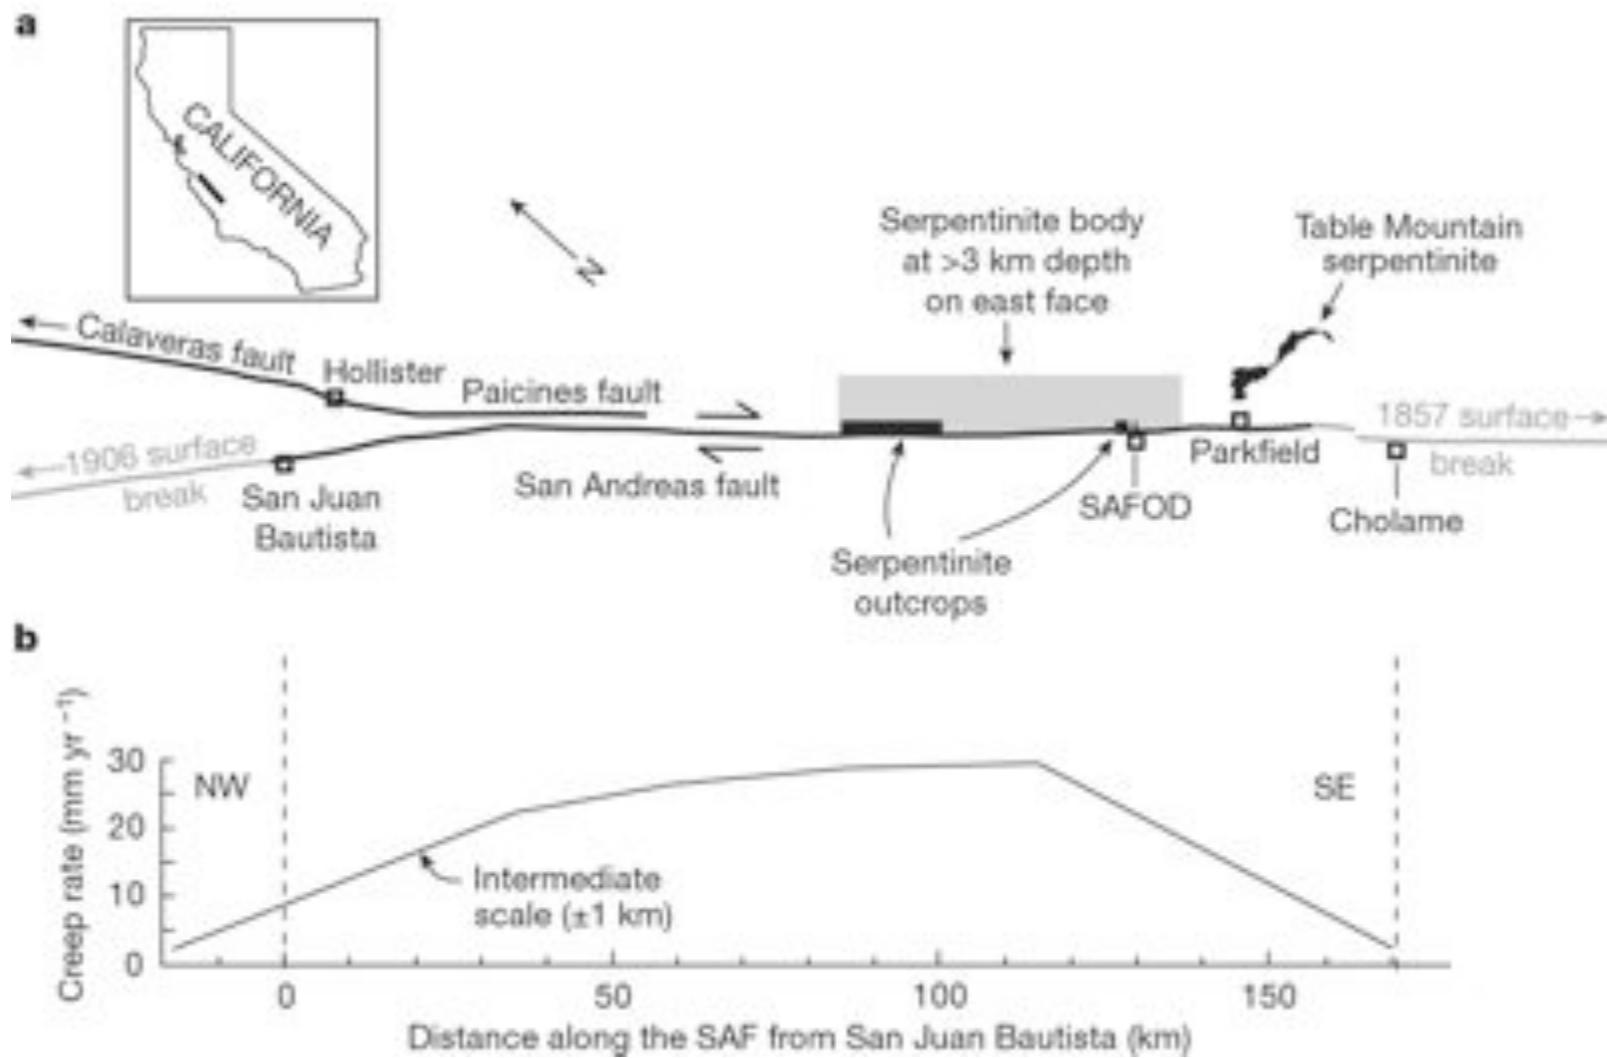

$$\mu(V) = \mu_w + (V_w/V)(\mu_0 - \mu_w) \text{ for } V > V_w$$

$$V_w = \left(\frac{\pi \alpha}{L} \right) \left[\frac{\rho c (T_w - T_f)}{\tau_c} \right]^2$$

Rice, 1999
Rice & Cocco, 2007
Beeler et al., 2008

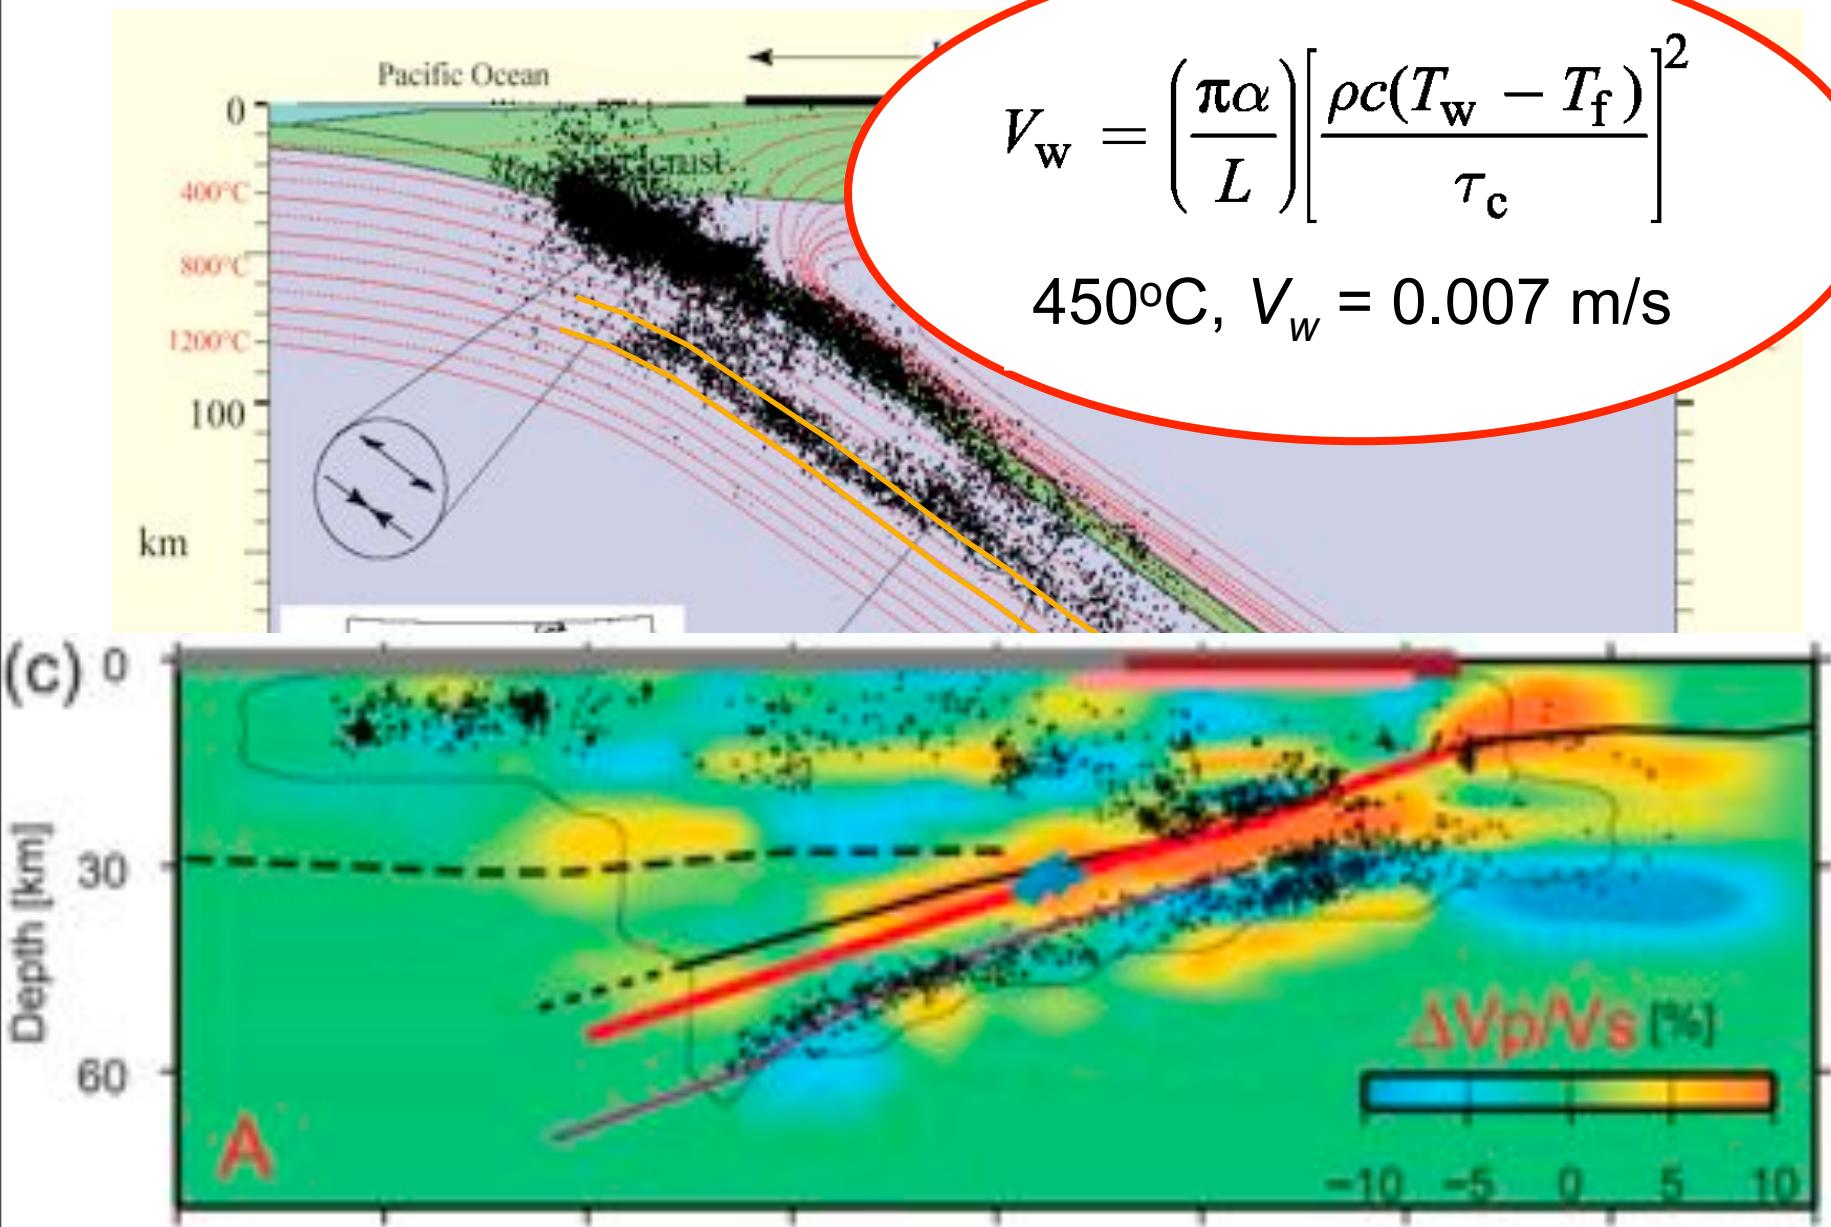

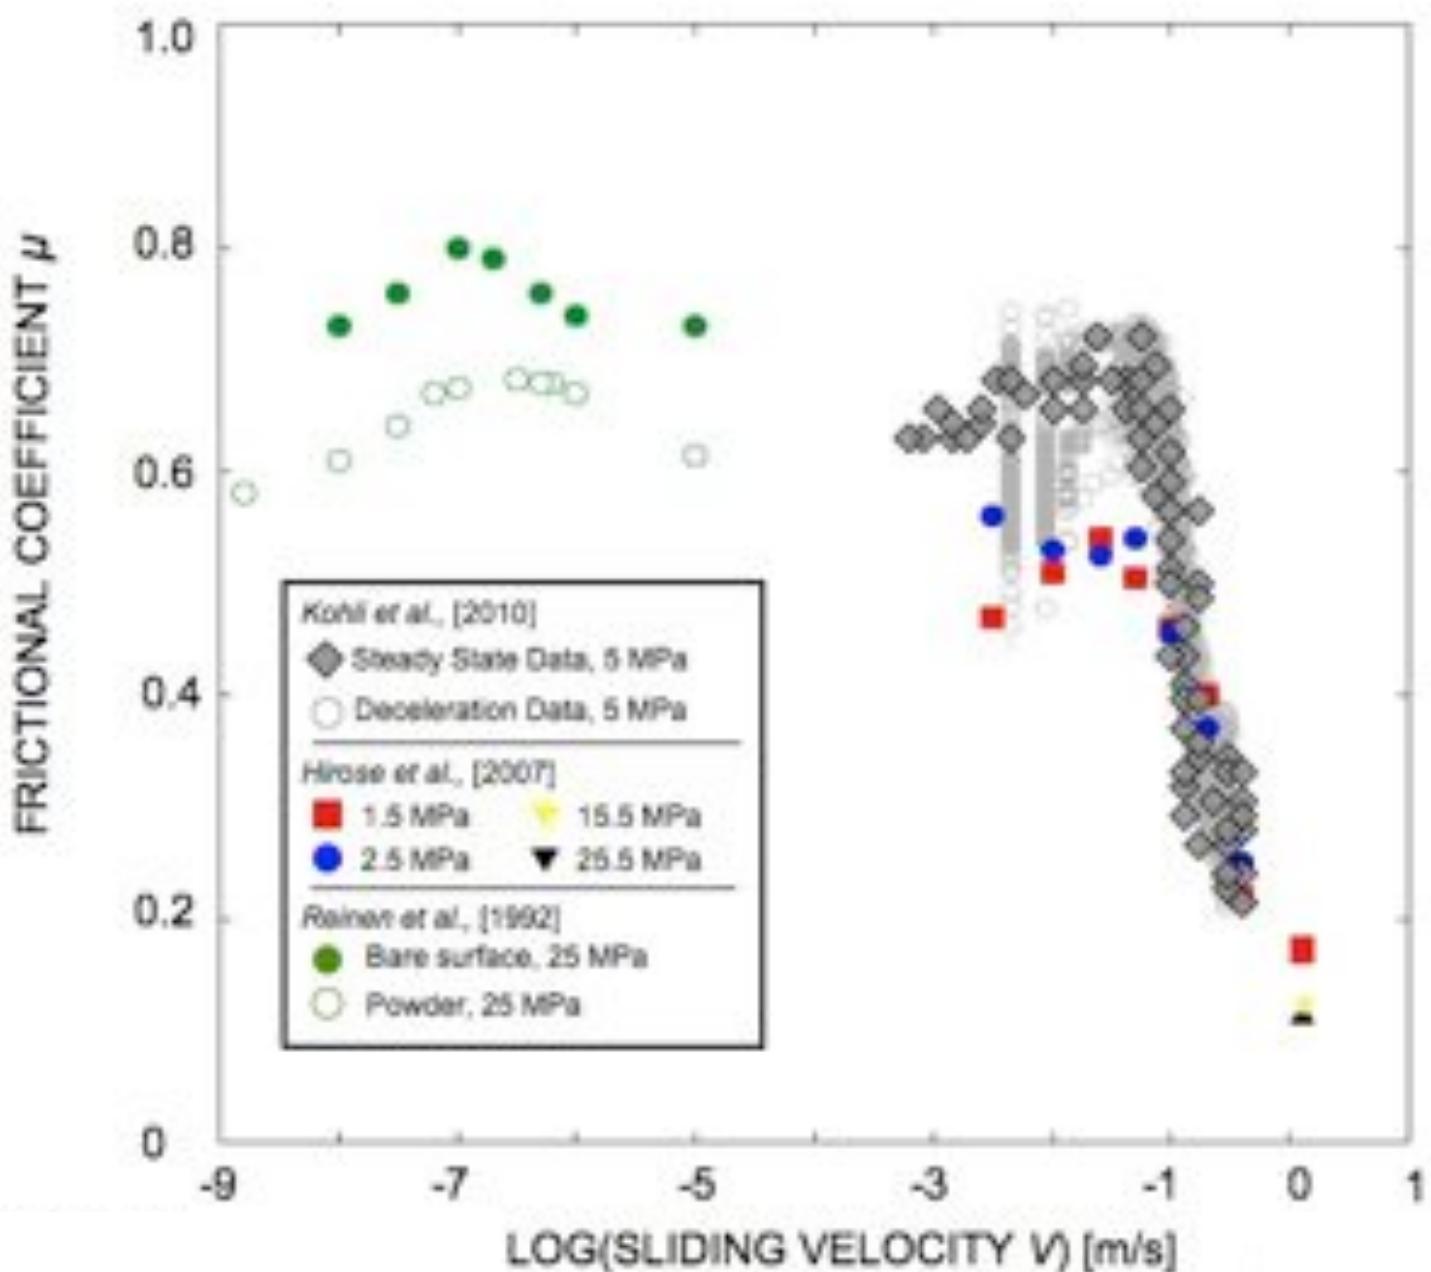

Moore & Rymer, 2007

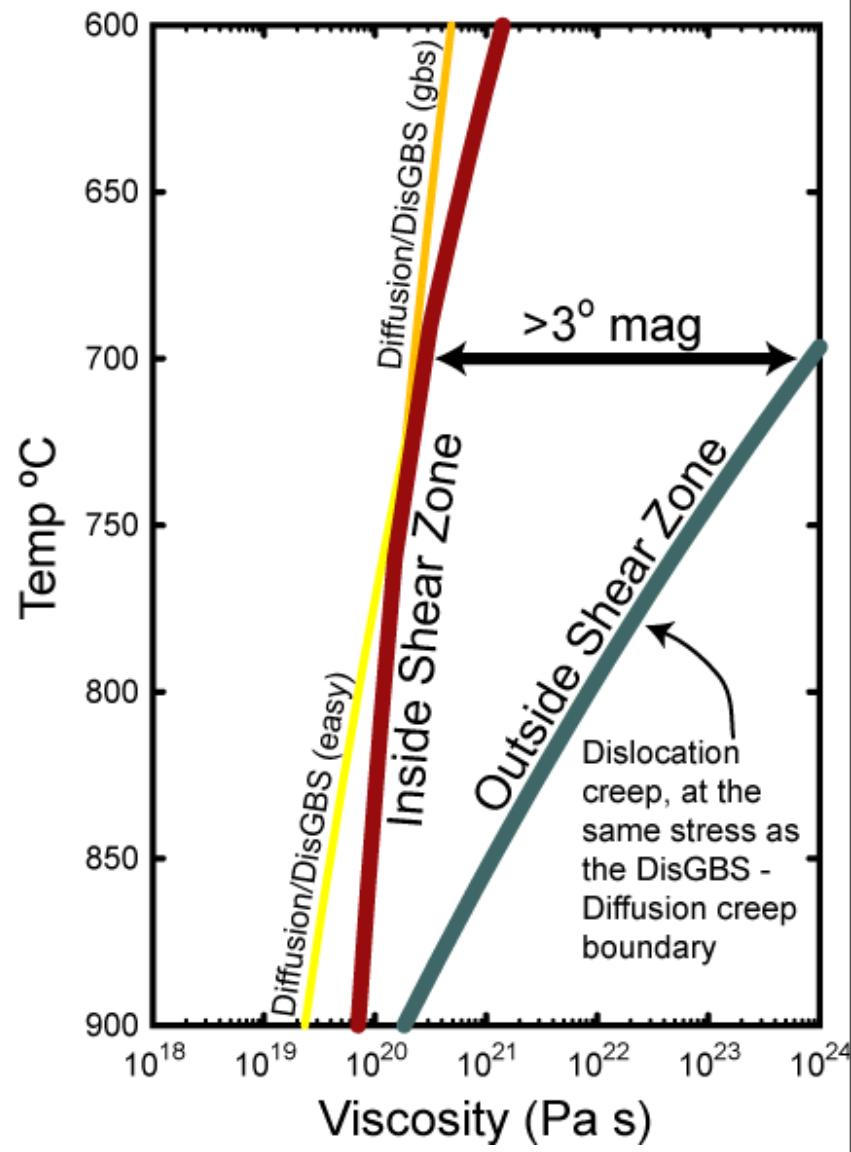

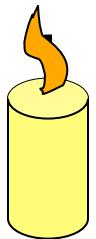

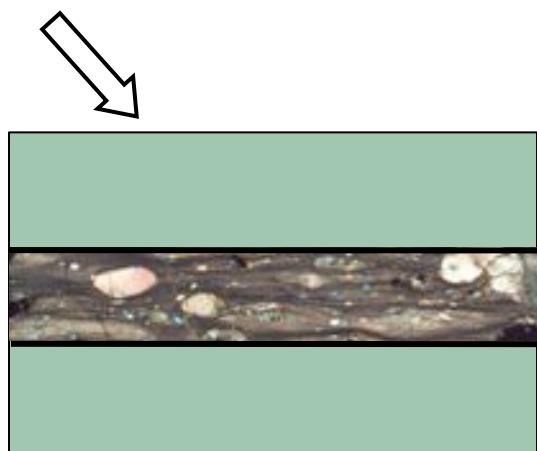

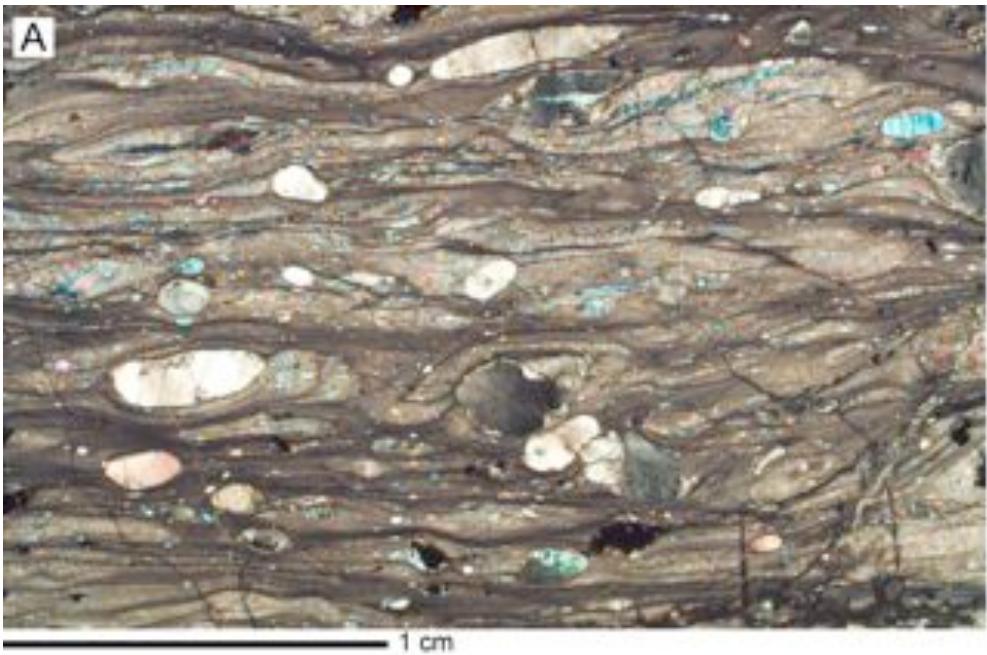

$$V_w = \left(\frac{\pi \alpha}{L} \right) \left[\frac{\rho c (T_w - T_f)}{\tau_c} \right]^2$$

$$450^{\circ}\text{C}, V_w = 0.007 \text{ m/s}$$

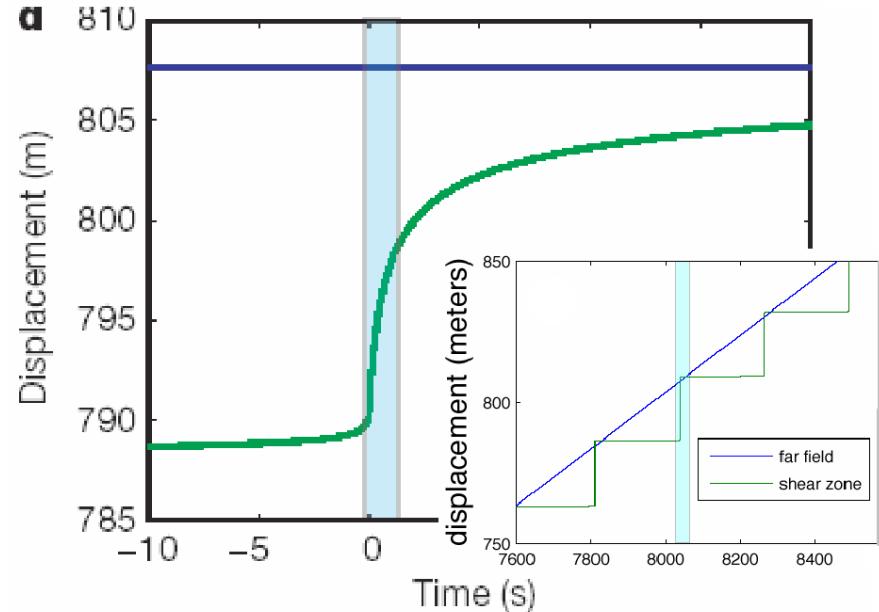

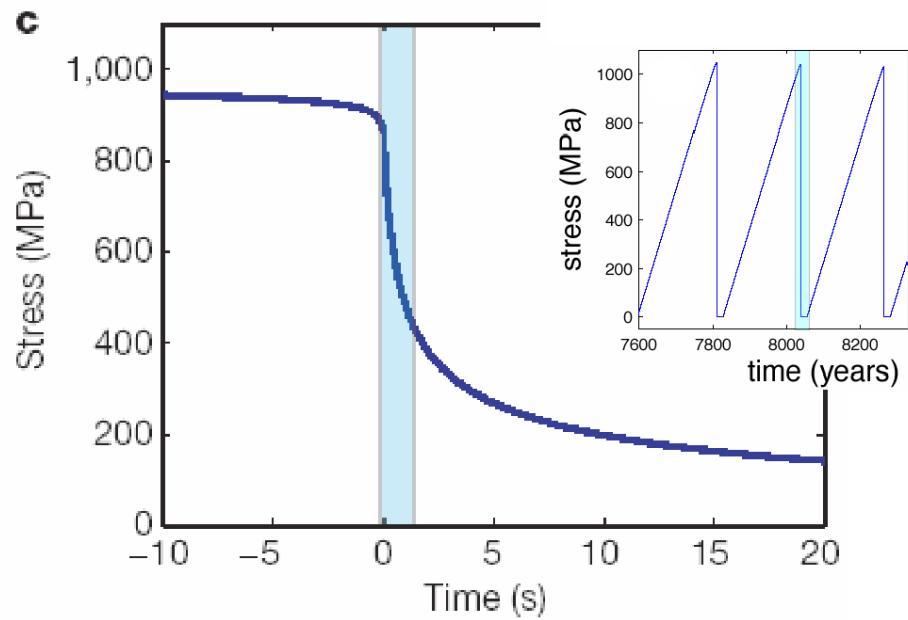

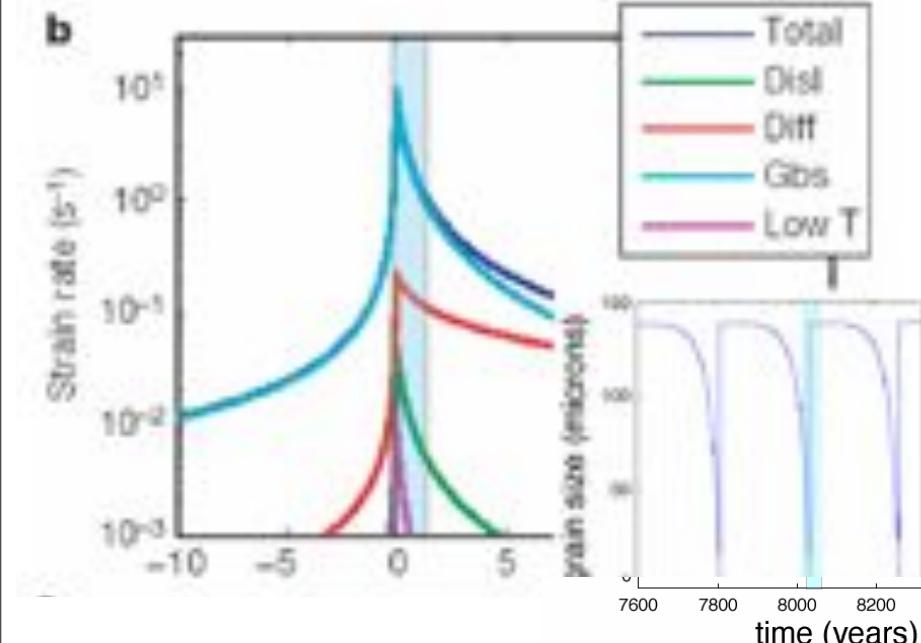

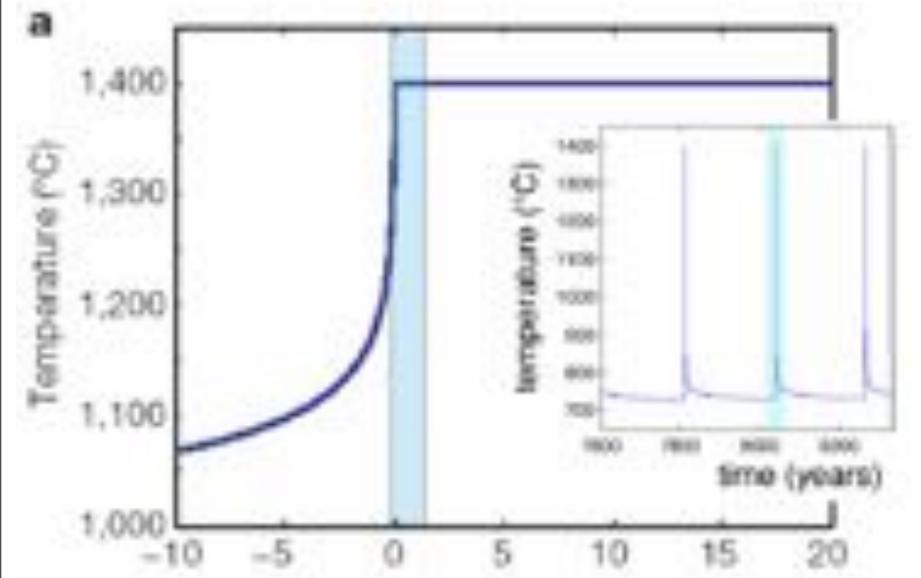

Hirose et al., 2008

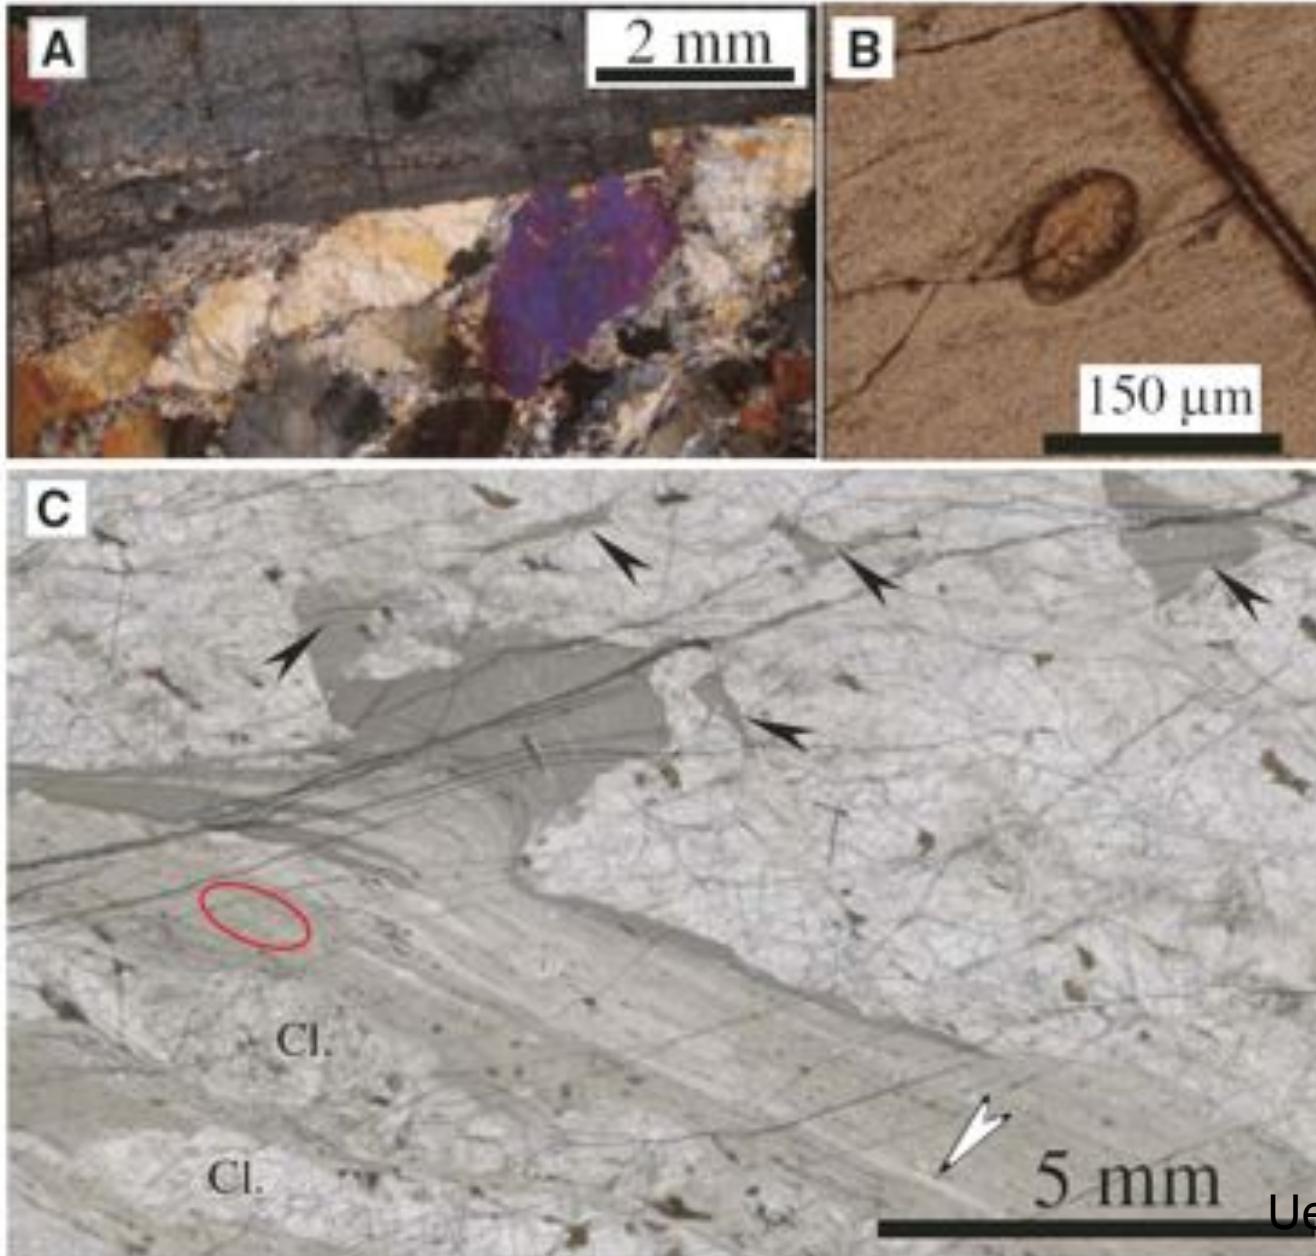

Warren & Hirth, 2006

Kelemen & Hirth, 2007

Pseudotachylytes from Balmuccia peridotite

Ueda et al., 2008

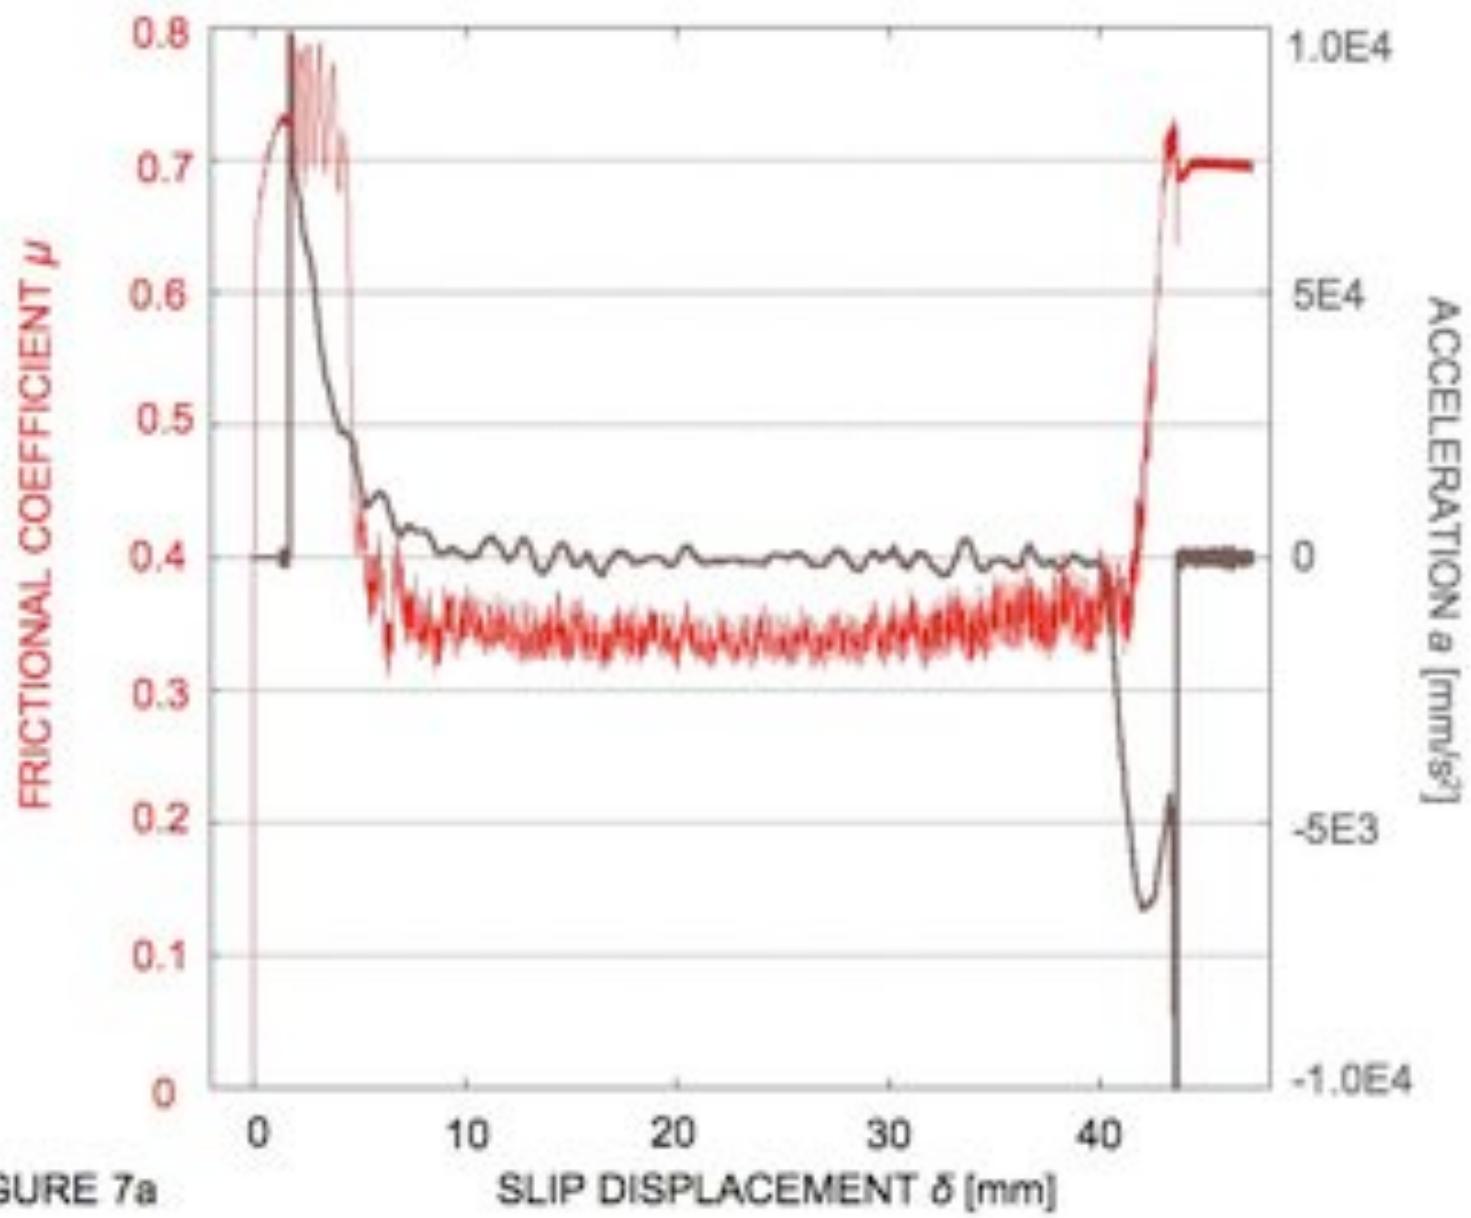

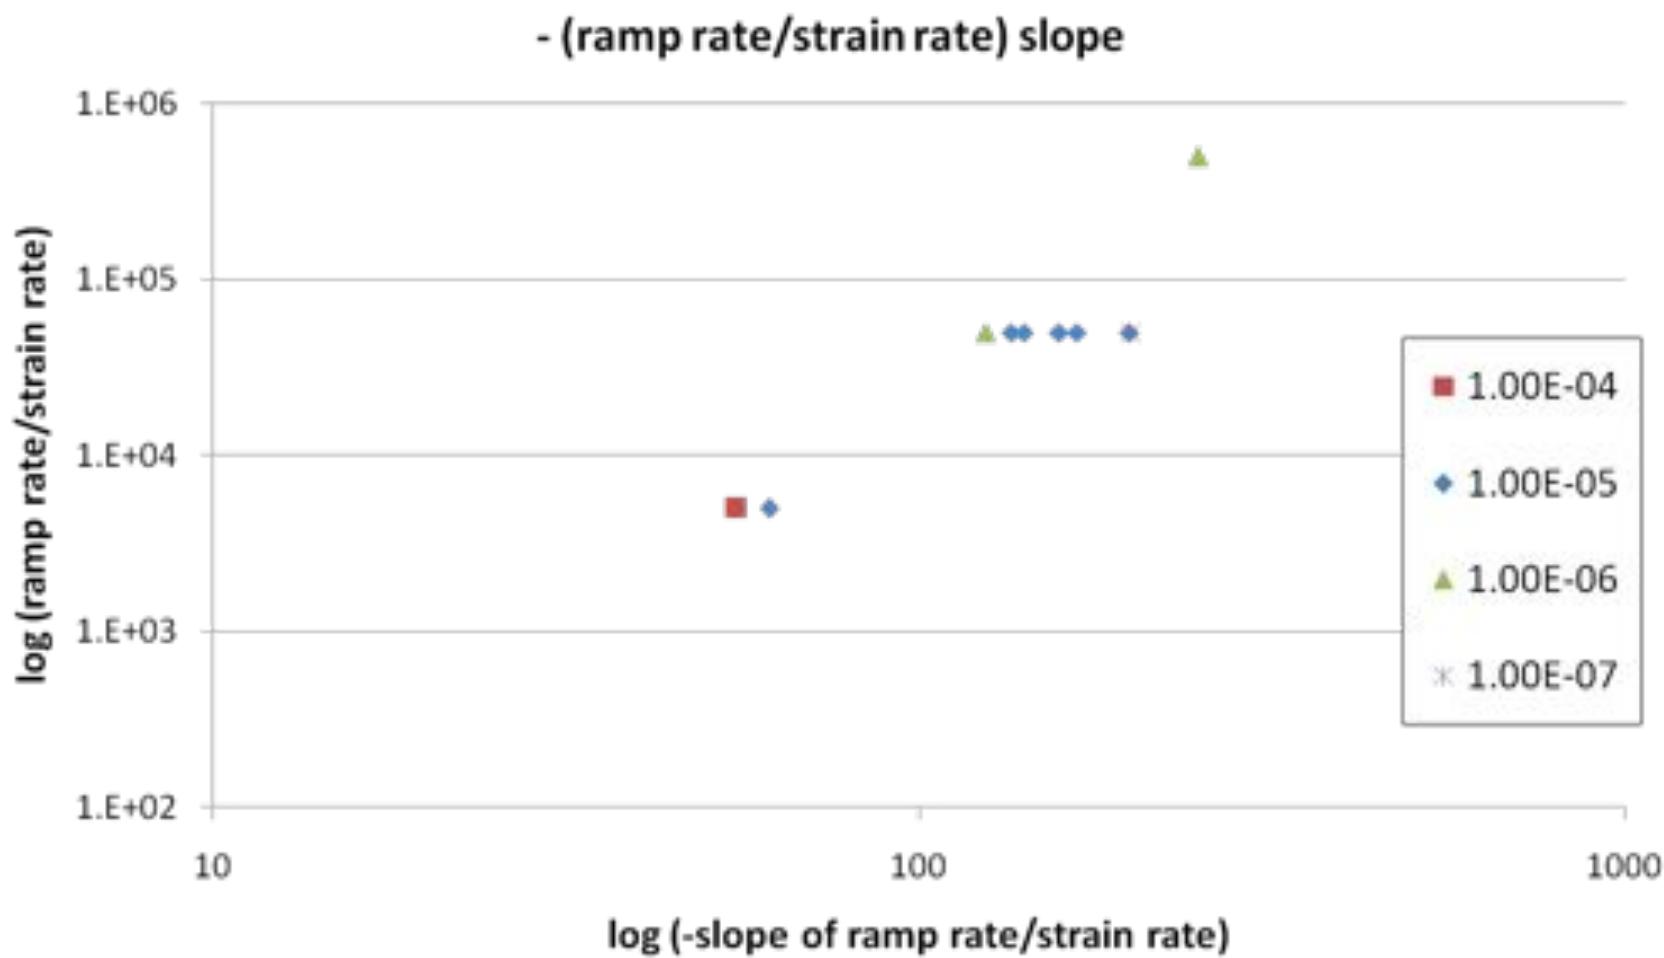

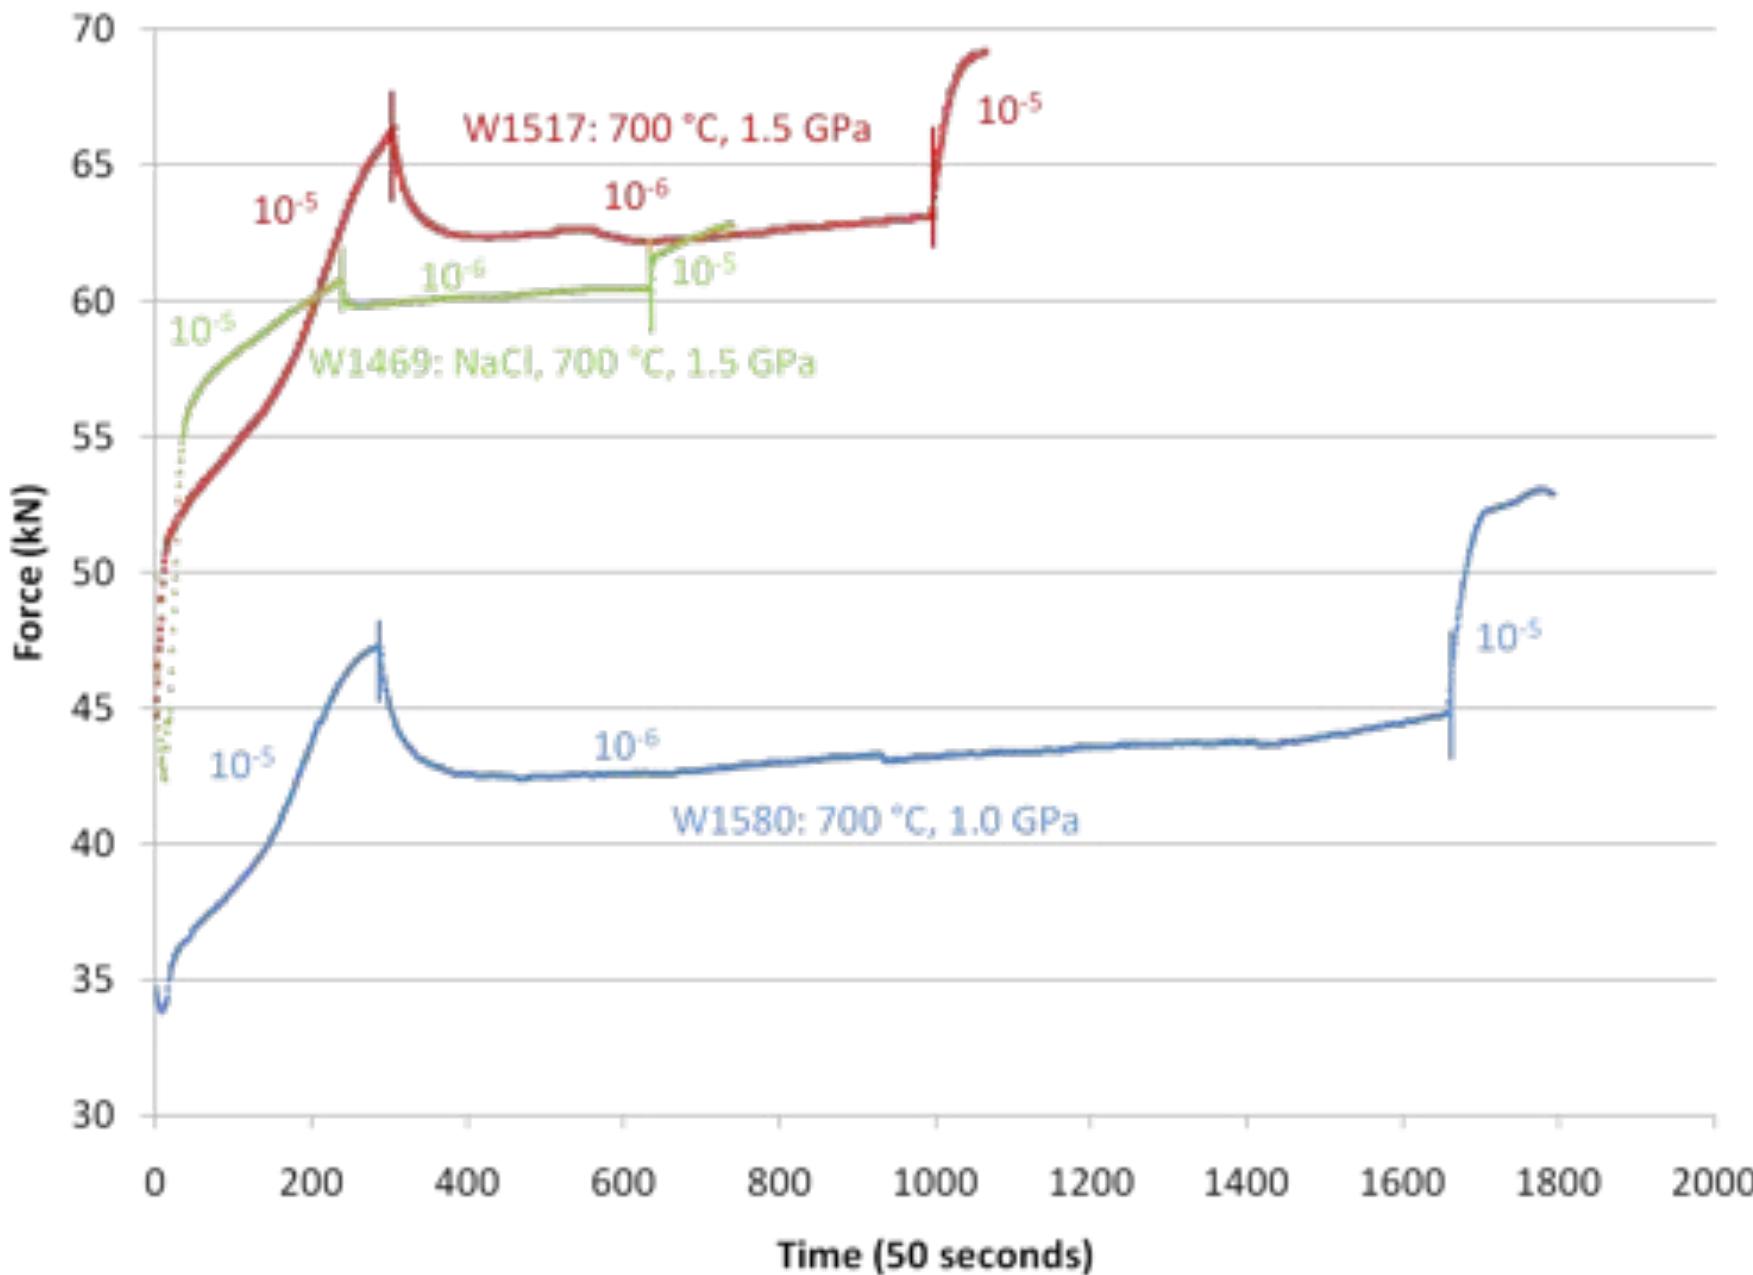

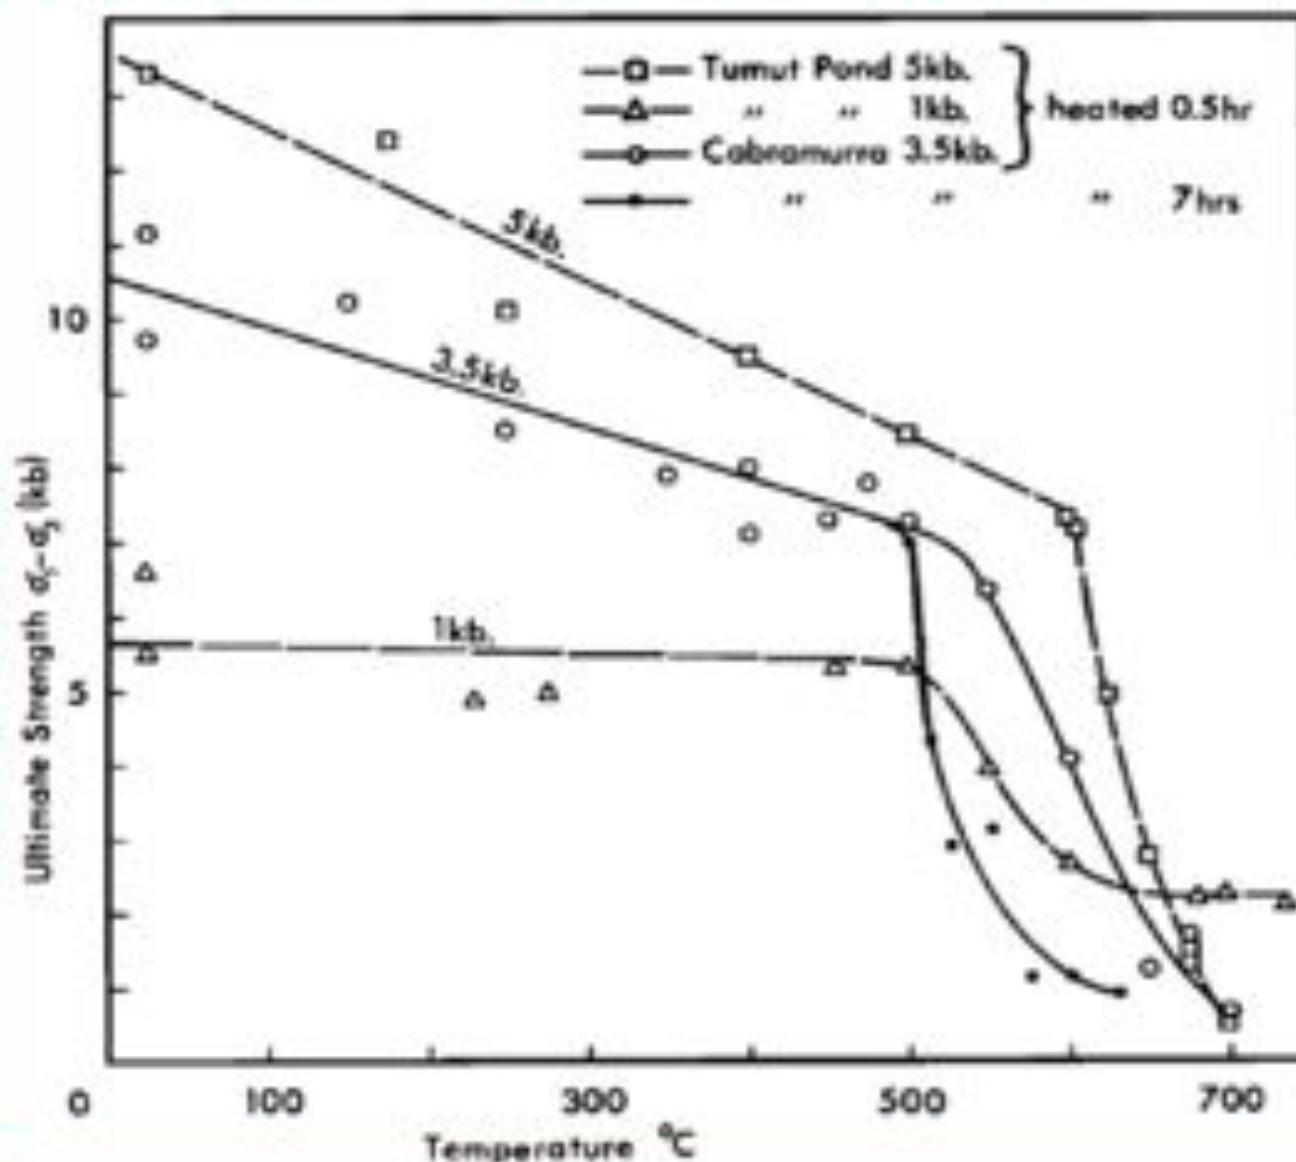

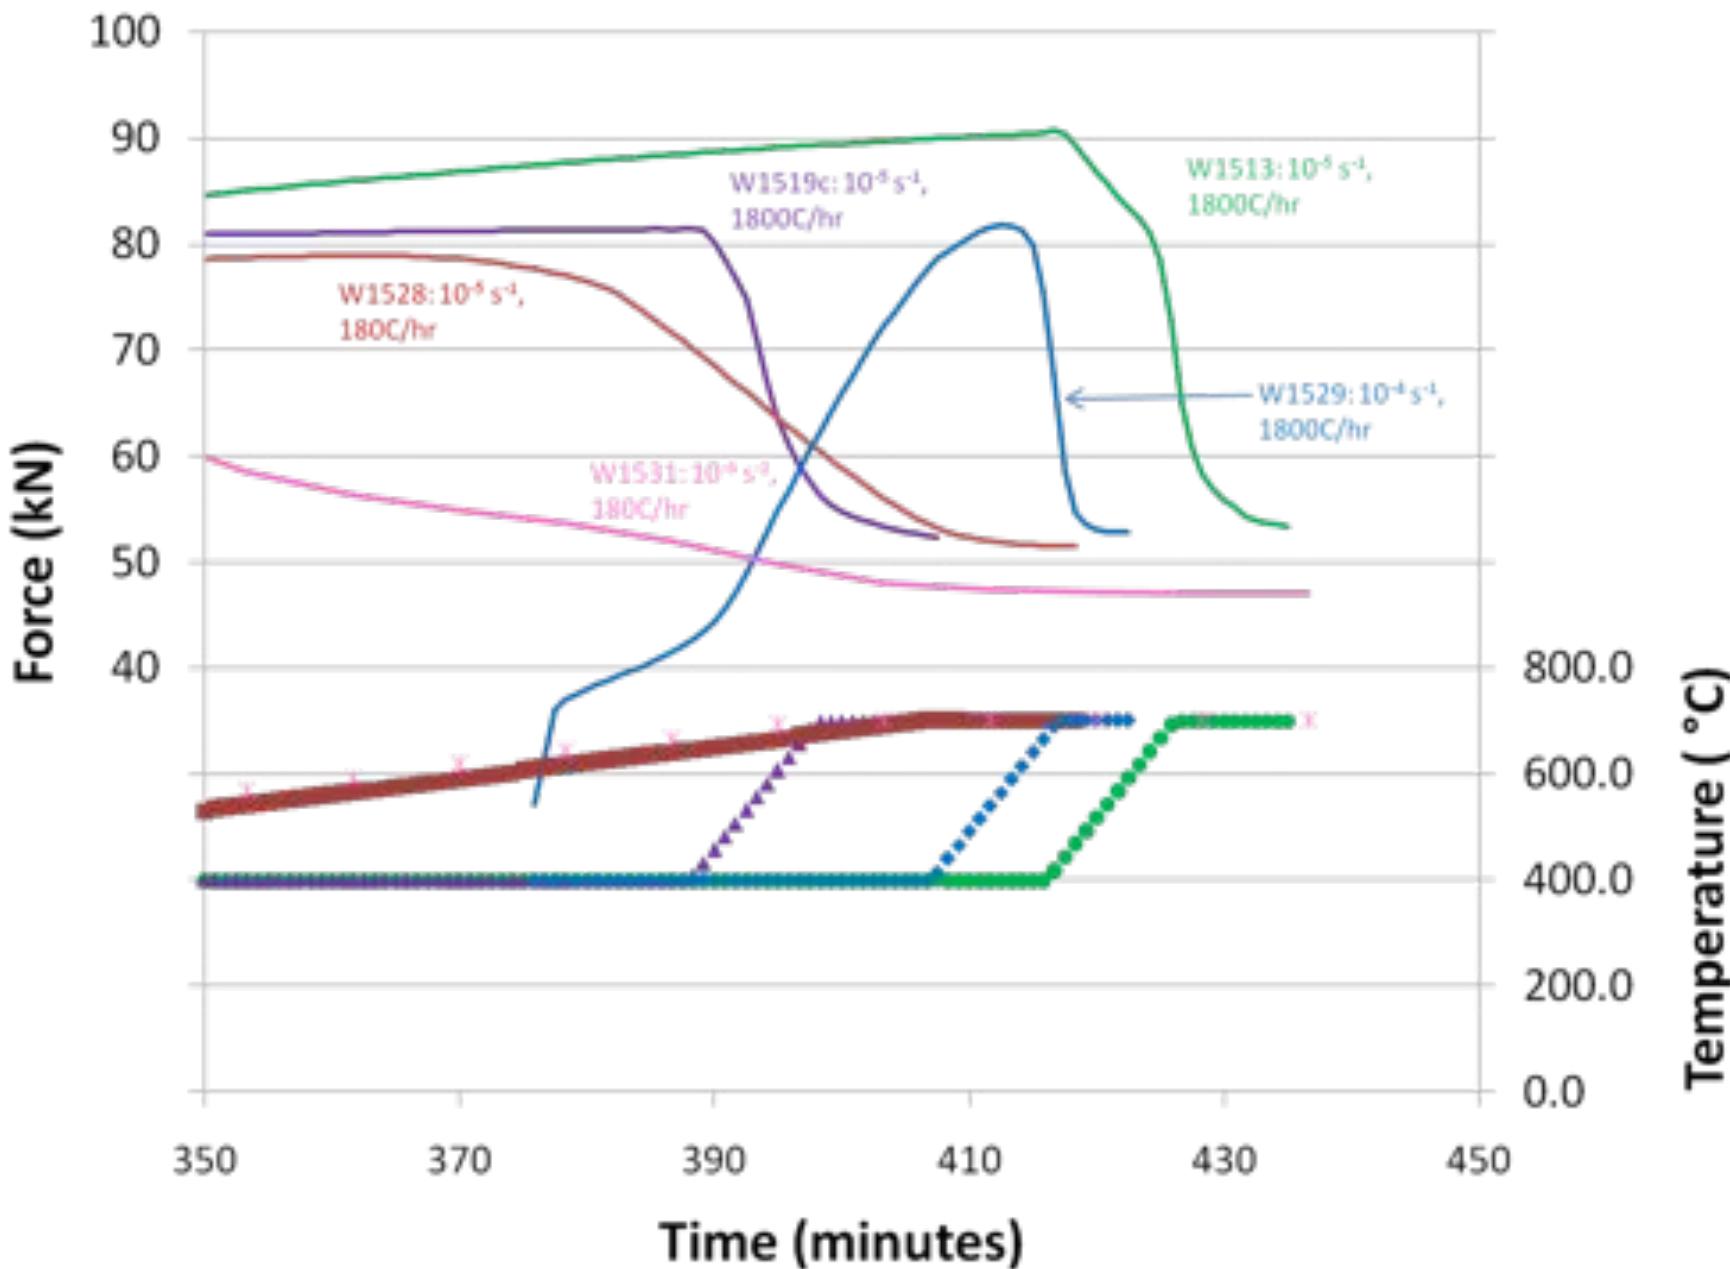

FIGURE 7a

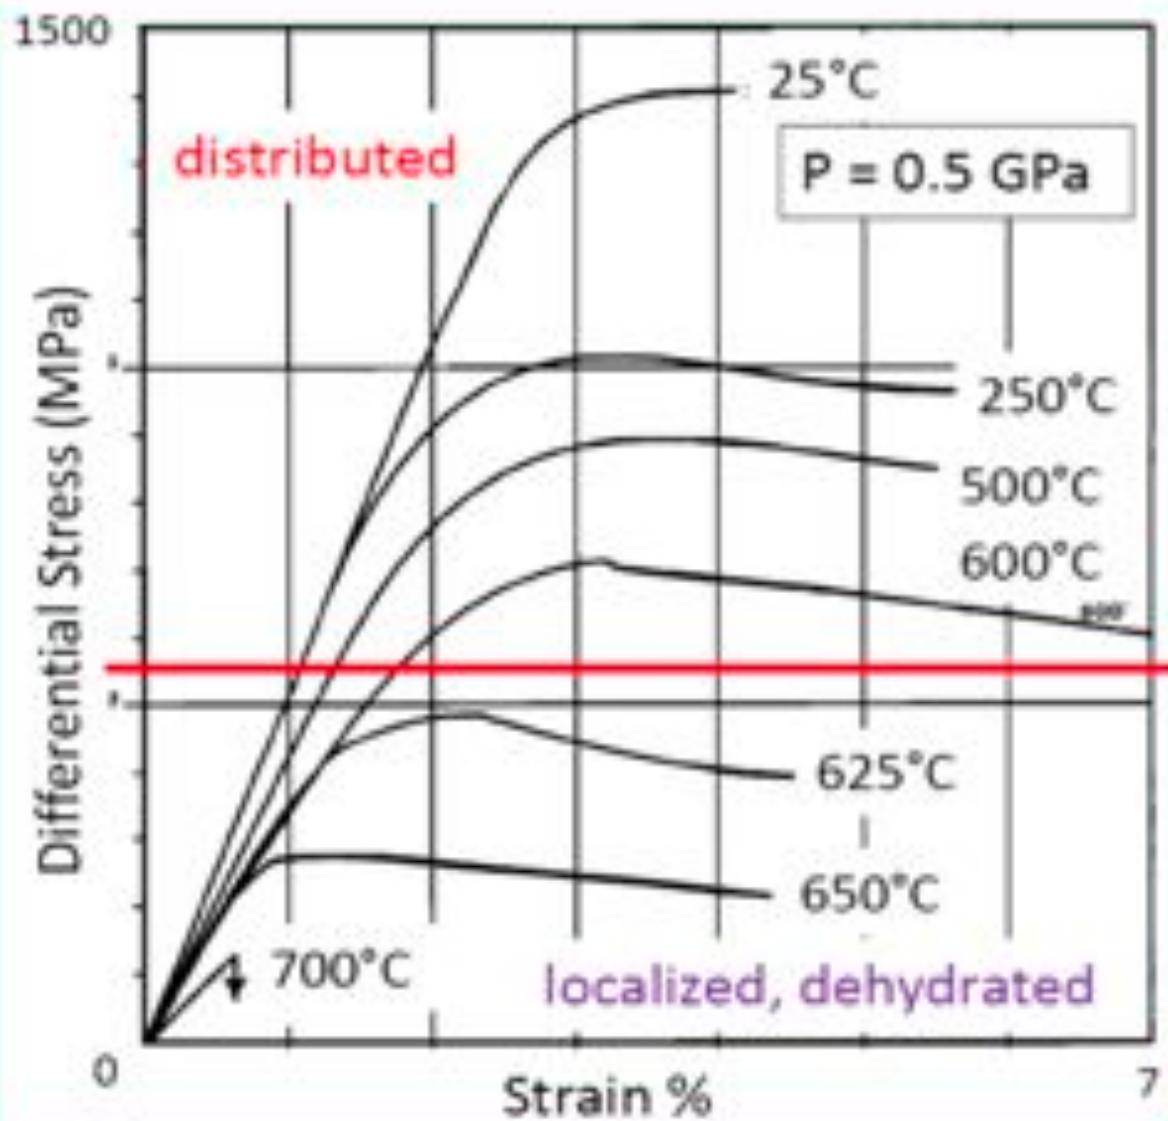

Raleigh and Paterson (1965)

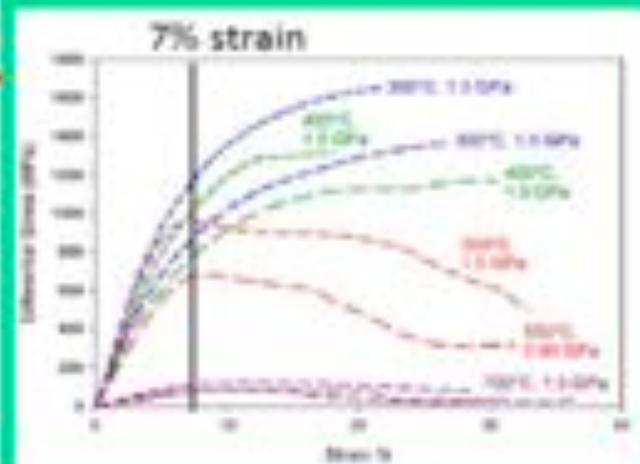

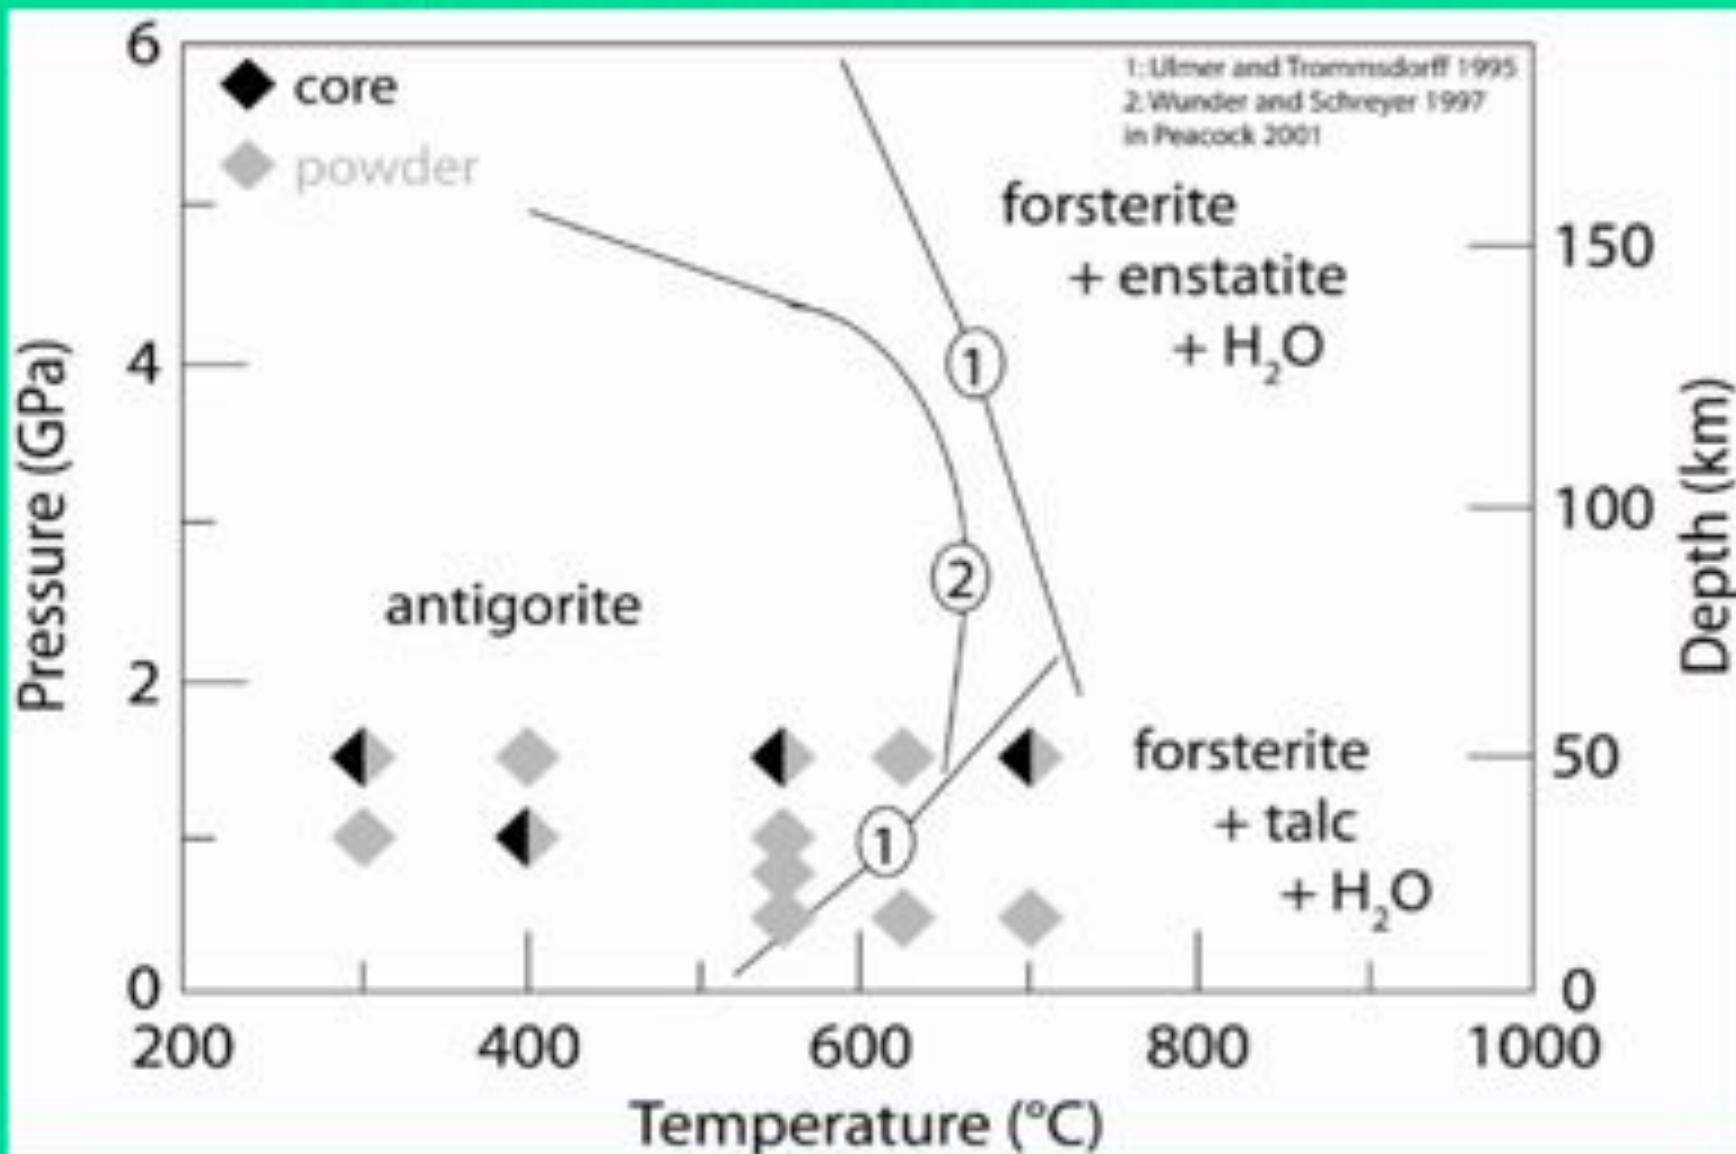

Raleigh and Paterson (1965)

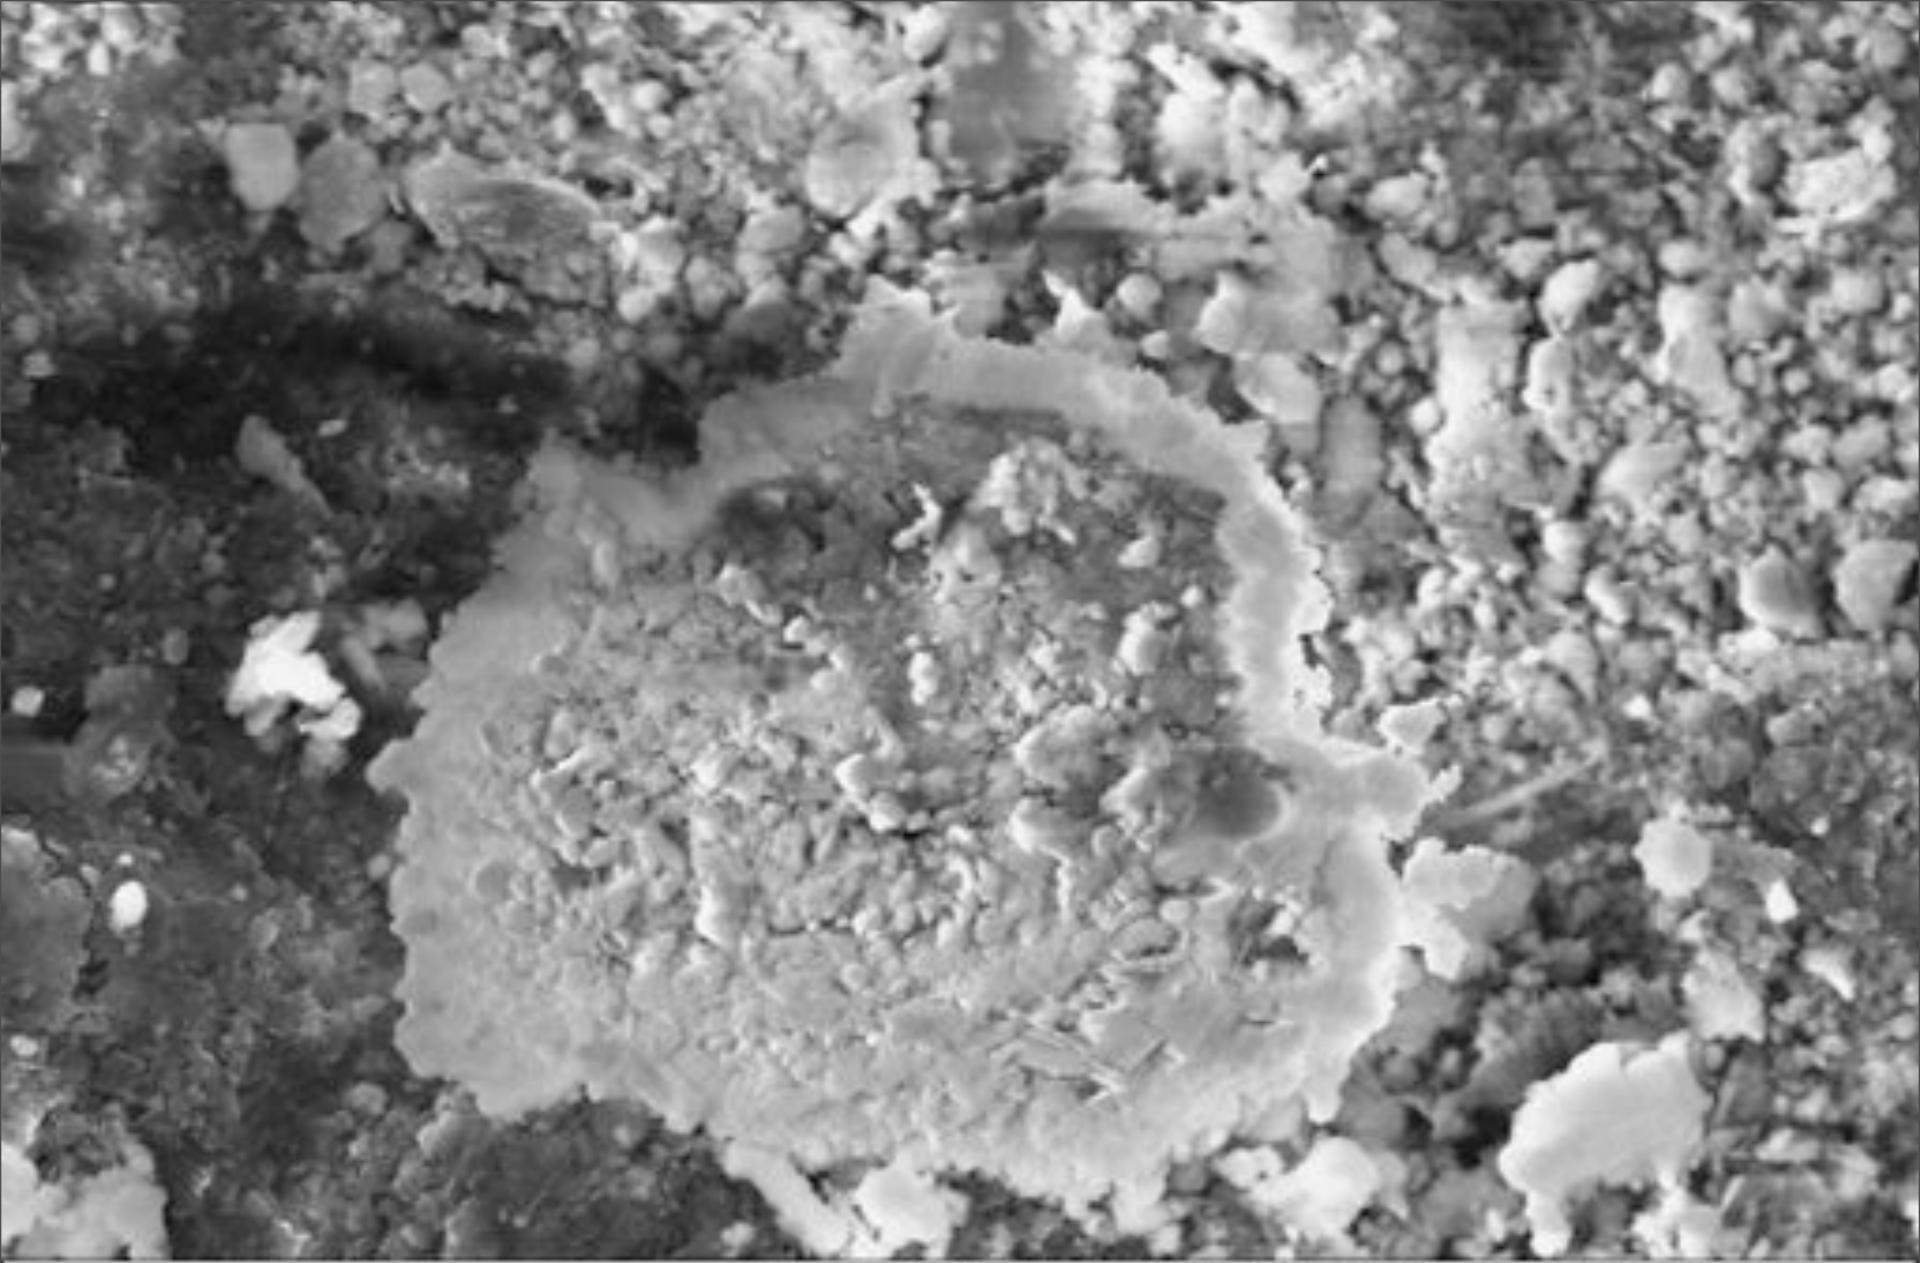

- lower confining P
- faster strain rate:
 $7 \times 10^{-4} \text{ s}^{-1}$
- very low strain

Experimental Conditions

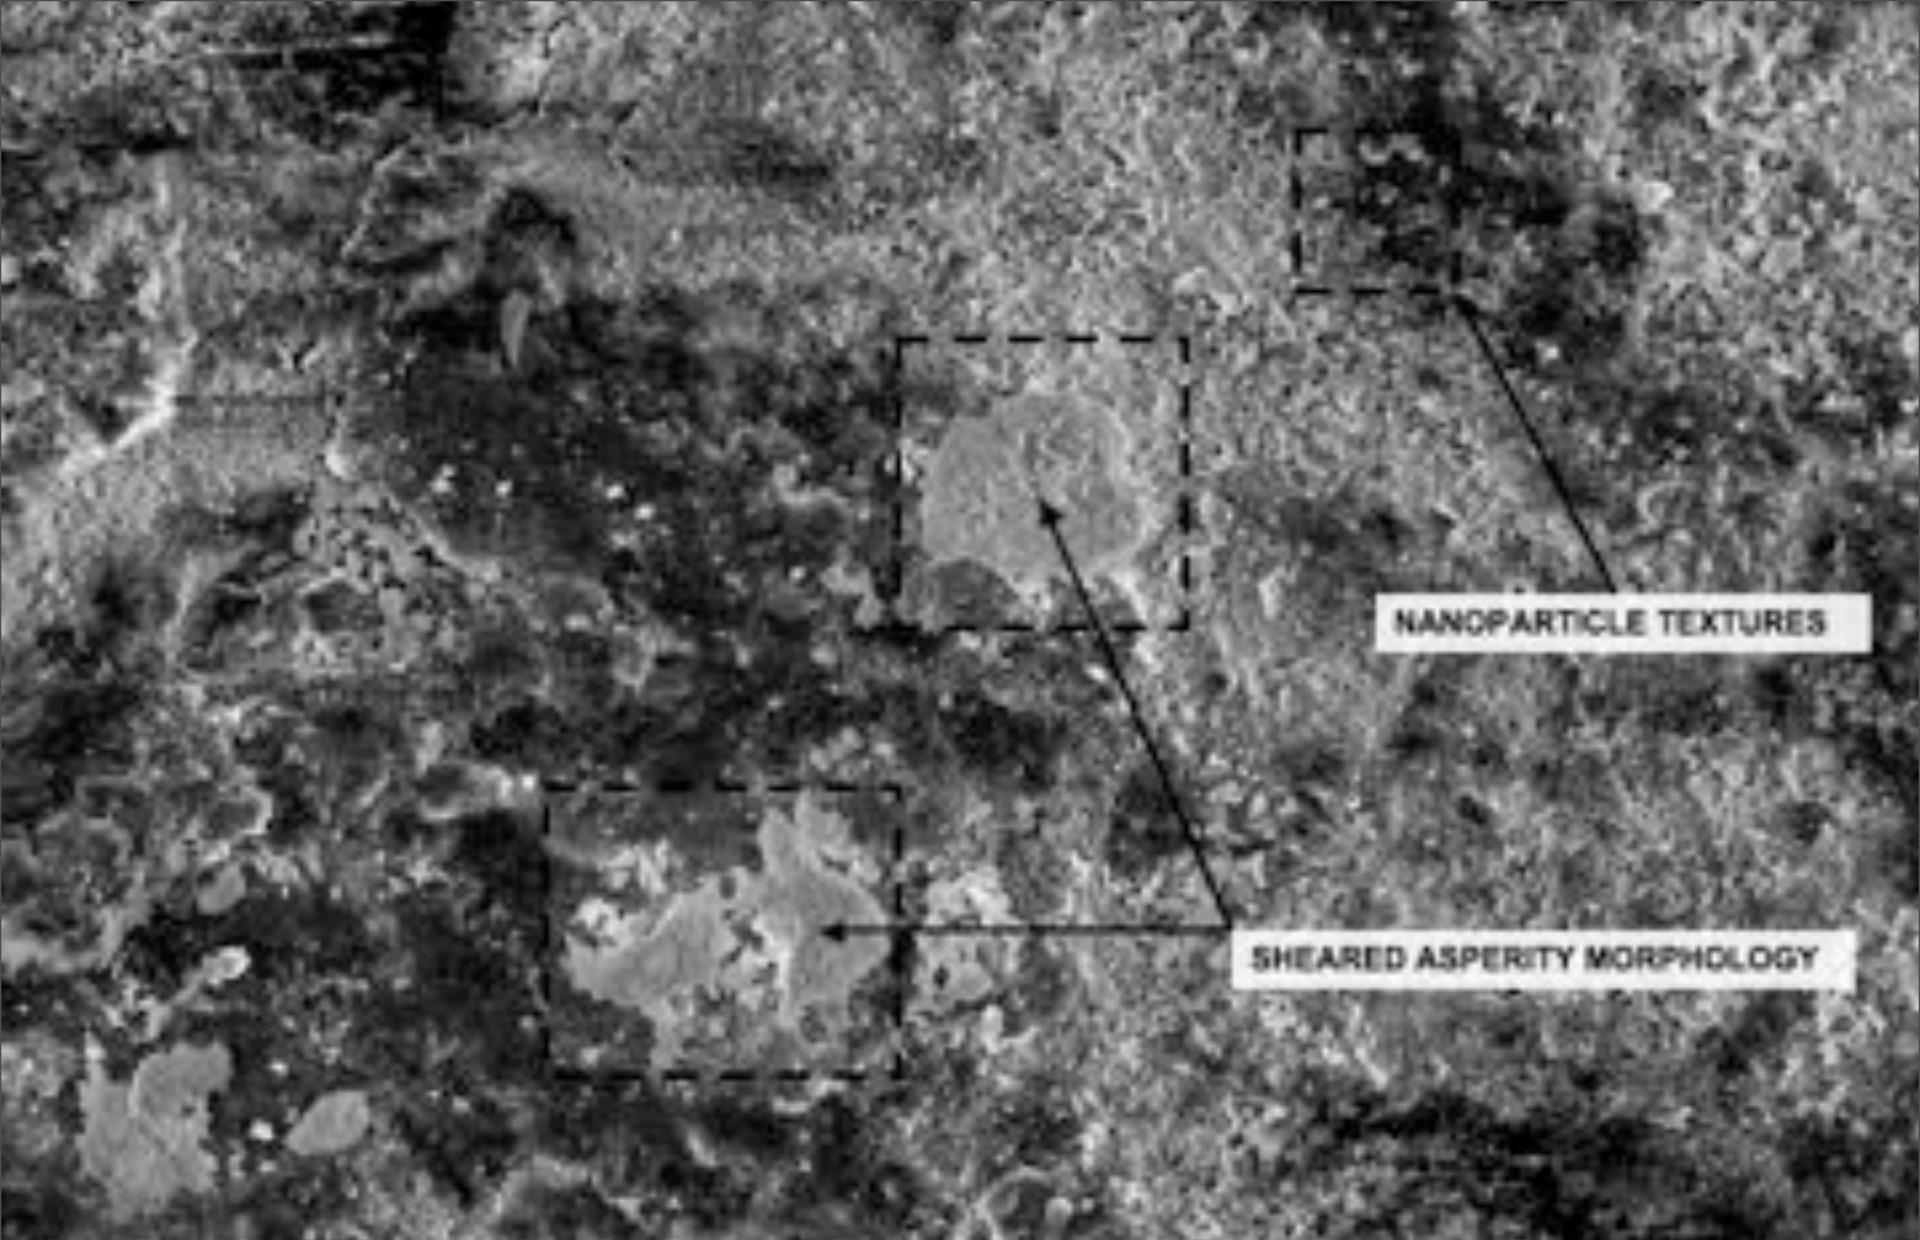

Chernak & Hirth, EPSL 2010

Mag = 18.05 K X 1 μ m

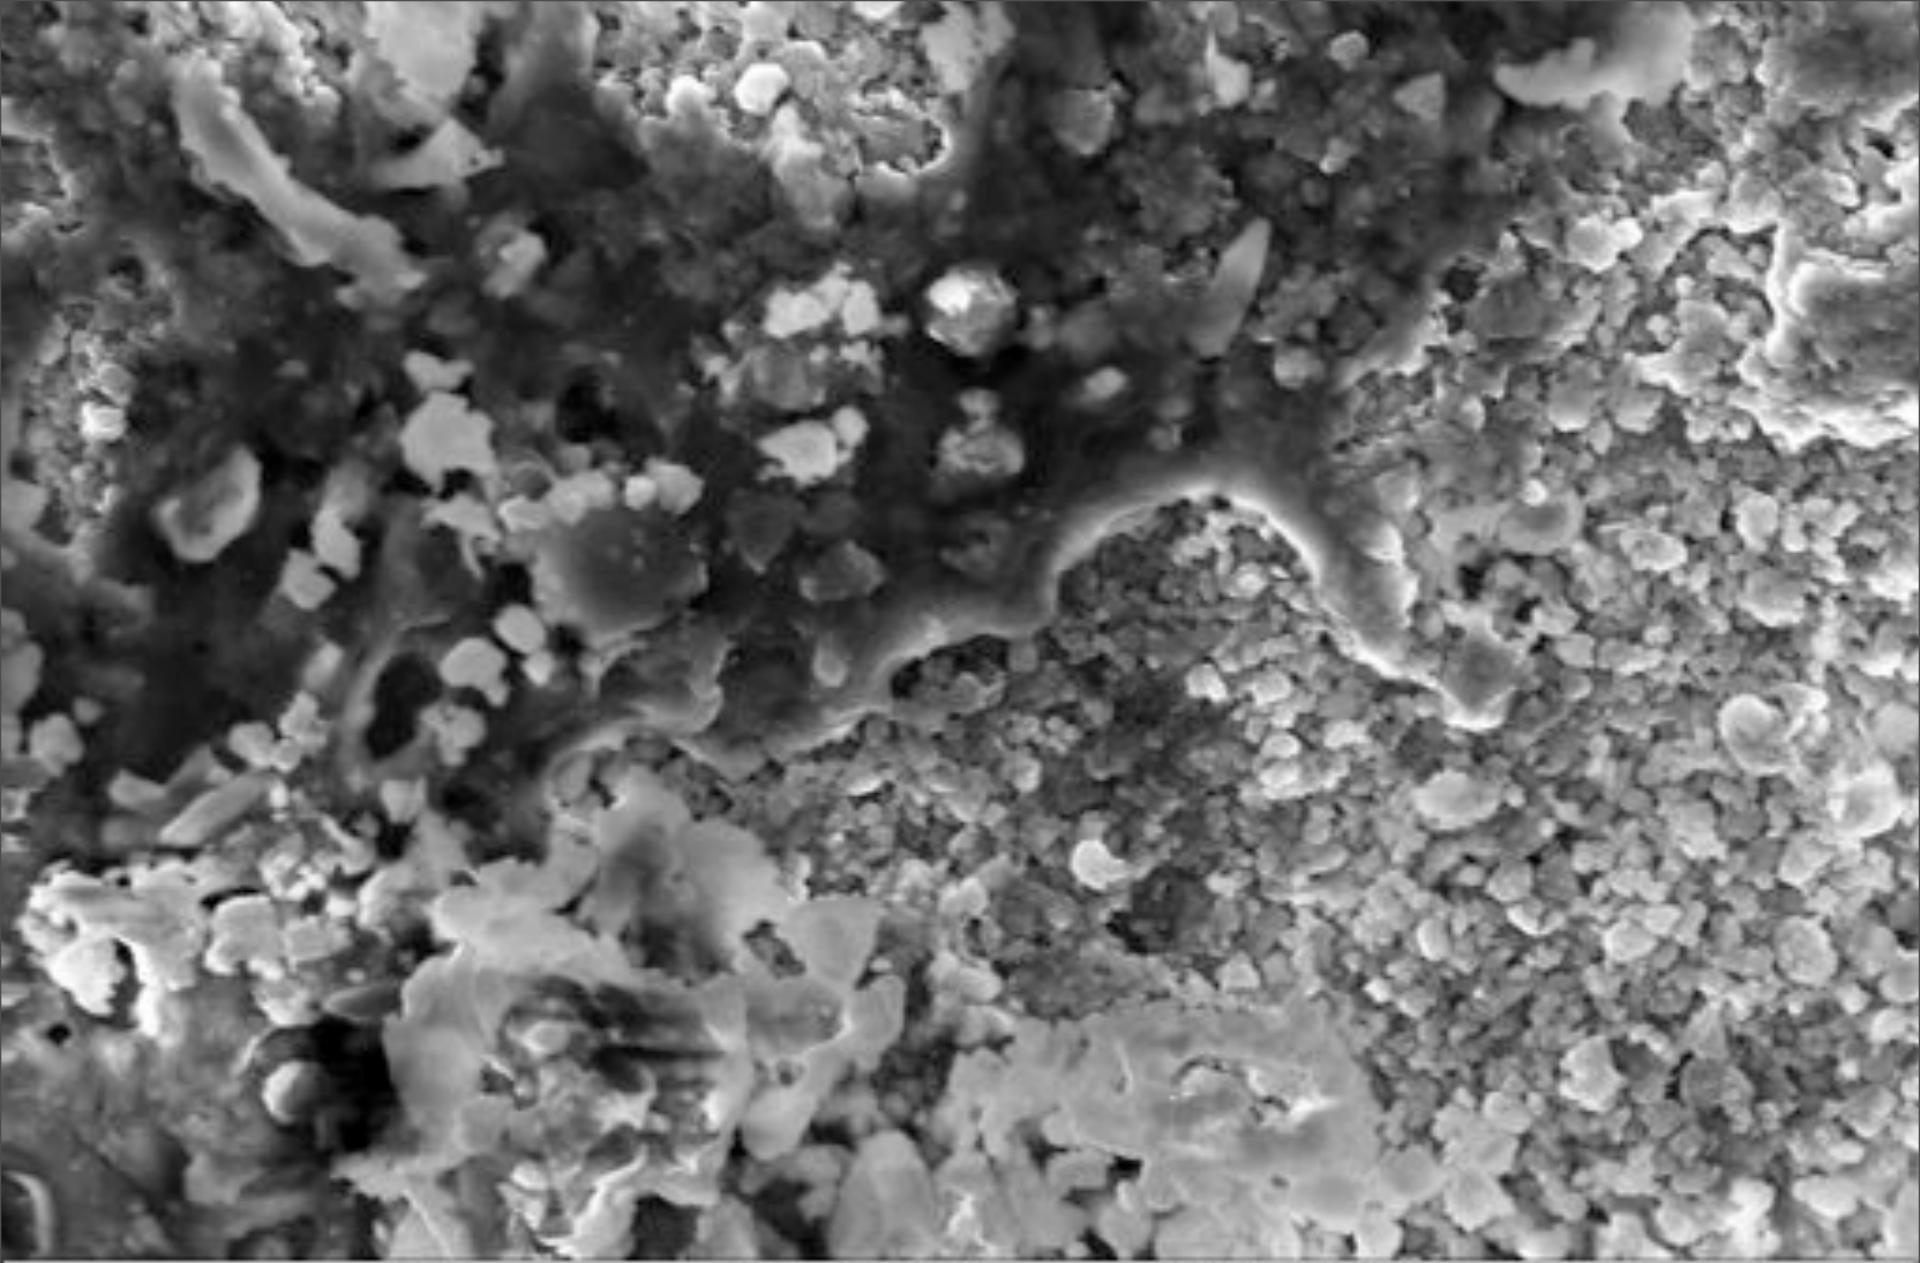

EHT = 8.00 kV
WD = 7 mm

Mag = 4.04 K X

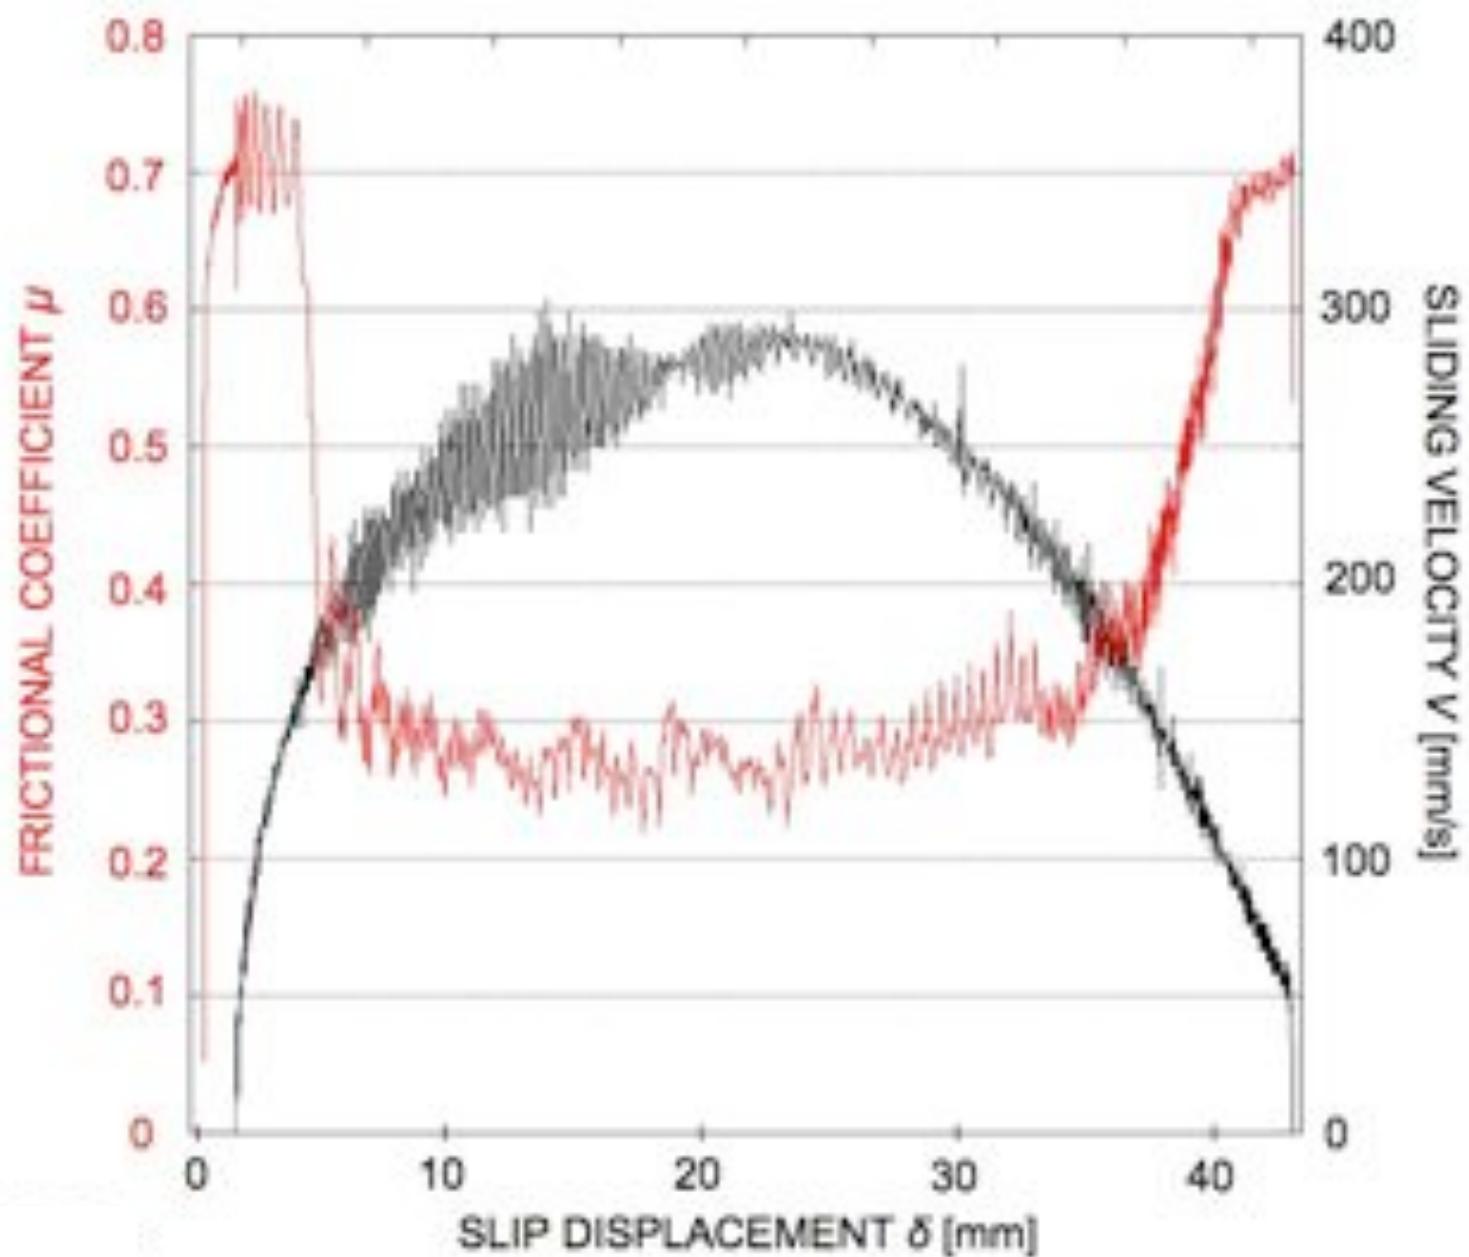

10 μ m

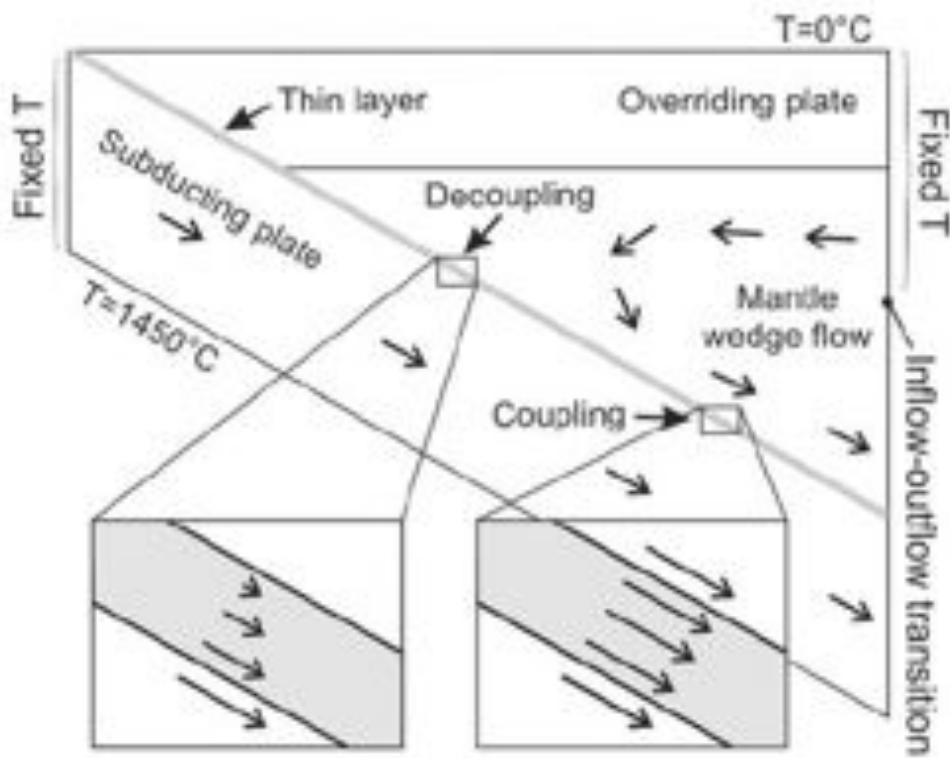

EHT = 7.00 kV
WD = 7 mm

Mag = 25.00 K X 1 μ m

EHT = 5.00 kV
WD = 5 mm

Wada et al. 2008

Extrapolation using rate dependence observed for localized zone gives effective viscosity $\sim 10^{17} \text{ Pa s}$

Consistent with viscosity required for decoupling in models of Wada et al. (2008)
